To the Medical Practitioners  
Province of Nova Scotia

Gentlemen:

We, your executive, take this opportunity of wishing each and everyone of you a Merry Christmas and a Happy and Successful New Year.

The immediate job of looking after the Welfare of the medical profession in Canada falls on the shoulders of the Canadian Medical Association and its branches in the different provinces. The force with which it can present and demand what is for the good of the citizens and the members of the organization all depends on its numerical strength.

In Nova Scotia your society only represents about 65% of the doctors and the fees from these are not sufficient to carry on the necessary and desired work, so we are making a drive to have the Nova Scotia Branch 100% strong. Kindly join the organization for 1942 and do not ask the other fellow to pay your share as well as his own.

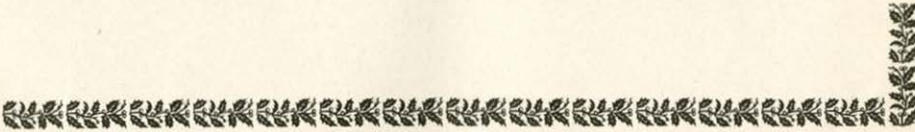

The 1942 annual meeting is in Cape Breton and I take this opportunity of inviting you to come and see us.

Knowing you all realize your responsibility to yourself and to the future of your profession, and to the Medical Society of Nova Scotia we hope for a prompt 100% response.

Yours faithfully

J. G. B. LYNCH, M.D.

President, The Medical Society of Nova Scotia

## TO THE MEDICAL SOCIETY OF NOVA SCOTIA

**T**O issue an index as almost the whole of a regular number may seem somewhat unusual. The Editors are doing so for two reasons: firstly, because they are of the opinion that every member is entitled to this accumulative index: secondly, because its printing and distribution as a distinct undertaking would place too great a strain on our financial resources. We feel sure that as you leaf over this number that you will not find it uninteresting and hope that it will act as a stimulus to contribute oftener and better ever keeping in mind that our "BULLETIN" should reflect the daily doings of our membership. We realize how hard all are worked at this greivous time, but are proud that Nova Scotia doctors lead the Dominion in having the highest percentage in the Armed Forces.

A great deal of interesting and valuable material has been buried with little prospect of ever again seeing the light of day, all of which now becomes readily accessible through this index; not only medical and scientific articles but what is more difficult to obtain, viz. biographical data, historical papers, letters and reminiscences, along with some case reports of rare interest.

We wish to thank Mrs. Dorothy L. Cooke for undertaking and bringing to completon this exacting and wearisome task and Mrs. Margaret Cornell, our librarian at the Medical and Dental Library for acting in a consulting capacity.

It is our intention that hence forth a yearly index properly compiled in accordance with the accepted standards of organized libraries and well established periodicals will be published each December.
