### LEST WE FORGET

THE *Dalhousie Medical Journal* enters its fifth year of publication with an advantage over its early years in that it has a tradition to guide it. That tradition of sincere and well composed publication has resulted from following the principles set forth by its founders. Few remain who were present at, or instrumental in, its inception. It is, therefore, timely to restate those principles for the information of those who have since entered our university, and as a reminder to those who have forgotten. Briefly these are:

*"To serve as the official publication of the Student Medical Society; to promote undergraduate interest in extra-curricular medical investigation; to afford students some training in preparation and publication of scientific articles; to publish articles of interest and value both to medical students and graduates; to serve as a link between medical alumni and their fellow graduates."*

We look to the students of the present and future to follow these principles and uphold that tradition.

L. R.
