Wind West - very little
 + gave with a piece of black
 marble recumbent and cast the
 same degree of heat as a black
 board -

The natives here are in ge-
 neral so averse to pay^l of
 their just debts that the British
 or French will allow their
 lands to be advertised for sale -

by the Sheriff and let the money
 go on till the very last day & let
 them pay with all the addition
 of expenses —
 11 Thurs quod n. 2
 11 Thurs quod n. 2
 wind as before
 11 Thurs
 12 Thurs quod n. 2
 wind N. West — clear — gentle
 breeze —
 + exposed the China slab
 to the sun — heat much greater
 than that of the rail above
 mentioned in the experiment
 of yesterday —
 Nys. below all day —

with D. Dick —
 Amputation — difficult to ascertain
 the different application of points.
 Sir W. J. never gave a good
 dinner — Turkey!! Jackal — he would
 not have had one to day had
 not the Jackal killed it some
 time ago — Curry always set
 before Sir W. — Should any per-
 son attempt to taste it, I
 instantly pronounced it not good.
 A Gentle observed that Sir W.
 had less the appearance of a
 Gentle than any man in the
 settlement on the bench he
 looked rather like a Cobbler
 than a judge. — His mo-
 nument will be permitted
 to be put up in the church

of Calcutta provided it be
small and do not project more
than two or three inches from
the wall - bad example -

Evening at N. F. -

The nation cannot take out
of linen Spots by Europe Jack
which have been in the cloth
some or four months ago -

Quinine sold in the Bazaar
is said to be imported from China
none being found in this country

The Springs affect the weather
during the cold season it is
always milder during the
Spring tides - Quinine is it not
also more moist - resolve
to attend regularly to the Hyg.

Friday 17 Jan^y - 1794

+ with M. F. —

+ The American Govt. at present cannot be said to be the effect of a revolution — The same Govt. prevails at present that did before — only the name of the Congress is substituted for that of the King —

The house of Assembly &c are all the same as before

- An invasion of Great Br is talked of - This attempt from France could probably be of service to Britain -
- The Difficult position in Ireland has made use of the Roman Catholics for their purpose to distress Gov. - but they are now got to a dangerous head -
- Robert not relying now unduly on the people of Ireland -
- + The Indians carry home Salt fish as ballast, however it is supposed that refusing Salt fish here would not be of much advantage -

- A man who attended Mr. S. is that, possibly B. earned for 2 years only £10 or at 1/2 the work - He maintained a wife and 6 Children on that sum -
- + If you go into a Hindoo house while the family is at dinner, not only the victuals but the very dishes are thrown away -
- Tanning admits of great improvements - The time may be shortened
- It would be an object to tanneries to get the bark stripped off the wood by machinery for fire wood - wood burns better without the bark

- A Ryot will carry his plough
 on one shoulder, with a harrow
 and other implements on the other
 - The corn of this country is all
 carried home on the head - no
 harkies being used - guess
 what is the usual mode of sepa-
 rating the grain from the straw
 - by ear - threshing or otherwise -
 + guess what is the price of some
 labour - a plough &c.

with M. F.

Even: at M. Foreman's -

- M. S. - still insists that the
lightning does less harm in
Kongat than in America. Nations
not afraid of it - I've never observed
how in America shattered
with light? - The thunder the
light seldom strikes the ground

in India - So this - reflects that
the quantity of wood has greater
chance of finding a tree struck
for less - accidents happen in
and about Calcutta -

- Nations calculate very accu-
rately but much slower than
European - Keep accounts it
is said, in a way similar to
the Italian mode

- Lightning - little - for the
first time since the commence-
ment of the cold weather -

- Artillery carried on here but
both by French and Germans
- The Gov for' audacious by
the Capt. Cornhill in the
Army in chief for London it is
reported sets out for Lucknow in
a few days -

+ Secret officer who had been permitted to go to Europe on Furlough on order to join his Corps instantly -

- Dreadfull accounts may be expected from St. Domingo -

- It is reported that the company has refused pay

of three quarters interest on their paper, and that the salaries are not to be paid for Jan^r as usual at the commencement of next month -

- If the interest on their paper be not paid the company's credit must be lowered in the publick opinion -

The visit to the Visier by the the Gov^r General is said to be occasioned by a backwardness in the former respecting certain money transactions -

His Highness is said to move slowly in certain pay stipulated payments -

With Dr. Dick -
 + Violent objections to the doctrine in relation to the Science of Life -
 - Same Stimuli applied to an accustomed and Diminution of excitement - this appears absurd to some medical men - also great objections to the Essay on contagion - The quantity of Mercury, Opium, and other Stimuli sufficient say they, to produce, almost instant

Death - many patients
were thus poisoned at
the Hospital -

- Mr. C. prevented from coming
out - (Divorce costs it is
said about 2000 £ in En-
gland - a low £. Mansa
and a Vicar's Mat.)

In the former case the par-
ties cannot marry - In the
latter they can - A Dubbing
is sufficient cause for the
latter, unless it can be
shown that there was
intention in one or both
parties
