

## CONTENTS Vol. 44, Nos. 1–3 (2007)

(The papers in this volume were presented at the  
5th International Symbiosis Society Congress,  
August 4–10, 2006, Vienna, Austria)

### i Preface

- 1 Review article. Virus-host symbiosis mediated by persistence  
by L.P. Villarreal (Irvine, CA, USA)

- 11 Review article. Viruses as symbionts  
by F.P. Ryan (Sheffield, UK)

- 23 Review article. A symbiogenetic basis for the centrosome?  
by M. Chapman and M.C. Alliegro (Worcester, MA, New Orleans, LA, and Woods Hole, MA, USA)

- 33 Review article. The  $\beta$ -barrel shaped polypeptide transporter, an old concept for precursor protein transfer across membranes  
by W. Löffelhardt, A. von Haeseler, and E. Schleiff (Vienna, Austria and Munich, Germany)

- 43 Review article. Marine sponges as models for commensal microbe-host interactions  
by S. Schmitt, M. Wehrl, K. Bayer, A. Siegl, and U. Hentschel (Wuerzburg, Germany)

- 51 Review article. The flagellates of the Australian termite *Mastotermes darwiniensis*: Identification of their symbiotic bacteria and cellulases  
by H. König, J. Fröhlich, L. Li, M. Wenzel, S. Dröge, A. Breunig, P. Pfeiffer, R. Radek, and G. Brugerolle (Mainz, Ulm and Berlin, Germany and Aubiere, France)

- 67 Review article. Symbiotic Control in agriculture and medicine  
by T.A. Miller (Riverside, CA, USA)

- 75 Hibernacular behavior of spirochetes inside membrane-bounded vesicles of the termite protist *Staurojoenina assimilis*  
by A.M. Wier, J. MacAllister, and L. Margulis (Madison, WI and Amherst, MA, USA)

- 85 *Polynucleobacter*: Symbiotic bacteria in ciliates compensate for a genetic disorder in glycogenolysis  
by C. Vannini, S. Lucchesi, and G. Rosati (Pisa, Italy)

- 93 Mycovitality and mycoheterotrophy: Where lies dormancy in terrestrial orchid and plants with minute seeds?  
by V. Vujanovic and J. Vujanovic (Saskatoon and Montreal, Canada)

- 101 Changes in infectivity and effectiveness of *Glomus mosseae* in relation to soil nitrogen nutrition  
by T. Takács, I. Vörös, and I. Biró (Budapest, Hungary)

- 109 Symbiotic response to low phosphorus supply in two common bean (*Phaseolus vulgaris* L.) genotypes  
by M. Zaman-Allah, B. Sifi, B. L'Taief, M.H. El Aouni, and J.J. Drevon (Ariana, Zarzouna, and Tunis, Tunisia, and Montpellier, France)

- 115 Ectomycorrhizal influences on selected tree species from Central Himalayan Region of India  
by V. Pande, U.T. Palni, and S.P. Singh (Nainital and Garhwal, Uttaranchal, India)

- 121 Endophytic fungi in *Festuca pratensis* grown in Swedish agricultural grasslands with different managements  
by A. Puentes, D.R. Bazely, and K. Huss-Danell (Toronto, Canada, Umeå and Uppsala, Sweden)

- 127 An isolated lichenicolous fungus forms lichenoid structures when co-cultured with various coccoid algae  
by G. Brunauer, J. Blaha, A. Hager, R. Türk, E. Stocker-Wörgötter, and M. Grube (Salzburg and Graz, Austria)

- 137 Symbiotic relationships between hydroids and bryozoans  
by S. Puce, G. Bavestrello, C.G. Di Camillo, and F. Boero (Ancona and Lecce, Italy)

- 145 Morphological features and comet assay of green and brown hydra treated with aluminium  
by G. Kovačević, D. Želježić, K. Horvatin, and M. Kalafatić (Zagreb, Croatia)

- 153 *Vibrio cholerae*-*Acanthamoeba castellanii* interaction showing endosymbiont-host relation  
by A. Saeed, H. Abd, B. Edvinsson, and G. Sandström (Stockholm and Solna, Sweden)

- 159 Enzyme distribution and metabolite exchange in the symbiosis between the deep-sea tube worm, *Riftia pachyptila*, and its bacterial endosymbiont  
by G. Hervé and Z. Minic (Paris, France)

- 167 Position paper. Universal symbiogenesis: An alternative to universal selectionist accounts of evolution  
by N. Gontier (Brussels, Belgium)

- 182 Author Index Vol. 44

# SYMBIOSIS

AN INTERNATIONAL JOURNAL

## Volume 44, 2007

### EDITORIAL BOARD

David H.S. Richardson (Halifax, Nova Scotia, Canada), Editor-in-Chief  
John G. Streeter (Wooster, OH, USA), Review Editor  
Margalith Galun (Tel Aviv, Israel), Consultant and Founding Editor-in Chief  
Suzanne Trauffer (Riegelsville, PA, USA), Production Editor

O. Roger Anderson (Palisades, NY, USA)  
Daniele Armaleo (Durham, NC, USA)  
Guillaume Becard (Castanet-Tolosan, France)  
Birgitta Bergman (Stockholm, Sweden)  
Thomas Boller (Basel, Switzerland)  
David Day (Sydney, Australia)  
Michael F. Dolan (Amherst, MA, USA)  
Aline Fiala-Medioni (Banyuls-sur-Mer, France)  
Charles Fisher (University Park, PA, USA)  
Peter M. Gresshoff (Brisbane, Australia)  
Abdelaziz Heddi (Villeurbanne, France)  
Hauke Hennecke (Zürich, Switzerland)  
Ann M. Hirsch (Los Angeles, CA, USA)  
John E. Hooker (Manchester, UK)  
Kerstin Huss-Danell (Umeå, Sweden)  
Adam Kondorosi (Gif-sur-Ivette, France)  
Todd LaJeunesse (Miami, FL, USA)  
Carol Lauzon (Hayward, CA, USA)  
Peter Lindblad (Uppsala, Sweden)  
Lynn Margulis (Amherst, MA, USA)  
Margaret McFall-Ngai (Madison, WI, USA)  
Yaacov Okon (Rehovot, Israel)  
Bruce Osborne (Dublin, Ireland)  
Gopi K. Podila (Huntsville, AL, USA)  
Barry G. Rolfe (Canberra, Australia)  
Michael J. Sadowsky (St. Paul, MN, USA)  
Mark R.D. Seaward (Bradford, UK)  
Marc-Andre Selosse (Montpellier, France)  
Malcolm Shick (Orono, ME, USA)  
Joseph D. Shorthouse (Sudbury, Ont., Canada)  
Warwick B. Silvester (Hamilton, New Zealand)  
Dietrich Werner (Marburg, Germany)  
Douglas Zook (Boston, MA, USA)

Symbioses involving protozoa  
Molecular biology of the lichen symbiosis  
Arbuscular mycorrhizal symbiosis and signaling  
Symbiosis and cyanobacteria  
Perception of microbial signals in plants  
Mitochondria, cell organelles, symbiotic membranes  
Symbiotic microbiota of termites & other invertebrates  
Bacterial symbioses in hydrothermal vents & cold seeps  
Deep sea symbioses  
Nodulation and nitrogen fixation  
Insect-intracellular symbioses  
Bacteria-plant symbioses  
Recognition and specificity of *Rhizobium*, biofilms  
Arbuscular mycorrhizae  
Actinorhizal symbioses, fungal endophytes  
Genetics of nodulation  
Corals  
Insect and plant-microbe interactions  
Cycads and cyanobacteria  
Symbiogenesis, termite symbiosis, eukaryosis  
Bacterial symbioses in marine organisms  
Non-legume nitrogen-fixing associations  
Cyanobacterial symbioses with plants  
Fungi, mycorrhizae  
*Rhizobium* and environmental tolerance  
Plant microbe interactions, *Rhizobium*  
Lichens and leaf yeasts  
Orchid mycorrhizae  
Sea anemones and corals, coelenterate symbiosis  
Insects and insect galls  
Nitrogen-fixing symbioses, *Frankia* and *Gunnera*  
Symbiosis and antagonism in soil organisms  
Microbial symbioses
