done around

Dear Sir,

Having mislaid the syllabus
you were kind enough to send me of
your Course of lectures I beg the
favor of another Copy - and if you
can conveniently take the trouble
of noting on it the names of any
short treatises on the different
Subjects, which you would recommend
to be read for the better understand-
ing of your present Course, I
shall be very much obliged to you.
An opportunity like the present
of acquiring information on subjects
of natural & experimental Philosophy
is so very uncommon in this Country,
that I wish to avail myself of it
to the utmost, as far as leisure
from public business will admit.
and therefore, altho' I have but

my work for the Evening lecture,
in case you should continue to
read the same lecture Morning
and evening, I will, with your
permission, occasionally attend
at both, where I may find it
necessary for my fuller information
& instruction - It might be
offensive to you to offer very
additional pecuniary compensation
for this privilege - or I should be
happy in availing myself of
this means of obtaining it -

I am &c &c,

Yrs

J. Harington

J. H. Hamlyn

J. Pinnardie

Dear Sir

Be kind enough
to inform me if you
wish to part with
any of your Telescopes.
If not I will, with
your permission, send
one of which I
have the refusal,
and by the favor
of your opinion of it.

I regret that
I entirely forgot
the lecture last night.

Y^{rs} J. H. Hamlyn

J. Blackington
Sawt

Dear Sir

Tuesday

Dear Sir,

I have received the
P. Machine & of the
to my happy to have a
Dye bottle of the
acid - for which I believe
the plan was to send the
bottle of cork - in the
course of the day.

Yours
J. H. Kaurigles

F. Blenny has promised to
dine with me on Tuesday the
7th of July & I shall be happy
if you will meet him. I hope
the 7th of July to be a day if you
do not wish to meet the
bottle.
