LETTER TO THE EDITOR COLUMN

Dear Mr. Levine:

Your "Graduation Issue 1965 - 66" has just come to my attention. I do wish to offer my congratulations on this new and timely venture. Personally it is a pleasure to have the photographs of the majority of the class together with their future intentions.

I also think that the composition is excellent - short and to the point but providing a review of the past as well as a glimpse into the future.

It also has a very practical use and because of this I hope that you will be able to forward to me an additional half-dozen copies. Is the College of General Practice of Canada on your mailing list? If not I am sure that Dr. D. I. Rice, a graduate of Dalhousie and a Haligonian, who is the Executive Director would be very much interested in receiving a copy.

Finally, I trust that the graduates will appreciate the importance of becoming members of the Medical Societies in the Province in which they practice and the C.M.A. The future of the practice of medicine lies in the hands of you young people who are graduating. It is of utmost importance that you keep informed and participate in the development of policies to maintain and improve the profession of medicine both as a profession and in the service which is rendered to the public.

Again sincere congratulations. If I can be of any assistance at any time please be in touch with me.

Yours very truly,

C. J. W. Beckwith, M.D., D.P.H.

Executive Secretary

The Medical Society of Nova Scotia
