HALIFAX, N. S., NOVEMBER 3, 1944

Well you asked for it and here it is . . . The March of Grime. If you don't like what we say about you, we're sorry, but your Grime Reporter pleads not guilty to any offense with which he is charged . . . by reason of insanity.

Watch out Alfie! That perennial she-wolf from the Hall is pounding (no we didn't say panting) at your door . . . She's lost one bet already and she doesn't intend to lose this

the young C.O.T.C.er as he edged time to time. closer to her on the davenport. "This is called demolition" said N--- as the Freshman hit the floor.

Morse Code

She is certainly a girl with initiative plus. She's got a wonderful money-making scheme under way already. She has become a proxy alarmclock. If you can't wake up in the morning, don't wait! Write Sue immediately enclosing a nickel and she will wake you at any time between 5 and 8:30. Oh, by the way, we have been asked to suggest that the letters be written in straight English and not in code.

Our cosmopolitan friend, Rosalind, told us that she just loves to travel. Yes we see your point now, Rosalind, after learning that you were the only female in a carload of hemales, and did you ever love it! But take a tip from some wise old man, Rosalind, you'll never win by playing too big a field.

(Rum Boogie)

Our heartfelt sympathies go out to Boudreau for the unfortunate accident at the Acadia game. A lawyer friends tells us that carelessness and the failure to use the ordinary care that a reasonable man would use in the same circumstances caused the sad affair.

At the Movies

He: Can you see all right? She: Yes.

He: Is there a draft on you?

She: No. He: Is your seat comfortable?

She: Yes.

He: Let's trade seats.

Lizzie's Quest

Al, Nancy asked us to suggest that you shouldn't get too enthusiastic with your extra-curricular activities. Be careful boy, because when Lizzie's on the prowl she usually want to be hamstrung, or do you? * * *

found a new object for his affections to get an early dinner at Pine Hill, and Marg. seems to be quite happy could have got said dinner. King about it all. But there is, we hear, proved that McCleave was in a a certain somebody who is ont quite special category, accustomed to getso happy about it.

Well, that's all for this week, folks. paper.

What Happened at Council Meeting Tonight Dal Glee Club Acadia Trip Highlights Outlined Society Budgets on Agenda

- (1) Question of a student telephone to be installed in the Forest Building, and it was decided to bring the matter to the attention of the University to see if they would provide for it;
- Blood donor clinics to be held on Nov. 7 and Nov. 14;
- Decided that points should be awarded to the cheer leaders under the jurisdiction of the Glee Club. An Alumnae committee has been formed to meet with the Dal committee for the furtherance of Dal spirit:
- Committee formed to rearrange football schedule and to check the financial question of the Halifax League;
- Motion carried accepting the resignation of Dick Fraser from
- Motion carried allowing Med. society to have permission to hold their own election to fill Dick's place;
- (6) Three students were elected by the council to act with the two faculty members as a committee to select a candidate for the Malcolm Henor Award. They are Larry Sutherland, chairman; Connie Archibald, and Bill Mingo;
- (7) Passing of the budgets.

Manufacturers' Liability Is Re-opened By Decision of Bench

Supreme Moot Court finished its sittings last Friday, when Allan Butler out-argued Raymond Richardson on the question of manufacturers' liability, thus reopening for some consideration a point in law which was thought settled by such minor tribunals as the Supreme Court of Canada and the British House of Lords. The Privy Council might also be affronted. The case was simple: an infant eating bread cut its mouth on some glass in said bread, which had arrived at infant's table from the manufacturer through a corner grocery store.

Once upon a time manufacturer was not liable for such goings on, TO ALL MEN STUDENTS Arranged For Round unless the article was purchased from him, directly. However, the House of Lords in the case of Dono- Dear Fellow Dalhousians: hue v. Stevenson reversed this prevailing trend, ,when a young lady apple-cart by his enthusiastic case.

Both sides were handled well. Briefs were excellent, and arguments enjoyable Smoker held last year at too. Lord Chief Justice Barry and which the first-year men students Lord Justice Matthews found for were the guests of the Asociation. Presents ... FRESHMEN FROLICS

Tonight at 8:00, Dalhousie Glee Club will again take great pleasure in presenting Freshman Frolics. This year's show will be highlighted by the appearance of several in the field of music.

show will be Loretta Dickinson, one with a blazing last-minute try. of Dr. Vinci's outstanding pupils; Cyril Bugden, a coronet soloist of Queen Elizabeth High fame, and the able marshalling of Commander Libby Guy, who will render a number, accompanied by a male chorus i ten voices. Our St. John songstress, Helen Garson, will warble a tune or two and there will be two dancing numbers performed by some of Dalhousie's loveliest freshettes. (Don't miss it, boys!)

Keep an eye on our singing scrum' man, Billy Lund, as he plays and sings for us. Of course, no freshmen show would be complete without the "Sheik," who, accompanied by Julie Kaplan, will do a repeat on the number which made such a hit at the Freshie-Soph dance. Alfie will render more than one number so have the stretchers ready for our swooning females.

With such an array of talent the show promises to be one of the best in many years and a very large turnout is expected to see it.

Oh yes, don't forget the dance which follows the show. One of Halifax's best bands, Jerry Naugler, will do the honors.

Program Of Topics Table Discussion

Last Thursday night a meeting was held in the Arts Bldg. Rain came and brought with it a smaller iasm and spirits were not dampened. It was decided to draw up a program of topics for discussion. All these topics will be vital, controversial and interesting to all students. Scheduled for this week is a discussion of the perennial French Canadian problem, and Capt. Grenier, Army Education Officer, will be our guest speaker. Refreshments will be provided (at nominal cost). If you have some views on the matter, come up and air them. This is an all-student organization, and we want student opinion. Meetings will be held every Thursday night at 7:30 in Room 3 of the Arts Bldg. Watch notice boards

Examination Lists

Lists of students who will qualify for degrees in Arts, Science and Commerce and for diplomas in Education and Engineering have been posted by the Registrar. Any omissions or alterations should be reported immediately. Office of the Registrar, November 1, 1944.

DALHOUSIE INSTITUTE OF PUBLIC OPINION

WHAT DO YOU THINK OF ACADIA HOSPITALITY?

100% of all students questioned, thought that the hospitality extended to the visiting Dalhousians, while perhaps not the fault of the students of Acadia altogether, was extremely poor. We heard of Dalhousie couples who, being turned away from the dance because of the bad weather and the lack of other amusement at Wolfville, were forced to wait at the railway station until the train was due to leave.

WOULD YOU APPROVE OF THE RE-ELECTION OF THE KING GOVERNMENT?

50% of students queried thought that the re-election of the Mackenzie King Government is the best solution to the problem of post-war reconstruction in aCnada. However, many of the above volunteered this opinion only because they feel that the Liberal party is the only one that has sufficient men capable of handling Canada's problems. 30% think that the man Canada needs is John Bracken. 10% of the students prefer the CCF to the Liberal administration, though some of them are frankly dubious as to whether or not this is the opportune time for the CCF to take up The Dalhousie Students Medical power. The remaining 10% were undecided.

TRADITIONAL ACADIAN HOSPITALITY

The "Athenaeum" (student publication of a small residential college in the Annapolis Valley) recently published a verbose harangue referring to last week's Dalhousie-Acadia football encounter. The greater part of this treatise, however, is The Gazette, and considered "more infantile than puerile" by the sombre, conservative-minded Atheneans.

The pompous Acadia scribes, apparently unable to take an Tiger-Axemen rivalry. Furthermore, the fact that the "Athenaeum" lacks a staff cartoonist, threw additional fuel on the

fires of childish resentment.

The fatiguing editorial goes on to censure the "undignified conduct" of Dalhousie supporters at the game. The criticism, we feel, is far from warranted in view of the inhospitable welthe dance in the Acadia gym that night while hordes of Glod and Black supporters were denied admittance with a characteristic flourish of Acadian hospitality. Under such circumstances, the so-called "undignified" actions of our Dal rooters seem fully

The "Athenaeum" concludes with a flattering reference to Dalhousie as "an institution with standards and traditions sup-

posedly as high as our own." Ha, Ha, Ha!

This, then, is our parting advice to the Athenaeum's editorial staff: First, set YOUR OWN house in order, then come out of mourning and do your best to acquire that sense of humour which has been so obviously lacking in past years.

P.S.: Our staff artist (who has donned sack-cloth and ashes) sends his humblest apologies to the "Athenaeum" for the "infantile and puerile" cartoon in last week's Gazette.

UNWARRANTED CRITICISM

(The following is not written as an invective against any one person. It has a "general" application and is designed to prevent needless friction and misunderstanding in the future.)

The fact that material submitted to The Gazette does not always appear in print, has been the theme of a melancholy dirge chanted about the campus of late by one of our contributors. Blissfully unaware of the facts, this individual proceeded to attack our paper with venomous abandon and to accuse The Gazette management of "an undemocratic attitude" to campus

These rantings bother us no end — not because conscience pricks (for we are not in the wrong)—but because we feel genuine pity for anyone who blindly condemns an action which has been prompted by the sincerest of motives in the best inter-

ests of Gazette readers in general.

We remind our readers that Gazette space is strictly limited and that unforseen circumstances (such as the lastminute arrival of advertising cuts), may force us to omit material for which we would otherwise have found space. All we can do is give prominence and preference to those articles which are of THE GREATEST INTEREST TO THE GREATEST NUMBER.

The Gazette does not play favorites. Our policy has been to submit to the "majority opinion" of our readers regarding news coverage, editorial and literary comment and the general appearance or "layout" of The Gazette. We appreciate the constructive criticism of Dalhousians in every faculty and will endeavour (as far as possible) to comply with the individual whims of our readers. But, above all, let it be a fair and just criticism—based on truth rather than the fictional imaginings of an offended ego.

To promote "the continued prosperity of Dalhousie University and the progressive interests of its student body" is the principal aim of this year's Gazette staff. We have a right to expect interest, co-operation and fair play in return.

"LIFE IN THE STACKS"

(Herewith a journey into the mysterious unknown with an ancient inhabitant of the "stacks")

Have you ever wondered as you happened to see a son of Dalhousie with a particularly preoccupied look on his face disappear rapidly into that section of the Macdonald Memorial Library, known to its inmates and others as "the stacks", what kind of place it was, and what went on in these regions of the "other world?"

The stacks consists of rows and rows of books piled higher and deeper than elsewhere in the library. In fact it extends over five floors, and very industrious is the mouse, or student who consumes even a part of it in his stay at Dalhousie. But there are not only books in "the stacks." an attack on the caustic cartoon appearing in the last issue of No! Here and there at most of the windows are to be found small tables and chairs. Some of the latter are especially favored with legs capped with rubber, and you may be sure the competition for such a treasured possession is keen. Legend has it that a former inmate entered very late innocent ribbing, were "shocked" by our spirited portrayal of one evening for the sole reason of carrying off one of these treasures to

A word about the inmates of "the stacks" seems necessary here. Severally speaking, they are what is now termed "lovers of the liberal arts." Science students are unknown and unheard of in this region, and one member of the fraternity of "the stacks" even went so far as to say of one scientist-to-be (a medico) "Why, he'd go absolutely crazy here!" extended the Dal aggregation as a whole. Members of both Quite true, no doubt, my friend. "There seem to be a number of good Tiger squads, by the way, were charged "50 cents per head at examples around anyway"! we hear someone exclaim. In particular this s the Promised Land of the variety of bookworm known as the English Student. Here amid the works of Shakespeare, Milton, Chaucer et al he spends his days, and sometimes his nights, acquiring knowledge and culture. This is also the home of the philosopher. It is evident that Dalhousie's would-be philosophers are not all of the same variety. Some are the watch-tower on the Rhine type (to be found on the top floor) while others descend to the neither regions (bottom floor) to speculate as to what would happen if all the books fell down, for instance.

> We are very much afraid that knowledge among the inmates of "the stacks" is not at a very high level, or so it would seem. The latest evidence of this is that one particularly mad individual saw a classmate recently who was wearing a rather flashy pin on her sweater. "Say, what in the deuce is that?" he exclaimed. It took quite a long while for him to realize that it was a "frat pin" (men's) and that under the decorations there were three Greek letters. He still isn't quite sure about the letters. Among the various amusements of the brotherhood of "the stacks" the findings of one "stack-lover" (or otherwise) is a racy publication known as the Gentlemen's Magazine, takes first place.

> And now let us take our farewell of "the stacks" as we see at fivethirty on any afternoon "stack lovers" wrench themselves from their beoved desks and creep unwillingly out the library door, and as they walk sorrowfully down the steps we can hear them sing:

Dal library, 'tis of thee, Sweet land of books and me, Of thee I sing!

"WHAT IS A UNIVERSITY EDUCATION?"

(In reply to this question here is the 3rd in a series of articles to members of the Dalhousie teaching staff)

One of the main functions of a University is to prepare young people to a profession: divinity, law, medicine, teaching professions, and literary professions of all kinds. Professional people can use their hands, but only by accident; they also can become rich, but that will be another accident: the professional man is not concerned with manual labour and his specific aim should not be to make money; being an authentic, though very modest descendant of the monk or the noble man of former ages, in a modern democracy where God and the King have been replaced by Society and the Public, he must devote himself to their service.

Now it is obvious that a certain amount of training is needed in each profession. The University will train the student to diagnose, or build bridges or write articles or poetry. But we feel that pure training is not enough. The young graduate will have a life to learn all the tricks and knacks of his specialty. What Society, the boss, really needs from him is some training with a maximum of education that will enable him eventually to be best trained in anything with the best result

thing, with the best result.

But if we want to enlarge the notion of education beyond the aptitude to put forth effort and be trained, we will be almost obliged to use words like: values, principles, philosophy, perhaps even destiny and meaning of life. Which all imply that there is in us "something else" than is dreamed of, in laboratories planning for the world of tomorrow. The "planners" have strong positions and clear arguments (Cf. John Dewey in Fortune, August 1944) though not entirely free from the metaphysical implications they blame upon

Education is liberation from our condition of bondage: bonds from within, bonds from without. Not that we want to refuse ultimately that human condition of ours, and get away from our ownselves, our families, our countries, in search of impossible enchanted islands. What we want is, through knowledge, to be able to bear our burdens as things not imposed from without but freely accepted from within. Call it, if you like, passage from inconscience to reflection, from spontaneity to will, deplore the fact that we cannot live like happy brutes: it is our dignity and our duty. An "equilibre" will be reached in the long run, but not before a long dissettic faction and grouping in the dark—to shake the minds of the dissatisfaction and groping in the dark—to shake the minds of the students out of their peace; to bring up to their attention all kinds of problems still unsolved and perhaps impossible to solve and to make them feel that comfort in intellectual life is death; that is the worth of a university education.

Ignorance makes you sleep, knowledge only awakes you. Know your own heart through great works of literature; know your country and your country and your country and its expression through Mathematics, Philosophy and the Languages. Know nature through Mathematics, Philosophy and the Languages. Know nature through experimental sciences. Then perhaps you will begin to understand that great forces come from society nature and our physical and spiritual in forces come from society, nature and our physical and spiritual inheritance that meet in us; you will see their strength and lose the peace of your mind; but after four years of College and a whole life—because to the job there is no ready end—you will be able to understand them, control them perhaps and gain something of the understand them, control them possesses of the past.

Question: Do you think that compulsory service training is of any benefit to the student, the university or the country, at the present time?

'46)—"I really don't think it is doing any good, because they won't admit any more men in the Air Force anyway. It is a good thing as far as physical training of the student is concerned. The C.O.T.C. does not seem to be doing much good, as its purpose is to produce officers for the army, and I don't think many are being produced. I don't think the training is beneficial to the country at all. I think it is just to satisfy the public by making doing their part."

Don Dunlop (Engineering '46)-"I have no experience in either the U.N.T.D. or the U.A.T.C., but in my opinion, with the exception of the two weeks at camp, the time spent in training during the year is wasted. I have heard from students in other colleges, particularly Mc-Gill, that all engineering students need only take three hours a week training and I can't understand why the students of this faculty at Dalhousie should not have the same privilege."

L. I. Payzant (Engineering '45)-"I believe that military training should be compulsory for all physically fit males even in peace time, and that it was one of our country's mistakes that this was not a government policy before this war. I have been in the C.O.T.C. and the U.N. T.D. and I believe that the U.N.T.D. is more beneficial as far as engineers are concerned. The two weeks' training period at Stadacona was spent mainly in studying Marine Engineering, which was both interesting and beneficial."

R. J. McCleave, (Law '46): For myself, there is partial value; for the others, no, because at this stage of the war-having an eye on recent developments on the "Zombie" situation-it would seem that with the University year ending in April, and the probable military set-up on a voluntary basis for carrying the war Leod was the outstanding figure in wolf to another, "If you take the to Japan, the students should be re free for the unlimited nursui of their own college careers. There apparently is no government policy at present in force suggesting a demand for huge reinforcements overseas, though I believe there is a need. We should be allowed to follow the government lead, though the politics of the Home Army situation do not appeal to me.

Vincent MacMaster (Dent. '46): Compulsory military training in universities is a farce at present. Even when the war was in its most critical stages, the policy should have been either to discontinue college courses and put the students in the army, or let them devote full time to their various courses. The policy of the government, while always vague and uncertain, has been especially home, but there is nothing but the elusive with regard to the status of highest esteem for his present domicollege men. I think, therefore, that cile. Even our taciturn President such courses may be of some value to myself as a physical fitness that Paul stays at the home of THE course, but it is of no value to the Laura MacKenzie. university or to the government. Question:

WHAT'S SPIRITUAL ABOUT A SPIRITOUS BEVERAGE?

With our alert minds ever turned for questions of current (and ohhow current!) interest, we rushed pell-mell for Pallas Athene, campus authority on questions of Moral Turpitude. Springing fully-armed from the head of a nearby freshman, Pallas said she was happy to be able to give her opinion on this pertinent query. Wringing our hands enthusiastically, Pallas shrieked; "Drinking is sin. There's nothing spiritual about whatever you were talking about. "Flourishing an empty coke bottle in one hand, she bounced off to her Zoology lab. Our spirits dashed, we went T. Donald MacDonald (Science in search of someone who knew of someone who could possibly tell us where we might be able to find someone who knew somebody who could tell us where to go. To find the right answer, we mean. Our next encounter was with Sonia Moron, Arts '-. Sonia giggled deprecatingly. "Why I don't know. But it does seem to me that you ask the most ridiculous questions." Well! Considerably affronted, we sought refuge in the lofty drafting rooms of certain engineering gentlemen who have enlivened our campus life to no small degree. As our elevator mounted skywards to the drafting rooms, a fleeting doubt flashed through our minds that perhaps we were not in touch with the right people. Once in the drafting room, our doubts were instantly dispelled. Clustered around a Varge etching, tastefully framed in neon, were real live honest-to-goodness Engineers. Touching one timidily on the arm, we posed our question. 'Whadayawant?" he snarled, hurt and dismayed for a minute, at being them think that college students are disturbed from his work. We told him. "Crazy artsmen," he growled in an angry tone. We assured him we did not ask these questions through sheer, elfiin whimsey. Convinced of our serious intent, he recollected 'soberly", wiping his chin. "Well, I really couldn't say." Then, at length, he delivered the astounding statement: "Drink only milk, myself!" We were so aghast we stopped our quest and ran to get this to the

Who says the drafting room is not safe for females? Last week a fourlegged variety peered under engineers' pant cuffs for over an hour without causing even a minor riot. Luckily for the dog, however, it had departed before the boys realized it was of the opposite sex.

Nasty little echoes continue to tell their tales of a hard week-end at Acadia; it was really surprising to see how the boys act when they can do their stuff and then depart forever more. The brothers Burgess held their own both on and off the playing field; one would almost think off. Ruth Manning belonged to the S.P. C.A. to see her guiding the limping Art cautiously around the dance Wolf of Dalhousie comes from floor. And Bryce? Well, he had North Sydney. He is pestered, it is the choice of a pair of Nancy's, and true, by the she-wolves of Sheriff finally made his choice at the ex- Hall, three of whom are at present pense of our defenceless "Nail-up chewing one another and the phones Boy." According to a number of in attempts to take him to the Acadia girls, a fellow named Mac- Sheriff Hall formal. Said one shethe second contest; in fact, had the gay Colquhoun from me, it'll be as dance lasted much longer, he probably would have convinced even himself. Sportsmen say every game has its dark horses; Vic Clark found out to his sorrow that the blind date game is no exception, in more ways than one. Ever hear of a dark horse with a stiff lower lip? We were amazed at the poor showing made by the Horizontals; "yell, yell, holy hell" was very much in evidence throughout, escorts were topnotch, but they seemed to have forgotten the remaining one-third of "wine, women and song." Looking back, the general impression of Acadia seems to be poor sportsmanship but a very efficient dating system.

Would Stage Gala Activities in Science Building

It is a pity that Dalhousie University hasn't been considered as a separate entity in the Victory Loan drive. While it is possibly too late to do anything about it now, we offer some

simple suggestions for future loans.

The usual apparatus should be set up for marking the progress of the loan. This should be a graduated board stretching the whole three stories of the Science Building, with the zero mark at the top, and the final objective set somewhere near the bottom. Unusually distinctive features should mark the surpassing of various totals, such as at the $\frac{1}{4}$, $\frac{1}{2}$, and $\frac{3}{4}$ mark. For example, when the indicator which is suspended from a rope reached the 1/4 mark, it should release a chemical apparatus which would set free a stream of hydrogen sulphide into the air, thus giving Halifax the general impression that Dalhousie is not quite satisfied with its progress to date.

Then, when it reached the half-way mark, out would pop an Engineer on a cuckoo-clock principle, and he would chant, for the benefit of other Engineers and the campus generally, that Victory Bonds were worth supporting. When it reaches the ¾ mark, Prime Minister King could pin a tail on a rear view of Hitler, and on reaching the bottom a bomb could be set off which would blow the Science building to smithereens and thus ensure Dalhousie's fame to all Canadians.

THE FACTUAL TRUTH

For those who take things literally, ,we had better explain that the Victory Loan is the most worthwhile effort we have in Canada today, but the conduct of the officials who are selling the Loan to the people, and the attitude of the people themselves should come under review.

At Ottawa, to mark the opening of the Loan, Prime Minister King and Miss Shirley Temple united Autumn and Spring in a charming demonstration of Loan effectiveness. Miss Temple was draped in a beautiful fur coat, forsaking bobby socks for the great occasion. The Prime Minister was draped in every photograph he could climb into. However, we are inclined to agree with the song that "It's a long, long, while, from May to September", and give the palm to September in this case.

It is reminiscent of the circuses and free bread in old Rome. There are boys fighting and dying overseas, and giving themselves immeasurable credit in the eyes of the God they are fighting to preserve in this world, if it is to be a decent and humane world, without blase and base forms of worship. I imagine that anyone who has sons or friends on the fighting line will fork over their last \$50 to get a bond. I don't know why the rest of us have to be spurred to patriotism by shows. If the realities of war don't exist for us, maybe we're not fit to live in the post-war Canada that servicemen are fighting for.

The only conclusion being that any student who can afford thinks at once of the brief holiday it, should bet out and buy a bond.—McC.

Just 75 years ago the first Mutual Life representative began assisting his neigh-bours to gain the benefits of low-cost life insurance protection afforded by his Company.

Since then the Mutual Life has grown steadily and surely. Insurance protection provided for Canadians has advanced from \$500,000 in 1869 to over \$700,000,000 in 1944; and in the intervening years over \$85,000,000 have been paid in death and disability claims, \$120,000,000 in matured endowments, annuity payments, etc. and endowments, annuity payments, etc., and an additional \$89,000,000 in dividends to policyholders.

At the present time 180,000 Canadian families are enjoying the benefits of low-cost life insurance in this "mutual" company.

Alike . . . yet different

Life insurance companies are much alike as to policies and rates, but actual long-term results vary widely. We invite you to com-

pare The Mutual Life of Canada's record with that of any other company. Evidence of the satisfaction of Mutual Life policyholders is furnished by the fact that whole families and succeeding generations have entrusted their life insurance programs exclusively to The Mutual Life, and each year approximately 35% of its new business comes from policyholders.

Have a Mutual Life representative explain the special features of this Company . . . and let him help you select a policy adapted to your particular circumstances.

Acadia Holds Tigers To Scoreless Draw; Cubs Lose

ONTHE SIDELINES

by FARQUHAR and MINGO

Tomorrow the Dal Tigers will be really up against it when they field their weakest squad of the season against the strongest team in the local league, the Canadian Navy. To date we have lost through injuries the services of Bobbie Mac-Donald, the league's highest scorer, Pete Flynn, Adam Smith, and Kev Carten, one of the four seniors who played last year.

Art Burgess, performing in the line on Saturday, will be moved up to the scrum again, and his place given to his younger brother Brice. Vic Clarke has taken over Mac-Donald's position as tail-up, and Alec Farquhar Carten's as flying half, with the remaining spot in the three quarter line going to Lew

This practically new three quarter line can not be expected to be as efficient as the old, and Coach Ralston wants wet weather tomorrow so his forwards can carry the brunt of the attack. If it doesn't rain, the Navy may run and push us off the

Badminton is getting underway next Monday night under the managership of Freshman Alf Cunningham, and a tournament against King's Naval Establishment is slated for that night. Badminton should enjoy a successful year in 44-45 since there are many proven players about the campus, including Virginia Phillips, Jo Robertson, Alf Cunningham, Blair Dunlop, Bernie Creighton, Connie Archibald and Archibald and others.

Phil Cole Retains **Tennis Championship**

Meeting his first real opposition in the person of freshmen Alfie Cunningham, veteran Phil Cole survived a bruising attack in the first set and swept through the second to retain his Dalhousie Men's Singles Tennis title. The scores were 6-3, 6-1. Due to a leg injury sustained in the Acadia football game, Blair Dunlop was forced to default his semi-final match with Cunningham.

Soccer Men Lose To Fleet Air Arm

Today at 5:30 p.m. the Dal soccer eleven will endeavour to chalk up a victory in a match with a Canadian Naval squad, having already made, the left hand going out to dropped their first contest 4-1 last full length and still retaining the Friday afternoon to the Fleet Air ball,

Playing together for the first time as a team, the boys were outclassed by the more experienced liners, who had participated in the playoffs of the local service league. The latter enjoyed an overwhelming territorial and, save for the sensational performance turned in by the Dal goalkeeper, the score would have been much more lopsided. Our single fence. tally came during one of the few occasions the boys were able to press the flyer's net, the ball being passed around several times in front and finally touched in by Burnie

Dal, incidentally, sorely pressed for men, was compelled to begin the game one player short.

HOW TO PLAY FOOTBALL

(No. 3 in a Series by B. A.Ralston)

NO. 3-GIVING THE DUMMY

In "giving the dummy" the player with the ball must use his brains. He must know when to give it and when not. The feint is made when your opponent is between two minds. If you see that he is prepared to go with the pass, go through all the actions of passing but retain the ball. The ball is held firmly in the inside hand, that is to say, if the pass is made to the left the ball is held in the fingers of the left hand, with the right hand lightly touching it. The action of passing is then

The right hand is drawn across and away from the ball, so that your opponent is led to believe it has left your hand. Then when your opponent is deceived, the ball is quickly drawn to the body and you go on. Do not overdo the advantage throughout both halfs, "dummy." Save it for special occasions, such as when the goal line is close at hand, or when a feint will open up a big gap in the de-

Fending or Straight Arming

An effective weapon for a player on the offensive is fending or (straight-arming. It must be done in the right way or it may be brought under the heading of "rough play," and a strict referee may inflict a penalty. It can be done with the open hand and never with the closed fist, and the fend must be aimed at the chest or shoulder of the tackler, and never at the face. If a tackler is coming at you from the right, throw the weight of your body on the right leg by stepping into him and then push him off with the right arm. The proper time to straight-arm is when the opponent is actually making his dive.

CLASS PINS

Your class pin may be small—but it is important.
