The Cuff-Mounted TYCOS Aneroid

### NO DOUBT ABOUT IT — WHEN IT'S A TYCOS

For more than fifty years the TYCOS Aneroid has been a favorite with doctors everywhere. There are four principal reasons for this popularity. Accuracy: the accuracy of a TYCOS Aneroid can be visually checked each time it is used. If the pointer returns to "zero" when pressure is released, the aneroid is accurate. Quality Construction: We have received letters about TYCOS Aneroids that have been used for more than 20 years; Warranty: The famous TYCOS Warranty states that any TYCOS Aneroid losing accuracy during the first 10 years will be repaired without charge. Convenience: The TYCOS Aneroid is available in either the Cuff-Mounted Model (No. 5090 - \$52.00) or the Hand Model (No. 5098 - \$52.00) with gage on inflating bulb. Each weighs only 18 ounces and is available with hook or Velcro 80 cuff. See and try them at your Surgical Supply Dealer.
