International Symbiosis Congress

Jerusalem, November 17–22, 1991

The program will be arranged to encourage comparative discussions in different symbiotic systems and is therefore planned according to topics rather than types of symbiosis. There will be plenary lectures, parallel symposia, workshops, poster sessions and commercial exhibits. Posters will remain on display throughout the Congress.

Topics

Nutritional interactions, carbon and nitrogen metabolism
Transport mechanisms
The host-symbiont interface
Mutual regulatory and morphogenic effects and structural coadaptation
Regulation of symbiont population
Recognition and specificity
Molecular genetics of symbiotic interactions
Symbiosis and genetic exchange
Trophic links, recycling and conservation
Transmission of symbionts
Symbiosis and development of new structures and functions
Evolutionary consequences of symbiosis
Ecological adaptations
Ecology of the rhizosphere
Behavioral symbiosis
Symbiotic virus-host relationships

Workshops

Applications of modern techniques to the study of symbiosis
Teaching Symbiosis

Deadline

For abstracts
