

DR. G. H. MURPHY
1875 - 1958

DR. K. A. MacKENZIE
1880 - 1958

It is with a profound sense of loss, shared by all, that your Committee must record the recent deaths of two of Dalhousie Medical School's most distinguished graduates.

Born in the adjacent, predominantly Scottish Counties of Antigonish and Pictou, Doctors Murphy and MacKenzie spent their early years among surroundings and traditions characteristic of Scotland for over 200 years. Following early education in their native counties they graduated in Medicine within one year of each other.

In their chosen fields they rose to the highest posts in the University, holding respectively the chairs in Surgery and Medicine. Beloved teachers both, their influence was felt far beyond the confines of Dalhousie. They carried their many responsibilities with modesty and humor, saw fit to record for posterity their knowledge of Medicine and its glorious past, to be visionaries as well, and by their example and writings to form a never to be lost bridge between the best of the past and the complexity of the new. "VALE"

DR. FRANK RICE
1867 - 1958

As we go to press we must also with regret report the death of our oldest and earliest graduate. Dr. Rice graduated from Dalhousie Medical School in 1893. He was an outstanding General Practitioner in Digby County for over 50 years, and although in indifferent health during the past few years, maintained an active interest in his community and University.
