Cheapest and Quickest

Station - to - Station Long Distance Calls

It's cheaper and faster to use Station-to-Station Service on your Long Distance Telephone calls. A Station-to-Station Call is one where you ask for a **telephone number**, and not for a particular person.

The saving through using this class of service amounts to as much as thirty per cent on calls during the day. On calls after six p.m. the average saving is larger still. Besides, your call goes through much more quickly—usually while you hold the line.

Save yourself money and get quicker service by using Station-to-Station Service whenever possible. Remember it especially on Sundays, as Night Rates are effective all day then and your saving is still greater.

DO YOU KNOW?...

The first use of a public address system by a President of the United States in a speech to a Canadian audience was on August 26, 1923, when President Harding addressed 40,000 Canadians in Stanley Park, Vancouver, over a Northern Electric Public Address System. To-day Northern Electric Public Address Systems are an accepted part of our public life, used wherever large audiences gather. For the best in all electrical equipment, look for the name Northern Electric.
