

The Proceedings and Transactions of the Nova Scotian Institute of Science
Volume 17 Part 2

Proceedings	XXI-XIX
An electronic perfusion pump, with especial reference to its use in blood-flow – <i>Owen S. Gibbs</i>	1-3
The addition compounds of hydrogen chloride with ether and acetone – <i>D. McIntosh</i>	4-5
On the distribution of quinine in the blood – <i>Harold S. King</i>	6-7
Notes on isomorphism in oxonium compounds – <i>D. McIntosh</i>	8-9
A new method of measuring blood-flow (a demonstration of the apparatus) – <i>Owen S. Gibbs</i>	10-11
Experiments on the removal of sulphur from illuminating gas by activated carbon – <i>E. W. Todd</i>	12-13
Preliminary notes on the mitochondria of the parathyroid of the white rat – <i>S. S. Singer</i>	14-25
A vermiform appendix in the domestic cat – <i>Marjorie F. Ellis</i>	26-31
Oxygen-compound formation with acetaldehyde at low temperature – <i>D. LeB Cooper</i>	32-33
Experiments with carefully dried substances – <i>D. McIntosh</i>	34-40
Appendix	I-III
