*A commemorative volume in celebration of the  
50th Anniversary of BIO: 1962 - 2012*

**VOYAGE OF DISCOVERY** summarizes BIO research results on the oceanography of Arctic and Eastern Canada. In a series of 49 papers by past and present research staff from all oceanographic disciplines at BIO, the history of Canadian oceanography before BIO and a broad section cross section of the Institute's work spanning five decades is featured with particular emphasis on contributions to Canadian and global understanding and management of the marine environment and resources. Divided into 12 sections with a Preface and Epilogue, *Voyage of Discovery* is the most extensive overview of the history and scientific accomplishments of the Bedford Institute of Oceanography under one cover: Historical Roots, Arctic Studies, Ocean Life, Ocean Circulation and Chemistry, Hydrography and Seabed Mapping, Geological Oceanography, Fisheries-Ecosystems-Aquaculture, Marine Contamination, Technology and Instrument Development, Energy Developments, BIO and the Law of the Sea, and The BIO Experience. This book's well-written and illustrated accounts will appeal to a broad readership from professional oceanographers and environmental managers and decision makers to marine science students and lay persons interested in the Arctic and Atlantic oceans, and their present status and future welfare.
