Maritime Centre For Graduate Studies

GRADUATE FACULTY—The faculty of Graduate Studies offers teaching fellowships up to \$2,500 for students seeking a master's degree in the Arts and Sciences and Ph.D. candidates in Biological sciences, Chemistry, Oceanography and Physics. The new Sir James Dunn Science Building and the greatly extended facilities of the Chemistry building offer excellent opportunity for advanced research.

OCEANOGRAPHY—A most promising field of study, with great possibilities. The construction of the Bedford Institute of Oceanography, affiliated with Dalhousie, makes Halifax one of the world's major oceanographic centres. Fisheries research, Hydrographic and Meteorological services in Halifax, work together with the Bedford Institute and Dalhousie. This offers unique opportunities for post-graduate work at Dalhousie.

MEDICINE—90% of the medical students from the Atlantic Provinces are registered in the Faculty of Medicine. Here some 200 staff members teach fewer than 300 medical students. The widely recognized research projects (electron microscopy, cancer, hereditary diseases, etc.) are supported by a budget much in excess of a quarter of a million dollars annually. Financial support for students is available.

DENTISTRY—Dalhousie has the only Faculty of Dentistry in the Atlantic Provinces and gives preference to students from this region. The general shortage of dental personnel is most acute in the Atlantic Provinces. The faculty's new building was completed in 1958. Dentistry provides opportunity of a professional career for many more women than have sought admission in the past. A two-year diploma course in dental hygiene is also offered.
