

POST GRADUATE WEEK
in
Obstetrics, Gynaecology and Paediatrics
NOVEMBER 22nd - 26th, 1954

The Post-Graduate Program of Dalhousie University Medical School in co-operation with the Department of Obstetrics and Gynaecology and the Department of Paediatrics is again pleased to present a short course in Obstetrics, Gynaecology and Paediatrics for the General Practitioners of the four Atlantic Provinces. These courses are essentially practical and every effort is made to see that candidates may participate in or witness techniques etc. This course will include presentations or round tables on the following: Hemorrhage in Obstetrical Practice, How X-Ray Helps in Obstetrical Practice, Handling of Abortions, Diagnosis of Difficult Labour, The Post-partum Breast, Management of Toxaemias, Pruritis Vulvi, Obstetrical Analgesia and Anaesthesia, Post-partum Complications, Fluid and Electrolyte Therapy Techniques, Handling of the Child Diabetic, Poisoning, Paediatric Dermatology. There will also be ward rounds in the Grace Maternity Hospital, the Victoria General Hospital and the Children's Hospital. Any enquiries or applications may be addressed to Executive Officer, Post-Graduate Committee, Victoria General Hospital, Halifax, N. S.
