Blow very hard last last  
night — little wind this morning  
breezily — tem<sup>per</sup>: mild —

Cont<sup>d</sup>

This morning I observed drops  
of diluted acid on the various  
surfaces of the Galvanic plates  
tho' the cloths were quite dry  
and the machine had ceased  
to act, last night —  
also very little acid on  
the copper plates owing pro-  
bably to the sand with which  
the plates were cleaned, preventing  
the acid from affixing close to  
the plate.
