Editorial.

As the GAZETTE has remarked before, with the College year 1902-03 began a new period of Dalhousie's history. This session College made her first definite attempt to meet the changed conditions of the Maritime Provinces and their imperative demands for technical education—an attempt which took shape in the School of Mines. Because of this venture the issues of the year just closed have been awaited with anxiety by friends of the College.

Results thus far have been very encouraging. The call for increased endowment has met with liberal response, a gratifying number of students have attended the new school, and good work has been accomplished. Of course much still remains to be done. The endowments must be much larger, there must be far more equipment and space before Dalhousie can do work worthy herself. But as a beginning the new movement is a distinct success.

From the student's standpoint, the year is notable because of the harmonious conduct of affairs about College. There has been little or no friction between the students and the govern-

ing bodies, or among the students themselves. Close packing seems to have brought greater orderliness.

The Alumni Associations have had an unusually successful winter. In addition to their usual grants to the scientific department and the library, they have done good work for the Macdonald Memorial. The GAZETTE, too, gratefully acknowledges valuable financial aid and the appointment of an Alumni editor. Their final triumph was the Dalhousie Re-union and At Home, Convocation night. The work of the Alumni deserves wider recognition among Dalhousians. Their claims should be especially considered by the new graduates.

The death, recently, in London, of Mr. Quintin Hogg has turned the attention of the English-speaking world to the remarkable work which he accomplished among the lower classes in London, among the boys of the street. When a very young man he felt compelled to help them. For a time he lived their life, blacked boots, held horses, slept with the boys under the arches or on barges, finally gaining their confidence. At night under the arches he taught them to read, and so began a forty years' service of those boys, his work all the time growing, until now it has become a great Polytechnic School, attended by more than fifteen thousand boys and young men. It is altogether impossible to estimate the result of Quintin Hogg's work. London is better, the Empire has many finer citizens because he lived. *The Spectator* applies to him Matthew Arnold's tribute to the great master of Rugby.

Thou would'st not *alone*
 Be saved. . . . *alone*
 Conquer and come to thy goal,
 Leaving the rest in the wild. . . .
 Still thou turnedst, and still
 Beckonedst the trembler, and still
 Gavest the weary thy hand. . . .
 And through thee I believe
 In the noble and great who are gone, . . .
 . . . Souls temper'd with fire,
 Fervent, heroic, and good.
 Helpers and friends of mankind.

It is when we think on such a life that we are led to the consideration of our own duty to our own land and people. When we are told that Mr. Hogg was no genius, was not a man of intellectual grasp, and was a man of business in the City, every day engaged in a profitable occupation, we must conclude that none of us is too busy to leave his country better than he found it.

Whatever a man's vocation, his avocation, if we may put it so, should be good citizenship, patriotism.

Above all to us who are college-trained does the call come to make returns for our reaping where other men have sowed. As we have had much given to us, of us *shall be* much required. And in unselfish serving outside of our regular life-work will be the safety of our best institutions. There can be no problem of political morality, no anxious care for the future of our Canada if our college men all give their country the gift of a life like that of Mr. Hogg. "To contemplate it is impossible," says the *Spectator*, "without the conviction that in the multiplication of such lives, would be found the solution of almost all the problems which most grievously oppress us." How fine if we could re-echo this of all our graduates:—

Souls temper'd with fire,
 Fervent, heroic and good,
 Helpers and friends of mankind.

The graduate has a debt to pay his college as well as his country. Surely no one has to remind him of what he owes Alma Mater in fair memories, lasting friendships, and training for work. But her great gift he sometimes forgets: if he has eyes to see it at all, he has gained from her what Matthew Arnold calls "Clear prospect o'er our being's whole." In the light she gives, the world of outwardness that, which appears, things temporal have been lost for him in the world within, that which is, things eternal. He must indeed leave her hill-top for the "mist-filled hollows" of the world of work, to live among things outward and temporal. But there may go with him, if he will, a gleam of the daylight of Truth which his new-opened eyes beheld at College.

*The Graduate
 for his College.*

What can Dalhousians do to pay their debt? The answer is given by examples already set. The Macdonald Library will be more than a monument to a great professor; it will be a lasting proof of what affectionate interest can do in spite of poverty. May it be only the beginning of greater works.

And now finis must be written to THE DALHOUSIE GAZETTE, Volume xxxv. For some of the staff it is finis to years at College, perchance the best and brightest of life. To *Vale*. dear old Dalhousie we must bid farewell. Our memories of her are blessed; we shall draw upon them as a tonic throughout the future—

'As a man calls for wine before he fights.'

To the friends who have helped us we again return thanks and ask continued aid for our successors. To GAZETTE readers every one, our word is *Ave atque vale*.

"The Best Ghost Story in the World."

The superlative is George Borrow's, and the story is Lope de Vega's. It is one that the famous Spanish author tells of his hero Panfilo in his novel, "The Pilgrim in his own land." And this that follows is the story.

At the first sign of approaching day, Panfilo the Pilgrim took his departure from Saragoza. Full of fear lest the brothers of Godofri and Flerida might pursue and take him, he avoided the royal road, and sought instead the unfrequented mountain paths whereon was only to be seen an occasional shepherd. Soon tiring, however, of the rough roads and coarse mountain fare, he approached one night a town on the border of the two kingdoms and asked for a lodging. But such was his uncouth condition, with his feet running blood, and his face sunburned and his hair dishevelled, that no one was found willing to admit him, and so he betook himself to that last retreat of misery, the Hospital.

Panfilo found it open, but unlighted, and on enquiring the reason, he was told that several nights before a stranger had died there; and that every night since the place had been in awful tumult. And so the inmates had fled. But if he would, he might go in and talk with a holy man who dwelt in one of the chapels without fear of the tumult that had disturbed so many others; and this holy man would tell him where he might sleep in safety.

Panfilo entered the dark portal, and feeling his way with a stick he had picked up, made for a light which he saw in the distance, calling to the holy man whose light it was, as he prayed in his chapel.

"What do you want with me, O evil spirit!" answered a voice.

"I am no evil spirit," replied Panfilo, "but a Pilgrim seeking lodging for a night. Open to me, O friend!"

Then the door opened, and disclosed a man of middle age and stature. His hair was long and his beard bushy and matted, and he was clad in a long serge gown.

The chapel of the holy man was small. At the foot of the altar he made his bed, with a stone for a pillow, his staff for a companion and for his looking glass, a skull,—which best of all shews the deficiencies and transitoriness of the earthly life of man.

"How hast thou dared to enter this evil house? Has no one warned you ere you came?"

"O yes," answered Panfilo, "I have heard all about it; but I have undergone so many troubles, imprisonments and evil entertainments that nothing now can affright my mind."

Then the holy man lighted a taper from a lamp that burned before the images, and without even asking Panfilo his name, bade him follow. Panfilo followed him out into a densely grown garden, and up to a building set amidst some cypresses. This they entered, and the holy man, unlocking the door of a spacious apartment, said "Enter; and as you have no fear and are accustomed to danger, make the sign of the cross, and sleep without taking heed of anything."

Panfilo took the light, and placing it upon a stand, bade the man good night and shut the door.

There was a bed in the room which looked very inviting to a man who for so many nights had slept on the ground. So undressing himself and putting on one of the shirts which Flerida had given him when they parted, he lay down upon the bed. And almost immediately that image of Death which we call Sleep came over his senses with the power which it is accustomed to exercise over wearied travellers.

But at midnight our pilgrim was startled into wakefulness by the tramping of many horses. It seemed to him that he was on a journey, for the bed was in motion, as though it were a ship or a horse. But remembering that he was in that Hospital, and recalling the gruesome reason for its having ceased to be inhabited, he opened his eyes and saw several men enter the apartment on horseback. In their hands they bore flambeaux, which they lit from the taper he had left on the stand, and then flung to the ceiling of the apartment, where they stuck and remained burning; the bottom sticking to the ceiling of the chamber, and the head emitting flames upon the bed and the place where he had laid his clothes.

The unfortunate Panfilo covered himself up as well as he could, leaving a little peep hole for his eyes in order that he might see if it would be necessary to take any measures to prevent a conflagration.

But in a moment he saw the flames extinguished, and then the four men sat down in a corner of the chamber to a game of cards.

They shuffled the cards, passed them, put down and took up money, until at last a dispute arose and a battle ensued in the chamber, with such a clashing of swords and crashing of bucklers that the luckless Panfilo began to call out to the Virgin of Guadalupe, the only one which he had not visited in Spain, because that Guadalupe was so near to his home, and the near things are so often the things we never see at all. And at his call the noise ceased in the chamber, and for the space of half an hour all was still as the grave.

And all the while Panfilo was in a burning sweat, as though his body were immersed in a pool of hot water.

But just when he was beginning to congratulate himself that now all was over, and they would return no more, he felt something was seizing the bed-clothes and stealthily pulling them off, as if to expose him, defenceless, to the attack of his mysterious visitors. And then he saw a man enter with a torch, and after him two others, one with a great bason of metal and the other sharpening a knife. The hairs of his head stood up, and he felt as though each was being individually plucked out.

He tried to speak, but could not; and as they drew near to him the man with the light blew it out. And our poor Panfilo, thinking the bason was for his blood and the knife for his throat, began to defend himself by holding his hands out to ward off the knife.

And then he found his voice as the torch began again to burn, and he saw two great dogs lay hold of one another. "O Jesu!" he cried in an agony of terror, and at the word they disappeared, and the light going out again, he felt the bed-clothes being put on him as before, and unseen hands lifting him up by the head, provided him with better pillows, and smoothed with great care the sheet and the counterpane.

So he had rest for a time, during which he recited certain verses of David which gave him great comfort. And he began to cherish the hope that as they had now made his bed, they would let him lie in it in peace.

But suddenly he felt that his tormentors were under the bed, and were lifting it up with his person upon it until it was close to the ceiling. He began to fear lest he should fall, and then a hand was thrust from the very boards, which seized him by the arm. The bed fell with a terrible crash, and there he remained hanging in the air. And it now seemed to him that around the apartment a great number of windows had opened, and from them many men and women were looking at him, convulsed with laughter because of his peculiar predicament.

Then the bed caught fire and the flames mounting up laid hold upon him, burning his clothes and his flesh.

The fire died down, and then he felt a tugging at his thighs and shoulders, and lo! his arms and legs were gone, and he was laid upon the bed again.

For an hour these vain illusions ceased and then it seemed to him that his poor travelling bags were seized upon and dragged through the apartment. They contained certain pledges and papers of Nisa, and the jewels of Florida.

And now our brave Panfilo started up to defend them, his courage which had failed him in the defence of his person now asserting itself for the protection of his property.

He followed the thieves out into the garden, and saw them approach a well among the cypress trees. Into this they flung the booty and themselves after it. Panfilo could not follow

them that far. He returned by the path through the garden to the chapel of the holy man and called at his window.

The good man opened his door, and seeing Panfilo's pallor and nakedness, said, "Your hosts have given you evil entertainment."

"So evil," answered Panfilo, "that I have hardly slept a wink, and have left them my habiliments for my night's lodging."

The good man then welcomed him to a share of his own apartment for the rest of the night, and discoursing about what had happened to others they awaited the morning.

When day dawned, Panfilo with the holy man went through the garden to the apartment where he had slept the last night, and where he had seen so many horrible things. They found the bed and other furniture of the room without any injury whatsoever, and the clothes of Panfilo in the place where he had left them.

He dressed himself as quickly as he could, and ashamed in the presence of the good man as one convicted of being either coward or liar, he hurriedly embraced him, and took the road for Guadalupe, without daring to turn his head to that village to which he vowed never to return in his life on any account whatever, save and except to meet with his beloved Nisa.

B.

Shelley's "Cenci."

To understand in the fullest sense a poem, a piece of music or a work of art, some insight into the peculiar bias of the master's mind is necessary.

Even the casual student of Shelley cannot fail to notice that his was not a mind or a character of the normal type. In actual life he constantly misrepresented and distorted what he saw. "It was not in external but in internal experiences—that life of his own soul which he so intensely lived,—that Shelley found the material for his best work."

The constant friction between Shelley and his environment led him to condemn and eulogize extravagantly. From such a man we cannot expect poetry which will successfully represent the world as it is, which will bring before us the varied types of men and women so that they shall seem real to us, and so that we may involuntarily enter into their feelings. Con-

sequently, we find that most of Shelley's work treats of the abstract and visionary. There is, however, one apparent exception to Shelley's limitations as a portrayer of incident and character, and this exception we find in the drama "Cenci," which stands alone among his work, revealing the character of an unsuspected side of Shelley's genius.

The play is in its very conception Shakespearian. He takes an old play—facts that have been handed down—and remodels it. Then too, one cannot fail to notice the influence of Shakespeare's "Othello," "Macbeth" and "Measure for Measure."

For instance, compare the beginning of Act III, Sc. II in "Cenci" with Act V, Sc. II of "Othello"—where Othello enters the bed-chamber of Desdemona with the purpose of murder.

"Cenci"—My wife and children sleep:
They are now living in unmeaning dreams:
But I must wake, still doubting if that deed
Be just, which was most necessary. O,
Thou unreplenished lamp! Whose narrow fire
Is shaken by the wind, and on whose edge
Devouring darkness hovers! Thou small flame,
Which, as a dying pulse rises and falls,
Still flickerest up and down, how very soon,
Did I not feed thee, wouldst thou fail, and be
As thou hadst never been!

"Othello."—It is the cause, it is the cause, my soul,—
Let me not name it to you, you chaste stars!—
It is the cause.—Yet I'll not shed her blood;
Nor scar that whiter skin of hers than snow,
And smooth as monumental alabaster.
Yet she must die, else she'll betray more men.
Put out the light, and then put out the light:
If I quench thee, thou flaming minister,
I can again thy former light restore,
Should I repent me: but once put out the light,
Thou cunning'st pattern of excelling nature,
I know not where is that Promethean heat
That can thy light relume."

them that far. He returned by the path through the garden to the chapel of the holy man and called at his window.

The good man opened his door, and seeing Panfilo's pallor and nakedness, said, "Your hosts have given you evil entertainment."

"So evil," answered Panfilo, "that I have hardly slept a wink, and have left them my habiliments for my night's lodging."

The good man then welcomed him to a share of his own apartment for the rest of the night, and discoursing about what had happened to others they awaited the morning.

When day dawned, Panfilo with the holy man went through the garden to the apartment where he had slept the last night, and where he had seen so many horrible things. They found the bed and other furniture of the room without any injury whatsoever, and the clothes of Panfilo in the place where he had left them.

He dressed himself as quickly as he could, and ashamed in the presence of the good man as one convicted of being either coward or liar, he hurriedly embraced him, and took the road for Guadalupe, without daring to turn his head to that village to which he vowed never to return in his life on any account whatever, save and except to meet with his beloved Nisa.

B.

Shelley's "Cenci."

To understand in the fullest sense a poem, a piece of music or a work of art, some insight into the peculiar bias of the master's mind is necessary.

Even the casual student of Shelley cannot fail to notice that his was not a mind or a character of the normal type. In actual life he constantly misrepresented and distorted what he saw. "It was not in external but in internal experiences—that life of his own soul which he so intensely lived,—that Shelley found the material for his best work."

The constant friction between Shelley and his environment led him to condemn and eulogize extravagantly. From such a man we cannot expect poetry which will successfully represent the world as it is, which will bring before us the varied types of men and women so that they shall seem real to us, and so that we may involuntarily enter into their feelings. Con-

sequently, we find that most of Shelley's work treats of the abstract and visionary. There is, however, one apparent exception to Shelley's limitations as a portrayer of incident and character, and this exception we find in the drama "Cenci," which stands alone among his work, revealing the character of an unsuspected side of Shelley's genius.

The play is in its very conception Shakespearian. He takes an old play—facts that have been handed down—and remodels it. Then too, one cannot fail to notice the influence of Shakespeare's "Othello," "Macbeth" and "Measure for Measure."

For instance, compare the beginning of Act III, Sc. II in "Cenci" with Act V, Sc. II of "Othello"—where Othello enters the bed-chamber of Desdemona with the purpose of murder.

"Cenci"—My wife and children sleep:
They are now living in unmeaning dreams:
But I must wake, still doubting if that deed
Be just, which was most necessary. O,
Thou unreplenished lamp! Whose narrow fire
Is shaken by the wind, and on whose edge
Devouring darkness hovers! Thou small flame,
Which, as a dying pulse rises and falls,
Still flickerest up and down, how very soon,
Did I not feed thee, wouldst thou fail, and be
As thou hadst never been!

"Othello."—It is the cause, it is the cause, my soul,—
Let me not name it to you, you chaste stars!—
It is the cause.—Yet I'll not shed her blood;
Nor scar that whiter skin of hers than snow,
And smooth as monumental alabaster.
Yet she must die, else she'll betray more men.
Put out the light, and then put out the light:
If I quench thee, thou flaming minister,
I can again thy former light restore,
Should I repent me: but once put out the light,
Thou cunning'st pattern of excelling nature,
I know not where is that Promethean heat
That can thy light relume."

Further, we find the same horror of blood in the "Cenci" as in "Macbeth," and the effect of the sight of gray hairs on Olympio and Marcio, the murderers of the "Cenci," is similar to the effect produced upon Lady Macbeth at the sight of Duncan's gray hairs. Then, too, we find similarity of construction and expression in separate phrases and sentences.

For example, after the murder of "Cenci," Beatrice says:

"What is done wisely, is done well."

Compare this with Macbeth's words:

"If it were done, it were better it were done quickly."

Again, compare the speech of Beatrice in Act v., Sc. vi., when she realizes she is close to her own death, with the speech of Claudius in Act III., Sc. I, of "Measure for Measure."

Beatrice.—"Oh,

My God! Can it be possible I have
To die so suddenly? So young to go
Under the obscure, cold, rotting, wormy ground!
To be nailed down into a narrow place;
To see no more sweet sunshine; hear no more
Blithe voice of living thing; muse not again
Upon familiar thoughts, sad, yet thus lost—
How fearful! To be nothing! Or to be—
What? Oh, where am I? Let me not go mad!" etc.

Claudius.—"Ay, but to die, and go we know not where;
To lie in cold obstruction and to rot;
This sensible warm motion to become
A kneaded clod; and the delighted spirit
To battle in fiery floods, or to reside
In thrilling region of thick-ribbed ice;"

* * * * *

"'tis too horrible!

The weariest and most loathed worldly life
That age, ache, penury and imprisonment
Can lay on nature, is a paradise
To what we fear of death."

These few examples will perhaps suffice to show to what an extent Shelley was influenced by Shakespeare.

The greatness of the play lies in its two leading personages, and these are of a simplicity that approximates them to abstractions. "Cenci" is the incarnation of evil—Beatrice of suffering innocence.

The literary problem which faced Shelley was to justify the murder enough to maintain interest for Beatrice—to make her action appear plausible.

To do this, he does what we would expect him to do,—he blackens the character of "Cenci," and from the very beginning of the play insists on "Cenci's" own disregard of human life, and the utter depravity of the man's nature.

The opening words of the play, "That matter of the murder is hushed up," give us a glimpse into the man's character. As we read on we shudder and recoil at the fearfulness and abnormal ugliness of the character revealed to us. Take for example such passages as the following:

"I love

The sight of agony, and the sense of joy,
When this shall be another's and that mine.
And I have no remorse, and little fear,
Which are, I think, the checks of other men.
This mood has grown upon me, until now
Any design my captious fancy makes
The picture of its wish, and it forms none
But such as men like you would start to know,
Is as my natural food and rest debarred
Until it be accomplished.
Or again—I the rather
Look on such pangs as terror ill conceals:
The dry, fixed eyeball; the pale, quivering lip,
Which tell me that the spirit weeps within
Tears bitterer than the bloody sweat of Christ.
I rarely kill the body, which preserves,
Like a strong poison, the soul within my power,
Wherein I feed it with the breath of fear
For hourly pain."

Then, what could be more horribly sickening and diabolical than the Banquet scene, given as it were to celebrate the long-desired death of his sons; or, his habitual treatment of Beatrice, the degradation of whose will he was determined to bring about.

The utter disregard of human life, and the love of both physical and psychological cruelty for its own sake seem to us as it truly is, extravagant. We declare that such a character

is not real. It is not life that Shelley reveals to us by means of such a character, but some pitifully distorted image of his own mind. Indeed, it is now generally accepted that Shelley has blackened the character of the "Cenci" as preserved in the old traditions, for the purpose of eliciting our sympathies for Beatrice, who is the fundamental character in the play.

In Beatrice the two qualities of gentleness and strength are shown to be obviously compatible. A girl, gentle and amiable, yet of great courage, and possessing a keen, subtle intellect, driven by the implacable hatred of her father, whose conduct seemed to subject her to a perpetual contamination of body and mind, she plotted and brought about his death.

She never once, however, shows any kind of weak remorse. She believed that the confession of technical guilt on her part would mean the destruction of herself and family, and she feels what she did to be morally justifiable. There is no consciousness of evil or hypocrisy, and to the very end she maintains—

"I am not guilty—
What I did was right."

So intense is her belief in the rightness of her action, that Marcio, one of the murderers who had confessed his guilt, came to feel and understand her attitude towards the crime, and when she confronts him with the question:

"Am I, or am I not,
A parricide."
He answers, "Thou art not."

And again, he says:

"Torture me as ye will;
A keener pang has wrung a higher truth
From my last breath. She is most innocent."

Shelley's own view of the action of Beatrice is summed up in the following paragraph:

"Undoubtedly no person can be truly dishonored by the act of another; and the fit return to make to the most enormous injuries is kindness and forbearance, and a resolution to convert the injurer from his dark passions by peace and love. Revenge, retaliation, atonement, are pernicious mistakes. If Beatrice had thought in this manner, she would have been wiser and better; but she would never have been a tragic character: the few whom such an exhibition would have in-

terested could never have been sufficiently interested for a dramatic purpose, from the want of finding sympathy in their interest among the mass who surround them. It is in the restless and anatomizing casuistry with which men seek the justification of Beatrice, yet feel that she has done what needs justification; it is in the superstitious horror with which they contemplate alike her wrongs and their revenge that the dramatic character of what she did and suffered consists."

It is not necessary to go into the drawing of the other characters. It is sufficient in a way, for they all serve as foils for Beatrice, as the higher and stronger character. Before closing, however, I must ask you to notice Shelley's very frequent use of suggestion, for example, when Beatrice, speaking of "Cenci," says:

"I fear that wicked laughter round his eyes, etc.,
Which wrinkles up the skin even to the hair."

Or again, when "Cenci" sends his servant for Beatrice, and on his return "Cenci" asks him what she says, Andrea replies:

"My lord, 'twas what she looked."

And yet again, at the trial, Marcio says, speaking of Beatrice:

"That stern yet pitiless look, those solemn tones,
Wound worse than torture."

Though Shelley in his "Cenci" does not reach the heights of poetical expression attained in some of his other works, particularly in his lyrics, where in such poems as the "Sky-lark," "Cloud," "Alastor," he is filled with the spirit of rejoicing in beauty for its own sake, or yet, when he does what is so characteristic of him, gives expression to words of sheer emotion. Still, we cannot but admit that throughout the poem the diction is of remarkable splendour and well sustained, and at times highly imaginative. It is undoubtedly a great poetical drama, in many respects superior to Tennyson's drama, for his canvass is not so crowded with figures. The relative place of the "Cenci" among Shelley's works depends upon one's general attitude towards him. It does undoubtedly increase our respect for the versatility of his genius, and I think we are justified in saying it is the greatest drama of the 19th century.

A. H. H.

Convocation.

The Academy of Music was crowded to the doors on the afternoon of Tuesday, the 28th of April, when the names of the scholars, bursars and prize-winners of the past year were read, and when University Degrees were conferred upon one and sixty young men and women. The seats downstairs were filled every one. The balcony had very few to spare. Even the gods were visited by a considerable overflow. The programme was after the good old style. Man after man, and woman after woman, for eight of the graduates were women, was summoned by the Secretary of his or her Faculty, marched up to the greeting of hundreds of vociferous critics, was "capped" by the President standing on a crimson dais, and at last found himself back again in his seat, decked with a new degree and burdened 'with all the rights and privileges appertaining thereto.' After the Bachelors came again the winners of Distinctions and Honours, High and otherwise, and then the Doctors of Medicine and Masters of Surgery. Last of all Convocation was addressed by Reverend Professor McComb, D. D., of Queen's University. From the crowded theatre not a single voice interrupted the speaker, a most unusual compliment to a Convocation address. The order of proceedings was as follows:

Opening Prayer.

The President's Address.

ANNOUNCEMENT OF UNDERGRADUATE PRIZES AND SCHOLARSHIPS.

Junior Entrance Scholarships:

Professors' Scholarship.—Amy K. Pennington.

Sir Wm. Young Scholarship.—W. Stewart Lindsay.

Professors' Scholarship.—Frederick A. Grant.

Sir Wm. Young Scholarship.—Winifred G. Barnstead.

MacKenzie Bursary—(Preferential).—Harry C. Fraser.

Special Prizes:

Waverley Prize, (Mathematics).—A. D. Watson, R. J. McInnis, equal.

Dr. Lindsay's Prize, (Primary M. D. C. M.)—Victor Neil MacKay.

Frank Simson Prize, (Chemistry and Materia Medica).—John Rankine, B. A.

DEGREE OF BACHELOR OF ARTS.

Frances Jean Lindsay,
Rahno Mabel McCurdy,
Euphemia May Macdougall,
Winifred May Webster,
Harry Hope Blois,
John Alexander Bradley,
James Bearisto Carr,
Wesley Herbert Coffin,
Alfred Edward Daviss,
Enos Charles Locke,
George William Loughhead,
William McDonald.

James Malcolm,
Guilford Romeo Marshall,
Charles Winfield William Matheson,
John Geddie Meek.
Alexander Kerr Roy,
Garnett Gladwin Sedgewick,
Daniel Murray Smith,
Gilbert Sutherland Stairs,
Hugh McMillan Upham,
Alexander McGillivray Young,
Luther Lisgar Young.

DEGREE OF BACHELOR OF SCIENCE.

Edwin Knowles Amberman,
Laurie Benjamin Elliott,
John Archibald Ferguson,

George Huntly Gordon,
William Horace Ross.

PRESENTATION OF DIPLOMAS OF HONOURS.

Latin and English.—High Honours—Gilbert Sutherland Stairs.
Greek and English.—High Honours—Garnett Gladwin Sedgewick.
English and History.—High Honours—Euphemia May Macdougall.
Pure and Applied Mathematics.—High Honours—Rahno Mabel McCurdy.
Chemistry and Chemical Physics.—High Honours—William Horace Ross.

PRESENTATION OF DIPLOMAS OF GENERAL DISTINCTION.

Distinction.—Winifred May Webster.

PRESENTATION OF GRADUATE PRIZE AND MEDALS.

Avery Prize.—Winifred May Webster.

Medical Faculty Medal.—Kenneth Alex. MacKenzie.

DEGREE OF BACHELOR OF LAWS.

Charles Donald Livingstone,
Wiley McClintock Manning, B. A., (Acad),
Thomas More Phelan, M. A., (St. F. X.),

John Edward Annand Macleod, B. A., (Dal),
Adam Henry Stewart Murray, M. A., (Dal),
Joseph William Weldon, B. A., (Dal).

DEGREE OF DOCTOR OF MEDICINE AND MASTER OF SURGERY.

Minna May Austen, M. A., (Dal),
Lester Brehaut,
Melville Coffin,
Daniel McNeill Crawford,
Richard William Lawrence Earle,
Theodore Rupert Ford,
Harvey David Hawboldt,
William Alfred Lawson,
Frederick Lessel,
Kenneth Angus McCuish,

John Angus MacIver,
Kenneth Alexander MacKenzie.
Albert Churchill McLeod,
John Charles Morrison,
Daniel Murray,
Edmund Bambrick Norwood.
Jacob Leslie Potter,
Grace Elizabeth Bernard Rice, B. A., (Dal),
George Watson Whitman,
Frank Valentine Woodbury.

DEGREE OF MASTER OF ARTS.

- Grace Dean Burris, B. A.—By Examination in Tennyson.
 Clarence Victor Christie, B. A.—By Examination in Pure and Applied Mathematics.
 Annie McKay, B. A.—By Examination in English and French History.
 William Roy Mackenzie, B. A.—By Examination in Tennyson.
 Malcolm James Macpherson, B. A.—By Examination in Kant and Moral Philosophy.
 Vernon Douglas Ruggles, B. A.—By Examination in Ethics.

DEGREE OF MASTER OF SCIENCE.

- Loran Arthur DeWolfe, B. Sc.—By Examination in Geology.
 Degree Conferred December 18th, 1902.

HONORARY DOCTOR OF LAWS.

- Rev. Allan Pollok, D. D., (Glasg), Principal of the Presbyterian College, Halifax.
 In recognition of his valuable services to Higher Education in Nova Scotia.

Address by the Rev. Professor McComb, D. D.

God Save the King.

College Notes.

THE SUMMER SESSION:—The College year did not close with Convocation, April 28th. On the second week of May a summer session of the School of Mines was opened at Sydney for a term of six weeks. Drs. E. MacKay and Woodman are giving courses in Chemistry and Geology, Mr. Hudson a course in Mining. The work is of a practical nature. It is hoped that the School will benefit many who would not otherwise be able to receive University instruction.

THE NEW EDITORS:—At their first regular meeting the GAZETTE staff for 1903-04 elected W. M. Corbett, Arts, '04, to be Editor-in-Chief. May the chief and his lieutenants have a successful year. 'Lord bless and pity them.'

THE BACCALAUREATE SERMON:—On the evening of Sunday, April 26th, Reverend Professor McComb preached the baccalaureate sermon in Fort Massey Church. The discourse was a splendid one, based on John iv., 12: "Gather up the fragments that remain, that nothing be lost." The main opportunities of the graduate's life are now past forever,—they can be used or neglected but once; therefore let him make the most of the fragments of time and opportunity left, for of the little remaining he can afford to lose nothing. The sermon was heard with rapt interest by a great congregation.

CLASS DAY:—1902's precedent was followed by 1903. The programme of exercises in Orpheus Hall, April 27th, was as follows:

1. Song.....Mr. S. A. Marshall
 2. 'Vera Historia'..... { James Malcolm, Arts and Science
D. A. Murray, Medicine.
 3. Address.....Rev. J. W. Falconer
 4. Song.....Mrs. James M. Slayter
 5. "Something *like* prophetic strain"..... { Miss M. M. Austen, M. A.,
Medicine.
T. M. Phelan, M. A., Law.
G. S. Stairs, Arts and Science.
 6. "Such mirrors as will turn Your hidden worthiness into your eye"..... { W. K. Power, Arts, '04
 7. Valedictory.....E. A. Macleod, B. A., Law
- Mrs Slayter was unable to sing, and T. M. Phelan, M. A., failed to appear, but with these exceptions the programme was carried out. There was a little noise in the gallery at times.

'00's AT HOME:—The Class of 1900 celebrated their Reunion by giving a reception to their friends and the graduating classes, Monday night, April 27th. The chaperones were Mrs. John Forrest and Mrs. Howard Murray. A pleasant programme of topics and music was provided for the guests, who dispersed after a very enjoyable evening.

THE HALIFAX ALUMNI AT HOME:—Undoubtedly the event of the year was the At Home given by the Graduating Classes and Halifax Alumni on the evening of Tuesday, April 28th. About 2,000 invitations were sent out, all known parts of the earth being favored. At least 800 of those bidden were present. The whole College from basement to attic was brilliantly lighted and gaily decorated. The throngs of people were received in the Examination Hall by Mrs. Howard Murray, Mrs. W. B. Ross and Mrs. Hector McInnes. A regimental band in the upper hall made things lively for promenaders, shady nooks were arranged in many places and duly patronized, and (tell it not in Gath) there is said to have been dancing in the Law Library! Supper was sumptuously served in the Museum and the Munro Room about twelve, and shortly after the guests departed. Altogether the affair was perhaps the best managed and most enjoyed that Dalhousie has ever given.

'00 RE-UNION.—A pleasant little meeting of the old Class of 1900, Arts and Science, was held in the College Reading Room on the morning of Convocation Day. Twelve members appeared. After an informal discussion, by the meeting, of some refreshments reserved for the occasion, Mr. E. A. Macleod, the President, proceeded to call the roll. Short autobiographies, covering the three years since graduation day, were given by those present, and of those not present, histories were given more or less fully by some one or other in the meeting. Many and varied were the adventures by flood and field in that brief space of time. Weary emissaries to heathen peoples, McAndrews in cattle-boats, ranchers in lonely prairie shacks, prospectors with bleeding feet in the Rockies, teachers under equatorial suns and in the forest clearings of Quebec; glimpses were given of all these types, and of many too of the faithful who turned not away from their old student life during all the time. The meeting broke up amid a general handshaking and leave-taking, and an unanimous wish that the Executive might bring about another Re-union before many years pass by. All of the old staff were continued in office.

Examination Results.

LATIN—THIRD.

CLASS I.—*Brehaut, L., *Corbett, W. M., *Gordon, Wilhelmina, Haverstock, Alice M., Johnson, A. C., Lindsay, F. Jean, Power, W. K., Stairs, G. S.

Minutes of Proceedings of the Thirty-first Annual Meeting of the Dalhousie Alumni Association,

HALIFAX, APRIL 27TH, 1903.

The Annual Meeting was held in the Munro Room of the College on April 27th, at 8 p. m.

After the reading of the minutes of last meeting, the President made his address, briefly outlining the past season's work.

The report of the Executive Committee on the year's work, which appears below, was then read:

REPORT OF EXECUTIVE COMMITTEE.

HALIFAX, April 27th, 1903.

To the Members of the Dalhousie Alumni Association:

GENTLEMEN,—There were enrolled as new members of the Association, from the graduating classes of 1902, 14 from the graduates in Arts and Science, 3 from the graduates in Law, 18 from the graduates in Medicine, 10 former graduates—a total of 45 new members. The total membership of the Association is now 278, a number far below what it ought to be. It is found very difficult to get new members if they do not enroll themselves on leaving college.

A complete list (with addresses) of all persons eligible for membership in the Association would be an interesting and very convenient thing. Considerable materials have already been collected for the making of such a list, and it is hoped that more may be done in the coming vacation, and an accurate and full list soon completed.

The success which has rewarded the work of the Macdonald Memorial Library Committee, and the *Forward Movement* on the part of the Governors, in establishing a School of Mining and Metallurgy in connection with the University, are the two chief features in the year's progress, and seem to justify the belief that Dalhousie is stronger than ever before, not only in the loyalty of her Alumni but also in the interest and support of the great majority of the people of the province.

The Treasurer's report will show the state of the Association's funds, and the report of the Dean of the Science Faculty the way in which the money devoted to the work of that Department has been expended.

Respectfully submitted,

THE EXECUTIVE COMMITTEE.

The Treasurer's statement, published herewith, shows the financial status of the Society:—

TREASURER'S STATEMENT.

AUDITOR'S CERTIFICATE.

I have audited the accounts of the Alumni Association of Dalhousie College and find them in accordance with the above statement.

W. A. LYONS, Auditor.

Halifax, N. S., April 25th, 1903.

The report of Mr. Rowlings, President of the Cape Breton Branch, which had been presented at their annual meeting on April 14th, was then read by the Secretary. This showed a prosperous year's work of the Executive of this branch, referring among other matters to the establishment of a bursary of \$50.00, to be awarded to the student from Cape Breton standing the highest in the classes of the third year in the School of Mines.

The Cape Breton branch was represented at the meeting by Messrs. E. A. Macleod, C. J. Burchell and A. W. Routledge.

The following are the officers of the Cape Breton Branch for the ensuing year:—

Honorary President.....	CHARLES S. CAMERON, M. A.
President.....	G. A. R. ROWLINGS, B. A., LL. B.
Vice-President for Cape Breton Co.....	R. F. PHALEN, LL. B.
" " Richmond Co.	D. FINLAYSON, B. A., LL. B.
" " Inverness Co.....	D. S. MACINTOSH, B. A., B. Sc.
" " Victoria Co.....	W. N. COCHRANE, M. D.
Secretary	J. W. G. MORTISON, B. A.
Treasurer.....	F. I. STEWART, B. A.
Executive Committee: EX-MAYOR W. CROWE, A. D. GUNN, W. R. TOBIN, R. M. LANGILLE and A. W. ROUTLEDGE.	

The Dean of the Science Faculty then presented his report which is subjoined.

To the President and Executive Committee of the Alumni Association of Dalhousie College:

GENTLEMEN,—I beg to submit the following report upon the expenditure for the year ending April 27th, 1903, of the alumni grant to the Faculty of Science:

The total expenditure was \$234.45. This amount was divided between the two departments which, chiefly on account of work made necessary by the founding of the School of Mining, were most in need of aid—the Department of Geology and that of Physics. In the Department of Geology \$73.47 was spent, \$8.85 in standard text-books, and the remainder in supplementing the geological equipment of the College with collections and apparatus essential to carrying on the class-work for the year. In the Department of Physics the principal item of expenditure was \$146.27 for a storage battery, required for work in electricity, as an accessory to the dynamo generously donated to the Physical Laboratory at the beginning of the year by the Canadian General Electric Company.

During the year classes were conducted by Lecturers in Botany, Zoology, Descriptive Geometry, Surveying and Hydraulic Engineering. A class in Mechanical Drawing was conducted in a room in the college building by Mr. Herbert E. Gates, of the Victoria School of Art and Design. The classes in Descriptive Geometry and Mechanical Drawing were much more largely attended than in any previous year. The work of the classes in Botany and Zoology was carried on in more convenient quarters than formerly, a suitable room having been fitted up at the beginning of the year as a biological laboratory and class-room.

The organization of complete courses in Mining Engineering, announced in August last, marks the greatest advance made by the College in recent years. This step makes it necessary that the equipment in the Pure Sciences, especially those embraced in the Mining Engineering course, shall be such as to make efficient teaching possible. Considerable additions should be made for this purpose to the present equipment in Geology. The same is true of Physics. These are

the two departments standing most in need of assistance, and it is accordingly proposed to give again to these departments for the coming year the whole of the amount which the Alumni may be able to place at the disposal of the Science Faculty.

A detailed statement of receipts and disbursements is appended:—

THE ALUMNI ASSOCIATION in account with E. MACKAY, Dean of the Faculty of Science.

1902.		RECEIPTS.	
April 28.	By Balance.....	\$ 29 26	
1903.

April 26.	for Supplies for Battery.....	6 10	
April 26.	for freight and truckage.....	8 16	
			<u>\$234 46</u>

Respectfully submitted,

E. MACKAY,

Dean of the Faculty of Science.

Dr. Farrell advocated the idea of using the balance of funds in hand in an endeavor to increase the membership of the Association, and made a motion to that effect, which was seconded by C. J. Burchell. It was not considered advisable, however, to do anything which would lessen the amount

which the Association usually votes to the Science Faculty, and it was therefore moved in amendment by Mr. A. H. S. Murray, seconded by Mr. W. J. Leahy, that the usual grant be first made to the Science Faculty, and the balance left after payment of expenses, applied towards a movement to increase the membership. The amendment was put and carried.

Applications from members of the graduating classes in Arts and Science and Law for membership in the Society were read, and the applicants duly elected to membership.

The election of officers for the ensuing year then took place, and resulted as follows:—

President.....	J. H. TREFRY, M. A.
1st Vice-President.....	E. MACKAY, Ph. D.
2nd ".....	W. J. LEAHY, LL. B.
Secretary.....	R. M. HATTIE, B. A.
Treasurer.....	S. A. MORTON, M. A.

Other members of the executive: J. W. LOGAN, B. A.; E. D. FARRELL, M. D.; G. M. CAMPBELL, M. D.; A. H. S. MURRAY, M. A., LL. B.; D. A. MURRAY, Ph. D. Auditors: W. A. LYONS, LL. B.; H. B. STAIRS, LL. B.

The meeting then adjourned.

Alumni Notes.

Theodore Ross, B. A., '99, has returned from Cornell, and is at work on the Sir William Macdonald school scheme, for which he is agent in Prince Edward Island. P. J. Shaw, B. A., '97, is Macdonald's representative in Nova Scotia.

Among those elected to the New Brunswick Legislature at the late election was W. P. Jones.

Shortly after college closed Dr. MacMechan left for Chicago, where he will give two courses of lectures at the summer school of the University.

Grassi Archibald, once of Arts '01, at present on the New Glasgow High School staff, has received the degree of B. A. by extra-mural examination from Queen's University.

W. A. MacKay and F. G. Mackintosh, both B. A.'s of '01, are taking courses at Princeton.

M. S. Macdonald, M. A., '01, has been appointed a Fellow at Cornell for next year.

A. J. W. Myers, B. A., '02, has been awarded the first scholarship of the second year at Knox Theological School, Toronto. W. M. Grant, B. A., '01, who is attending the same College, gained the second scholarship of the first year. Grant paid a short visit to the College on his way home from Toronto.

C. O. Main, B. A., '01, and P. D. MacIntosh, '00, are taking theology at Union Seminary, New York. They are also doing graduate work at Columbia, Main with a view to the M. A. degree, MacIntosh the Ph. D.

On the 18th of April, A. L. Macdougall, '00, who had been labouring at Fort Steele, B. C., as a missionary, succumbed to the "White Plague," which he unsuccessfully fought for the past three years. Having undergone treatment at a sanitarium in the Adirondacks, N. Y., for a year, Mr. Macdougall decided on missionary work in the West, hoping to ward off the disease—but all in vain. The GAZETTE is forced to record still another death from consumption.

Report, 1899 Class funds.

1902	RECEIPTS.	
May.....		\$248 50
1902.	EXPENDITURES.
