# Introduction.

KING'S COLLEGE owes its origin to the Loyalists. It was founded by an Act of the Legislature in the Province of Nova Scotia in the year 1789, through the exertions of Dr. Charles Inglis, the first colonial Bishop, and was opened in 1790. The corner-stone of the main College building was laid the next year by Governor Parr.

The main College building, a substantial structure of wood and stone, has stood the storms of over a century and has housed, for a time, hundreds of the most eminent men of the Eastern Provinces. The new Science Wing faces northeast and overlooks the President's House. The Collegiate School, with its adjoining houses, occupies commodious grounds opposite the large campus, which affords the College ample room for both football and cricket. The Collegiate School, now in its 125th year, is fully equipped as a modern boarding school, and has just added a department in Manual Training.

The first President of the College was the Rev. William Cochran, a graduate of Trinity College, Dublin, who was formerly Professor of Classics at King's (now Columbia) College, New York.

A Royal Charter, conferring upon the College full University powers, was granted by King George III in 1802, which makes this the oldest colonial University in the British Empire.

The Board of Governors originally consisted of the Governor and Commander-in-Chief of the Province, the Lieut.-Governor, the Bishop, the Chief Justice, the Provincial Secretary and four other members of the Government. This Board was abolished and a new Board formed by an Act of 1853, of which the Bishop was the only ex-officio member, the others

being elected by the Alumni. In 1895 the constitution of the Board was again altered, and it now consists of thirty-seven members: the Bishops of Nova Scotia and Fredericton, exofficio, two elected by each Synod, one by each rural deanery in the two dioceses, three from Prince Edward Island, and twelve by the Alumni, as before.

The residential system, which is an important feature of College life, is modelled on that of English Colleges, and brings together men of different temperament and training, broadening their ideas and smoothing down individual peculiarities as nothing else can do.

In the College Chapel, a beautiful stone building erected in 1877, the regular services of the Church, which all students are expected to attend, are held every morning and evening. While King's is essentially a Church College, it imposes no religious tests and gladly welcomes men and women of all denominations to its various classes. Students belonging to other religious bodies desiring to attend their own services on Sundays may do so with the permission of the President.

The College building is heated with hot water, and in addition to this students may have fires in their rooms. The old-fashioned roomy studies are shared by two (and in some cases three) men, but each has his own separate bedroom.

The new Science Wing, built in 1912, makes ample provision for lecture rooms and up-to-date, well stocked chemical and physical laboratories, and, in addition, provides accommodation for 20 men in residence, so that a man may have a single room to himself, or two men may share a common sitting room, while each has his own sleeping room.

The Haliburton Room in Middle Bay serves as a common room for the students, while No. 2 President's Bay, is set apart as the Reading Room.

King's College was the pioneer of scientific training in the Province, and has a well equipped chemical laboratory and a valuable collection of philosophical instruments.

A handsome stone building which stands on the slope of the hill to the south of the College contains the Library and Convocation Hall. The Library is a large and extremely valuable one. The foundation of the Library was largely the work of John Inglis, afterward third Bishop of Nova Scotia, who was sent to England by the Governors in 1799 to collect books and subscriptions for that purpose. Many rare editions and bibliographical treasures are to be found here, such as the Boydell Shakespeare, the Marquis of Buckingham's Homer, Sowerby's Botany, an editio princeps of Paradise Lost, the publications of the Record Commission, eighteen volumes from the celebrated Aldine press, and twenty Elzevirs, Bryan Walton's Polyglott, and many others. The most important benefactions of recent years have been those of the late Dr. T. B. Akins, Rev. Dr. McCawley, for many years President of the College, Rev. G. W. Hodgson, Rev. Rupert Cochrane and Rev. E. Ansell. There is unfortunately no Library fund and the keeping up of the Library depends almost entirely upon the fees of the students.

The aggregate outlay necessary for a student taking a College course varies of course accordingly to the tastes and economy of the student, but it may be approximately set down at about \$250 a year.

Matriculation examinations are held in June and also during the first week of the Academical year. Arrangements may be made for holding these examinations elsewhere than at the College.

Students are prepared for Matriculation at the Collegiate School of King's College; at "Edgehill," the Church School for Girls; at Rothesay Collegiate School for Boys; and at St. Peter's School, Charlottetown.

A School of Law in connection with King's College was established in St. John, N. B., in 1892. Students passing the final examination of this School receive the degree of B. C. L. from King's College, and are admitted attorneys in

the Province of New Brunswick without further examination.

Affiliation With Other Colleges and Universities.

Students who have taken the prescribed Science course and passed the required examinations are admitted to the third year of the course of the PROVINCIAL TECHNICAL COLLEGE at Halifax, and such students, upon presentation of a *Testamur* of having passed the final examination of the Technical College may be admitted to the degree of B. Sc.

Graduates in Arts who have attended lectures during their College course in Constitutional History, Contracts, Torts and Crimes, and having passed the required examinations in those subjects, are admitted to second year standing in the LAW SCHOOL OF DALHOUSIE COLLEGE and can graduate in two years from their entry into the Law School. The Board of Governors has approved of a scheme whereby students from the JAMAICA CHURCH THEOLOGICAL COLLEGE, after a residence of six terms at their own college and passing the required examinations in the subjects of the Divinity Course at King's College, may receive the diploma of L. S. T.; and further that divinity students who have completed the required residence at the Jamaica Church Theological College and have passed the necessary examinations according to the requirements of King's College, may be admitted to the degree of B. A.

King's College is affiliated with the UNIVERSITIES OF OXFORD, CAMBRIDGE AND DUBLIN, under conditions which allow an undergraduate who has taken at least two years' work, to pursue his studies and take his degree at either of those Universities on a reduced period of residence. Under the terms of affiliation with Oxford, candidates for the Rhodes Scholarship, who have taken the Arts Course at King's College, including Greek, are exempt from the qualifying examination.

The Rhodes Scholarship will be open to students from King's College in 1916.

# Students.

Persons who are less than 16 years of age are not admitted as students of the College, except under special circumstances. "Undergraduates" are those who have duly matriculated. "Conditioned Students" are those who are pursuing the same course without having passed the whole of their matriculation examination; if they successfully pass at the end of the first year the examination in the work of the year, they may count their terms from the time they actually came into residence, providing they take, as subjects for their first year, all subjects required in Matriculation.

A registration Fee of \$2.00 will be charged to all students who enter without passing the Matriculation Examination.

Women are admitted on the same terms as men.

Undergraduates who have taken a partial course at any other University recognized by the Board of Governors, may, upon presenting certificates of standing, be admitted ad eun-

dem statum and complete their course at King's College, provided the certificates show at least as much work done as called for by equivalent examination at this University.

Students who have taken a partial course at King's College, or some other recognized college, may complete their course and obtain the degree of B. A., under the following conditions:

- 1. They must have had at least two years of college residence, and have taken successfully during that time some regular course of study.
- 2. They must reside a sufficient time to make up four years of residence.
- 3. They must satisfy the College Board that they have done work equivalent to that prescribed for the first two years in Arts.
- 4. They must pass the required examinations, at the times appointed, in the subjects selected for the third and fourth years in Arts.
- 5. Those availing themselves of the above privileges must take their examination at Windsor and will be charged a fee of \$15 for each examination taken.

# Matriculation.

The President of the College must receive from each candidate for Matriculation before the day of Examination, a certificate of good moral conduct extending over a period of not less than eighteen months immediately preceding. In the case of candidates from a boarding-school, a certificate from the-Principal will suffice; but those candidates who have attended a day school must, in addition, produce a certificate from the minister of the church they have attended.

The Faculty of the College are authorized to accept certificates from the Head Masters of approved schools in lieu of Matriculation.

The Junior Leaving Examination (Grade XI) of the High Schools of Nova Scotia or an equivalent examination of another province is accepted *pro tanto* as equivalent to the Matriculation Examination. # SENIOR MATRICULATION.

(Admitting to Second Year.)

Subjects: I. Latin. II. Mathematics A. III. English including History. IV. Chemistry. V. French or Greek or German. VI. Mathematics B, or a language not taken in V.

The requirements in each of the above subjects will be the same as required in the first year of the Arts Course.

Any person holding the Grade "A" Nova Scotia Provincial Certificate, (or an equivalent from another province) covering the subjects required, is also admitted to the second year.

It is therefore possible for a student (who is sufficiently advanced at entrance) to obtain his B. A. Degree after three years' residence at the College.

The Junior leaving examination (Grade XI) of the High Schools of Nova Scotia (and equivalent examinations in other provinces) is accepted as equivalent to Matriculation Examination, in such subjects as are covered thereby and provided that the mark made in each subject be not less than 50.

For Matriculation in Science combined with first year's work see pages 41, 42, 43.

# Terms and Examinations.

The Academical year begins in September, and contains two terms. Michælmas Term extends from the first Wednesday after Sept. 21st, to December 22nd: Lent Term from the first Wednesday after 2nd day of January to the second Thursday in May.

Lectures are not given on the following days: Thanksgiving Day, Ash Wednesday, Thursday to Saturday in Holy Week, Easter Monday.

Students are required to pass the terminal examinations in regular order. No student who has failed to pass a terminal examination shall be allowed to present himself for examination in the subjects of any subsequent term until he shall have passed a supplementary examination in the subjects in which he has previously failed. The College Board will in their discretion require a student, who, from whatever cause, shall fail to keep up with the work of his year, to "degrade," i. e. to go into a lower year, in which case, such student shall lose the seniority of the year from which he degrades. Students shall rank according to the number of terms they have kept.

University and College examinations shall be arranged by the College Board subject to the approval of the Governors.

At least a week before the beginning of any Supplementary Examination students intending to write at such examination shall send the President in writing the name of each subject to be taken, accompanied by the customary fee.

The University examinations shall be conducted under the immediate supervision of the President, who shall convene

meetings of the examiners for the purpose of arranging and determining all matters relative to the examinations.

No examiner shall make known to any candidate his or her marks, in any subject, until after the official publication by the Secretary.

No candidate shall be allowed to leave the place of examination till half an hour after the distribution of the papers, nor shall any candidate be permitted to enter and write after this half-hour has elapsed.

No undergraduate shall be allowed to keep a term unless he has paid all his College dues and complied with all other regulations.

The standing of undergraduates is determined by the yearly examinations.

A College Examination of each year shall be held at the end of the Michælmas term, in all the subjects of Lectures of the Term, and all students shall be required to present themselves at the examination unless excused therefrom by the President on account of illness or for other reasonable cause.

Students who fail at the above examination may present themselves for re-examination in those subjects in which they have failed at a Supplementary Examination to be held in Holy Week.

The examinations at the end of Lent Term of the Third and Fourth years will cover the work of the whole year.

For particulars concerning affiliation with Oxford and with other Universities, see page 8.

# Discipline.

All students are required to report to the President on the first Monday of Michælmas Term, and on the first day of Lent Term.

The resident students are under the immediate charge of the President (or, in his absence, the Vice-President).

All students in residence are expected to attend the services in the College Chapel. Students who are not members of the Church of England may attend the Sunday Services of their own Church with the President's permission.

Attendance at all Lectures in the course entered upon except those which are announced as optional, is compulsory upon all students, and no student is allowed to absent himself from the examinations in any subject in which he has taken Lectures, except by special permission of the Professor.

Students who have absented themselves from any Lectures without permission of the individual Professor and without proper excuse, will be reported to the weekly meeting of the Board of Discipline.

More than two unexcused absences from Lectures in the same subject or forfeiture of Lectures from disorderly conduct, will disqualify a student from examination and from keeping his term. Periods of practical work in Science will count as Lectures.

Students residing in the College are not to be out of it after 10 p. m., without the permission of the President (or in his absence, the Vice-President) and permission to be out after midnight must be obtained from the College Board. The College authorities may enter the apartments of undergraduates at all hours of the day or night.

No visitor is allowed to remain in College after 10 p. m., unless by permission.

All noise is forbidden in College during Lecture hours.

The President is authorized to impose fines for infraction of regulations, insubordination or disorderly conduct; matters of a more serious nature are referred to the Board of Discipline, which meets once a week, or oftener if required.

The Board of Discipline may deprive any Student of his Term for negligence of due preparation for Lectures.

In case of sickness a medical certificate must be produced, if required by the Board.

The introduction of intoxicating liquors into the College or their use therein is absolutely prohibited.

Students are forbidden by the Statutes to resort to any inn, tavern or public house, except for special cause approved by the President.

Graduates below the degree of Master, residing in College or attending lectures at the College, shall be subject to the same discipline as undergraduate students, but may be granted special privileges at the discretion of the College Board.

No student may reside in College during vacation without the written permission of the President, and the President and Board of Discipline shall have the same authority and power over such students as are exercised by him or them according to the provisions of the preceding sections.

The Academical habits shall be the same as those which are worn in the University of Oxford.

In accordance with this regulation:-

- (a) Bachelors wear a gown with open sleeves ending in a point below the knee.
- (b) Scholars wear a similar gown, but with short rounded sleeves.
- (c) Undergraduates other than Scholars wear a gown without sleeves.

- 5. Geology or
- 6. Applied Mechanics.

The subject chosen No. I. must be continued throughout the 4 year course.

It has been thought advisable by the Board of Governors of King's College to extend to all Science Students the fullest privileges in connection with their chosen work, for two reasons:—Ist, because a University must be broad in sympathy, liberal in view, and helpful to all those desiring an education; and, because the course of instruction provided by the Professors and Lecturers of the various Faculties should not only be cultural in tone, but also to a large extent utilitarian in effect.

The Provinces whose sons and daughters are attracted to King's College are rich in vast and abundant natural resources. These only wait the touch of the trained hand and the educated

mind to yield their wealth for the material prosperity of the people as a whole.

The development of the material wealth of the Dominion of Canada is a reliable barometer indicating the remarkable growth of the study and investigation of Science in our Universities. Years ago it was felt that a great injustice would be done to our young men if we did not make ample provision for such research as would enable them to have a thorough training in Science, and as a result of this feeling King's College became the pioneer of Scientific training in Nova Scotia. Up to the present a preliminary course of two years has been thought sufficient, but, as competition becomes more keen on account of the large numbers from outside our own country attracted here by our natural wealth, it has been found necessary to raise the standard; this raising of the standard makes the extension of the course to three years imperative if the preliminary work is to be thoroughly mastered. We purpose adding to this three year course such special features in a fourth year as will enable the student to take his B. A. degree from this University. While no student in Science will be asked to select the suggested four year course, yet the Faculty strongly recommends it as an excellent basis for further scientific research. When a student has completed the three year course in Science at King's College he may proceed to the Provincial Technical College in Halifax, and fully complete his Scientific course in two years. This will entitle him to his degree of B. Sc. in either Civil, Mechanical, Electrical or Mining Engineering from that institution or King's College.

Students may enter the School of Science at King's College by either Junior Matriculation, admitting to the first year or by Senior Matriculation to the second year.

# JUNIOR MATRICULATION.

Subjects:—I. Mathematics. II. English. III. Latin or German. IV. Greek or French.

See particulars for Arts Matriculation.

Those who do not intend to proceed to an Arts degree, and

have not matriculated in two languages, must add the course in German, as outlined for first and second year Arts.

Matriculated students who have completed the three years' course, as outlined below, to the satisfaction of the Faculty, will be granted certificates, which entitle them to enter the third year of the Provincial Technical College at Halifax.

It is possible for well-prepared students to compass the work required for admission to the third year of the Technical College in two years. Matriculation to such a course has been agreed upon by some of the affiliated institutions to be of the following standard:

I. Arithmetic and Algebra:

Arithmetic.

# Societies Connected with the College.

The Alumni of King's College.

Under the regime of the old political Board of Governors no share in the management of the College was given to graduates and others who were deeply interested in its welfare. With a view to altering this state of affairs legislation was sought and obtained by certain members of the University for the incorporation of a body to be known as "The Alumni of King's College, Windsor." The Act was passed in 1847, and the society soon made its influence felt. Its expressed object was "The promotion of Education in the said College, and the Collegiate School at Windsor, connected therewith." The first President of the society was the Rev. John T. Twining, D. D. The Hon. H. H. Cogswell was Vice President, and S. L. Shannon, Esq., Secretary and Treasurer. Six years later the original Act of 1780 was repealed and a new Board of Governors constituted, consisting of certain life members, (of whom the last survivor was the late Mr. Justice L. M. Wilkins) and eight members elected by the Alumni.

It was through the Alumni that the Chair of Natural Science was endowed, and a liberal amount was also granted annually towards the salary of the Professor of Modern Languages. Another important work of the society was the building of the Library and Convocation Hall.

While those whose names appear in the Act were all members, and most of them graduates of the University, the terms of membership were very liberal, and "all persons paying an annual subscription of Twenty Shillings or upwards, or making at one time a donation of Twenty Pounds, or upwards" were eligible for election. The amount of the annual subscription was fixed by by-law in 1882 at two dollars.

The annual meeting of the Society is held the day before Encenia.

The Alexandra Society of King's College, which has branches 'all over the Maritime Provinces, was formed in Halifax in 1902 as the Women's Auxiliary to the Alumni, its object to aid the Alumni in raising funds for the College.

In the following June the society was organized in Windsor, the Halifax society joining it, and a promise was given to place the sum of \$1,000 a year at the disposal of the Governors towards the payment of the salary of a new professorship in Divinity. Rev. S. W. Jones, being at the time agent of the Alumni, was asked by the W. A. to form branches of their society in the various parishes he visited. In most instances he only held meetings for women and took a collection, in others he asked for a five year pledge.

In 1910 the name was changed from Women's Auxiliary to Alexandra Society of King's College. It has already succeeded in founding the Alexandra professorship, has helped in furnishing the College rooms and in other ways. Its work in diffusing a broader interest in the College is becoming more and more important.

The present buildings are situated on the beautiful College campus. They are all, including the Gymnasium, provided with electric light and hot water heating.

The School provides a good general education, and pupils are prepared for matriculation at King's and other Universities, for the entrance examination Royal Military College, Kingston, Ont., for Army and Navy, and for commercial pursuits.

Pupils who are members of the Church of England attend the Sunday Services in the College Chapel. Careful attention is given to moral training and religious instruction.
