Students! Be Careful of Your Eyesight

You surely do not wish to begin your life's work handicapped by poor eyesight. If your eyes ache or cause you any inconvenience when you are reading or studying there is a cause for it. Even though it should be slight better have me examine your eyes, and if necessary, supply glasses. Scientifically fitted glasses correct defective vision, and make reading a comfort.

I devote my whole time to optical work and have the latest appliances to aid me in it and the only complete lense grinding plant in the Maritime Provinces.

Editorial.

THE GAZETTE has received a copy of an address delivered before the Phi Beta Kappa Society of Brown University by Prof. J. E. Creighton of Cornell.

This splendid lecture is of much interest to Dalhousians, for Prof. Creighton is a graduate of '87, and one of the rising men in the world of Philosophy.

His subject is "Knowledge and Practice," and he begins with an able plea for the importance of thought, and "the free and unrestricted play of ideas," which "is to be regarded as the essential business or primary intention of human life". But, he continues, "it would be idle to conceal from ourselves that truth is about the last thing the average mind esteems or desires. The practical man is always impatient of the person who insists on facts or principles, despising these as not leading to immediate results." "It may appear to the young man going into life, that the practical forces are so strong and all-pervasive at the present time that the only prudent course is to

capitulate and learn the rules of the game. But, after all, if his college life and the fellowship of societies like this have given him any glimpse of ideal values, his loss of courage can only be momentary."

He divides the "forces that war against Light and Knowledge" into two classes, "materialism which demands that the fruits of knowledge be forthcoming in goods of some kind, and practical or sentimental idealism, which is likewise eager for quick return of profits and impatient with knowledge which does not contribute directly to the amelioration of the life of the individual or society." "And, as is usually the case, the foes within are here more dangerous than the foes without. The greatest danger is that the prevailing skepticism shall effect an entrance into our own minds and thus paralyze our efforts in behalf of learning. *At the present time, it is essential, above everything else, that scholars, and the universities as the representatives of scholarship, should renew their faith in the sovereignty and efficacy of truth.* May it not be, that the indifference to learning on the part of undergraduates of which we are hearing so much at the present time, is to some extent the outcome and reflection of our own skepticism and worldliness? Unless scholars can keep alive in their own hearts the love of truth, unless they are really absorbed in its pursuit, they cannot hope to inspire others with reverence for knowledge as for something high and noble. The fault must lie in ourselves and not in our stars. Even when circumstances seem most unpromising, the love of truth is a motive to which one may always confidently appeal. *Next to distrusting his own reason, for the scholar the most fatal step is to assume that truth has no power to awaken a response in the minds of others.*"

Of course everyone must feel that there is a great deal of justice in the demand of something practical for practical life, but he makes his position clear thus. "Have not our demands been too high, the plan of education too far removed from the interests of our American youth, to call forth their activities? Let us come down from the heights, and, taking human nature as it is, aim at practical results, at giving our young men a training for life, at making them efficient leaders of business

and qualifying them for holding political offices. They may happily in the process acquire some modicum of liberal culture and some respect for ideas. In spite of the element of truth that such statements contain, I cannot help feeling that they point entirely in the wrong direction. A university teacher is not the man to talk about taking human nature as it is, or of gratifying the actually existing interests of students. For his concern is with human nature as it ought to be, his function to awaken and call out interests that are yet only latent and which the student may not yet know that he possesses. It is a poor philosophy to take human nature as it is, and to fail to bear in mind that which it is capable of becoming. Moreover, if the university cannot maintain any higher ideals, or appeal to different interests, than those which are dominant in the outside world, what reason is there for its continuing to exist? The practical preparation for life may be better obtained in professional schools or in contact with the actual conditions of business life".

"But among ourselves the unpractical type of college professor, who lived in the world of ideas and somewhat apart from mundane affairs is rapidly vanishing". "It is so much easier to act than to think! We not only waste our strength on all kinds of practical questions regarding the organization and administration of the university, but we are also ready to lead reform movements in church and state, direct charities, organize conventions, or give advice on any practical subject whatsoever, under the pleasant conviction that we are rendering important public service, and also demonstrating that the college professor of to-day is a wide-awake, practical person. Of course, all these activities may be good, but do they tend to distract the mind of the scholar from his own proper business?" "It is a mistake on the part of the university to adopt any other end than that of producing scholars. The first function of the university is to see that the race of scholars shall never fail, to inspire and train men who shall perpetuate and advance the cause of learning". "We are too anxious and troubled about many things, and tend to neglect the one thing needful.

And truth is a jealous mistress, who will not grant favors to him who serves her with half a heart”.

We will not apologize for these lengthy quotations. We should like to quote more, for it will go ill with any university, which should consider that her reputation depends on her athletic or debating team, college building or on anything but on the character of the men she trains and shelters. In short, let Dalhousie always remember, that she is an “*Institution of Learning.*”*

Nova Scotia Technical College.

All of the Dalhousie students have seen the fine substantial building of the Nova Scotia Technical College on Spring Garden Road so that no description of the exterior is necessary. The structure has two floors and a fine basement that is really equal to a third story. The arrangement of the rooms is as follows:

In the basement are a gymnasium, cement testing laboratory, a locker room, a large vault for storing historical records of the province, a metallographical laboratory, balance room, assaying laboratory, garment making department, workshop, fan room and boiler room.

The first floor contains the administration offices, lecture rooms for mining, mechanical and chemical engineering, heat laboratory, electrical measurements' laboratory, electrical research laboratory, geological laboratory and provincial museum.

On the second floor are the offices of the different professors, lecture rooms of civil and electrical engineering, draughting room, assembly hall, reading room, chemical laboratory, chemical research laboratory and science library.

The building itself is of fire-proof construction with a steel frame, and is simply and tastefully finished throughout. There is an adequate hot water heating system and every room is ventilated according to the most modern scientific developments. The whole building is lighted by electricity, and here again the

*[A copy of the whole Address, may be found in the Library, or in the International Journal of Ethics, Vol. xx.]

installation at the college represents the very latest and best practice in this line. All of the wires are encased in iron conduits so that there is never any fear of sparking or fire. In every large room every pair of lights has its separate switch, and these are locked in a recess in the wall. The lights themselves are placed close to the ceiling and are all provided with Holophane diffusing reflectors. The amount of light is so figured that there is an illumination equal to two candle feet at about the height from the floor of a person's waist. This means that one can read easily when seated and that there are practically no shadows. This makes the Technical College the best heated, best lighted, best ventilated building in the Maritime Provinces. Altho all that was necessary has been done for the health and material comfort of the students, the principal provisions have been made for their education as engineers. Together with a representative of each college, the Faculty of the Technical College have worked out a complete two years' course that is to be uniformly adopted by all affiliated colleges—Acadia, Dalhousie, King's, Mt. Allison and St. Francis Xavier. Students who wish an engineering training will enter whichever college he chooses and there study the general physics, chemistry, geology, mathematics, drawing, surveying, English, modern languages and shopwork. The course is practically the same for all students, whether they intend to become civil, mining, electrical or mechanical engineers. This course gives the student a good foundation for the special applied science work of the last two years, which are taken in the Technical College. Here the electrical and mechanical course are the same, during the third year, but the civil and mining engineering are distinct from each other and from the combined electrical and mechanical. The student passes from one college to the other on certificate without examination.

In the Technical College the work is about equally divided between lectures and recitation in the morning and drawing or laboratory in the afternoon. The course is hard, but so is everything in life that is worth while. There is such a high standard set today for the engineer, and all the other first-class engineering schools are trying so hard to obtain all the pro-

professional requirements, that it is necessary to make the education for this profession at least as strenuous as that for law, or medicine. The Technical College intends to attain as high standards of graduation as McGill, Queen's or other colleges of applied science which stand in the front rank.

A new building, fifty by one hundred and fifty, is being erected at present and will be equipped with all the necessary appliances for testing iron, steel, timber, concrete, etc. They will also contain the boilers, electric lighting unit, hydraulic testing machinery, mechanical engineering laboratory and machine shop. It is expected that this will be completed and ready for use by the latter part of this year. Five thousand dollars has been spent for a materials testing laboratory and about \$15,000 for electrical and mechanical engineering laboratory equipment.

The heads of the departments in the new college have been selected for their practical experience, as well as their scientific and professional training.

Prof. T. S. Hewerdine, in Civil Engineering, is a graduate of Austin College in Arts, and of the University of Illinois in Science and Engineering. Most of his work has been carried on in the Western United States. He has been connected with mining and electrical development work as well as having the responsibility of the design and construction of bridges, tunnels, foundations, municipal work and railways.

Prof. R. R. Keely is a graduate of a five years' course in Cornell University, obtaining the degree of E. E., M. E., and M. M. E. His teaching experience was gained in Cornell and in the University of South Dakota. He also passed thru the engineering apprentice course in the shops of the Rhode Island Locomotive Company. His engineering experience began with the design and construction of electric power generation and distribution plants with Westinghouse Church Kerr Co. He was City Engineer of Edmonton for four years, and has been retained as Consulting Engineer with some Hydro-electric and

irrigation projects in British Columbia. His long residence and intimate acquaintance with Canadian life and ideals make him especially fitted to identify himself with Nova Scotians.

Mr. Gerald F. Murphy has been appointed to the position of Instructor in Mining Engineering. He is a graduate of Dalhousie College in Mining Engineering, and has taken a graduate course in Mining at Columbia University in New York.

Mr. Francis Dawson, a student at Dalhousie last year, has been appointed as Assistant in Civil Engineering.

The Technical College is an institution erected by the people and for the people of Nova Scotia. It stands at the head of a system of secondary and prior technical education that has brought forth much praise abroad for the genius and ideals in education possessed by Nova Scotia. The college will conduct industrial research that is bound to materially assist the industrial expansion of this province. At the college every boy in Nova Scotia, rich or poor, may secure a thoro training for the engineering profession. There is a fine scholarship of \$75.00 for each county in the province, except Halifax and Cape Breton Counties, which have two each.

With the great advance in the material prosperity of Canada in the near future a great many engineers will be necessary. It is a splendid thing for Nova Scotia that her boys may have the opportunity, at practically no cost, to prepare themselves to share worthily in the industrial future of this country.

F. H. S.

Running Waters.

There are four rivers in Eden old
 (Running waters may never cease)
 They fed the apple's mellowing gold,
 And the red rose tree in the garden mould
 And the grasses that hid the serpent cold
 (The rivers are restless and know not peace.)

There are four rivers that flow in Hell :
 (Running waters may never cease)
 They circle the lovers that erst loved well
 And the aimless sinners no man may tell,
 And the souls that struggled in vain and fell,
 (Here by the river may none find peace.)

A. CLARE GIFFIN.

The University Monthly, for October.

Muskoka—And a Conference.

MUSKOKA—Does not the very name carry with it infinite suggestions—suggestions of blue sky and clear waters, whose smooth surface, ruffled only by the glancing breeze, or the paddle of the canoe, reflects the wooded hills, which rise from its shores; of long tramps through thick woods, where, as yet man has not laid his ravaging hand, and in whose depths the voice of the explorer is hushed, and he pauses, on his way, to listen to the myriad tones of nature, conscious that here indeed, he stands in the Holy of Holies, in the presence of nature's God.

Many years ago, before the white men from the two great nations across the sea had settled in this fair land of ours, and begun their struggle, tooth and nail, for its possession, in the days when the birth-right of the red man was still his own, there lived a great chief of the Hurons, Musaquado. Fierce was he in the fight, while the look on his wrinkled face made the bravest foe cower, but kindly to his own people, with a smile, whose benediction rested on them, like the sunshine from a cloudless blue. Musaquado, the "clear sky," they called him. And to these Ontario highlands, where the tribe hunted and fished, they gave the name, the land of Muskoka—the Muskoka of to-day. Situated a thousand feet above sea level, the brightness of its sunshine, and the clearness and purity of its rarefied atmosphere, merit for it the name of the "land of the clear sky."

It was this realm of beauty—Canada's great play ground as it has been termed, towards which, on June 26th, 1909, the train laden with more than a hundred and fifty laughing, chattering girls, was speeding. College girls, Normal school

girls, girls from the cities,—all wore a look of radiant expectancy. For were we not on our way to the first Canadian Conference of the Young Woman's Christian Association, to which we had looked forward so long and eagerly, to be held in the very midst of the Muskoka region? A few hours ride from Toronto, brought us to Muskoka wharf, the gateway to the lakes. From there the *Cherokee* a swift little bark of the Muskoka Navigation Company bore us through Lake Muskoka, thickly dotted with islands, varying in size from those of several acres, to those comprising but a single tree and a few feet of rocky soil; through the narrow entrance to Lake Rosseau, in some places just wide enough to allow the boat to pass between the shores; touching, here and there, at a picturesque little village, or at a tiny wharf, back of which, among the trees, nestled a quiet little summer cottage; passing along the southern end of Lake Rosseau, into Lake Joseph, at the entrance of which, beautifully situated on the hilly shores of one of the largest islands of the district, stood the Elgin House, our place of meeting.

* * * * *

Many were the exclamations of delight, as we looked from our windows that bright Sabbath morning, and saw the broad vista of winding lakes and wooded hills, stretching away to the distant horizon, while, just below us, the lawn, checked with ever-moving patches of light and shade, as the sun came glinting through the trees, sloped gently down to the shining waters of Lake Joseph. Truly it was an ideal day for the opening of our conference. Nature seemed to be resting from her labors and hymning a glad song of praise to her creator. The thrilling, yet subduing effect of the quiet of our surroundings, touched the mystic depth of our being, and, as we gathered round the breakfast tables, with a new note of feeling in our voices we joined in the words of the grand Old Hundred,

"Praise God, from whom all blessings flow."

Just across the lawn from the Elgin House, stood the chapel, a quaint little building, comprising only roof and floor, the walls being supplied, in some places, by the trees, which surrounded it. Here most of our services were held, and here, on our first

Sunday in Muskoka, we had the privilege of listening to two powerful addresses by Dr. Herridge of Ottawa.

His text for the morning, fitting to the occasion was from Kings 4, 22. "And upon the top of the pillars was lily work." With a brief but graphic description of the building of the temple, with its massive pillars of brass, the speaker showed how needful to the perfection of the work, was the decorative portion. "Beauty," he said, "was necessary as well as strength. So in the life of humanity, woman must ever shed around her a sweet and refining influence. She must equip man for his great life's battle, and raise him to the highest that is in him. And, as the crowning lily work, with the solid, unadorned portion, formed the complete pillar, so woman should combine beauty and strength. Physical strength," he concluded, "and intellectual strength, but above all moral strength should blend, in her nature, with a rare beauty, not of the eyes, but of the soul which looks through those eyes, not of the face, but of the spirit, whose inner workings illumine that face."

The programme for each of the busy days that followed was fairly uniform. Presidents' Council assembled immediately after breakfast. Here the Presidents met with the various Association leaders, to discuss the special problems, which confronted each one, and to consider in what ways the Association could attain to the greatest possible power and influence in the college life.

Bible study classes met at nine. In this there were three courses given, one on "The Earlier Prophets," by Professor Gilmoor, of McMaster University, Toronto; another on "The Social Teachings of Jesus," by Professor Reynolds, of Macdonald Hall, Guelph; and a third, "The Life of Christ, according to St. Mark," by Rev. Donald MacGregor of Orillia. Both the titles of the courses, and the names of the leaders, made it difficult to decide which one to choose. The girls of the larger delegations divided their forces, so that they might have one or more, in each class. The masterly way in which the classes were conducted, and the knowledge and insight given by those few, brief studies, were indeed a revelation to many, of the importance and absorbing interest of Bible Study, and, as one

of the leaders expressed it, "the appalling ignorance of the Bible which prevails to-day."

The first hour of Mr. MacGregor's course was devoted to a study of the general characteristics of Mark's gospel, and the essential points of difference between it and the other three. Mark does not go back and trace the genealogy of Christ, as do the other gospel writers, nor does he tell the story of his birth. Mark's gospel is one of action, and he begins with the most active period of Christ's ministry, that which immediately followed his baptism. Omitting nearly all his great discourses, relating but few of the parables, with little or no pause for reflection or comment, the writer records the marvellous deeds of the man of Nazareth, in quick succession, with many graphic and dramatic touches, picturing at times even the gestures. "Things move with Mark," said our leader. "His task was to present Christ in the full energy of his superhuman power, and this he does, simply, directly, and forcibly."

Then followed a detailed study of the gospel, following the lines suggested by H. W. Oldham, in his "Studies in the Gospel according to Mark." Mr. MacGregor's quiet scholarly manner, his deep insight into the conditions which prevailed at the time of our Lord, and his sympathetic understanding of His life on earth, evincing much earnest study, and an unusual ability to impart knowledge, with a clearness of outline and a vivid representation, made this class a source of the greatest inspiration and practical benefit.

Mission Study classes met at ten. Here again there were three courses given, one, "The Moslem World," led by Miss Thomas, of Toronto; another, "Strangers Within Our Gates," dealing with the great need of evangelical work among the immigrants, who are crowding to our Canadian North-West; and a third, "The Evangelization of India in this Generation." The book entitled "The Moslem World," written in Professor Zwemer's pithy and interesting manner, was used by the class, which studied the problems of Mohammedanism. This class was of an especially practical nature, and the question, What can we do in stemming the awful tide of superstition and vice permeating the religion of Mohammed, and in bringing the light

of Christianity to those benighted millions of the human race, was forced home again and again.

At eleven each morning, all gathered in the chapel, where addresses were delivered, by various speakers. The afternoons were given up to recreation. Service at eight in the evening, followed, sometimes, by delegation meetings, or a stroll beside the lake, or a paddle over its moonlit surface, completed the programme of the day.

Among the speakers, whose presence made our Conference one of lively interest and enjoyment were; Rev. Canon Coady and Rev. John MacNeil, of Toronto; Dr. Herridge, before mentioned; Rev. Mr. Goforth, and Dr. Dow, both of China; Miss Bell, of Africa; and Dr. Gould of Palestine, whose graphic account of the work of the medical missionaries among the Mohammedans of that land, was a feature of the Conference, not soon to be forgotten. Truly an opportunity of hearing such speakers, and of coming in contact with personalities such as these, made the Conference indeed an "experience of a life-time."

The hearty, whole-souled way, in which the various sports were taken up, showed that these were indeed "all-round" girls. Boating, bathing, tennis and all the outdoor recreations so dear to the heart of the Canadian girl, contributed much to the delight of the week, and made the excitement run high at times, as when Queen's and Varsity matched their champions on the tennis court, and from the verandahs and lawn came the grand old Queen's yell,

Queens! Queens! Queens!
Oil thigh na Banrighinn gu brath
Cha gheil! Cha gheil! Cha gheil!

with the answering cry, from the wearers of the blue and white,

Toronto! Toronto! Toronto of Varsity!
We'll shout and fight for the Blue and White, and the honours of U. of T.!
Ripperty! Rapperty! Ripperty, Rapperty, Ree!
Toronto! Toronto! Toronto of Varsity!

Two unique features of the celebration of the First of July were a patriotic address, by Rev. Mr. MacNeil, and the stunts of the afternoon, when the representatives from each college, arrayed in their colors, with pennons waving, gave a drill or a

small theatrical performance, in which the college songs and yells figured prominently.

The patriotic address found a responsive chord in every heart. After showing that Canada must inevitably become a great nation; that nature, the other nations of the world, her own character, and the ruling hand of Providence are all contributing to her upbuilding, and pointing out the great dangers which threaten our national life; the materialistic spirit due to the increase of wealth and resources; and the sectionalism, arising from the great influx of immigrants, from every country on the globe, the speaker concluded;—"Our problem is to fuse and unify the conflicting elements. We must take their best qualities, the wariness of the Scott, the steadiness of the German, and fuse them all into one, and change them with the unifying spirit of the gospel of Christ." Let the words of the Recessional be our national prayer;—

"God of our fathers, known of old,
Lord of our far-flung battle line,
Beneath whose awful Hand we hold,
Dominion over palm and pine.
Lord God of Hosts, be with us yet,
Lest we forget, lest we forget."

On the morning of July 5th the Conference ended. As the boat left the wharf, and the Elgin House disappeared from view, we began to realize that our brief stay in the fairy-land of Muskoka was over. With feelings of mingled sadness and joy, we turned our faces homewards, each of us resolved that the year '09-'10 should be the banner year in the Y. W. C. A. of our Alma Mater.

Library Notes.

"*Bibliotheca a Dallusia valde desiderata,*"
MECAN., *Opusc.* l. vi. cap. i.

A CHANGE.—Owing to the death of her sister-in-law, the wife of Major Philip Gray, R. H. A., Miss Gray, the Assistant-Librarian, has been called away to England, where she will remain for a short time. Her place has been filled in her

absence by Miss MacMechan. Miss Gray has fitted herself for her post by careful study of all that pertains to librarianship, and has been most faithful in the performance of her duties. Her knowledge of French and German has been manifest in the cataloguing, and never before has the work of the library been more efficiently carried on. At the same time her quiet courtesy and attention to the needs of the students have won for her many friends.

CLASS GIFT.—Ten years after graduation, the class of 1899 continues to benefit the college. Its memorial fund went as a subscription to the New English Dictionary, and last month, the Library received the seventh volume, including O and P.

DALHOUSIE SCHOLARSHIP.—The Rev. Louis H. Jordan, ('75) is becoming known for his labors in the field of Comparative Religion. His latest work, in conjunction with Professor Cabanea, "The Study of Religion in the Italian Universities" is receiving extensive notice in the reviews. The Library would welcome a copy to place on the shelves devoted to the works of Dalhousie graduates and professors. It is always expanding.

WANTS.—Since the list of missing *Gazettes* was first published last month, three volumes have been completed, viz, XXXV, XXXVIII, XXXIX. Thirteen volumes are still imperfect.

CASE IN POINT.—The value of having a complete file of the *Gazette* was illustrated recently in an interesting manner. H. V. Bigelow, (Arts, '94, Law, '96,) wrote to a friend in the Law School to obtain a copy of his articles on the "Origin, Development and Advantages of Trial by Jury," published in the *Gazette* in 1895. He needed them for his lectures to the students at law in Regina. The issues containing the articles were found among the duplicates and at once typed and forwarded. It is likely that the *Gazette* will be more frequently used and consulted as time goes on.

UNDERGRADUATE INTEREST.—A gentleman of the Second year has presented the Library with two interesting works, "Moore's Translation of Anacreon," (3rd ed. 1803) and "*The Turkish Spy*, vol. iii, 1718. The *Anacreon* contains an engraving of the poet and also of his translator, with the book-

plate of Roger Lee. Byron called Moore "The young Catullus of his day," and professed to be shocked at the warmth of his effusions. It was only Byron's fun.

DONA FERENTES.—Dalhousians have good memories. Lapse of years does not make them forget their *Alma Mater* and her needs. The Library is perhaps the part of the college most easily benefited, the part which receives the most tokens of old graduates' kindly remembrance. A constant friend, who likes to do good by stealth and would blush to find it fame, has sent in his annual contribution, this time in the shape of a large case of books. Amongst the more important contents were the "International Encyclopedia" in fifteen volumes, a long set of the "Annals of the American Academy of Political and Social Science," besides other important works in law, history and bibliography. The Rev. Wm. Fraser, ('83) has donated Curtin's "Mongols in Russia" and Widney's "Race Life of the Aryan Peoples." Even more interesting on account of the personal equation are presentation copies of Professor MacGregor's ('71) new edition of his "Kinematics and Dynamics, his "Physical Laws and Observations," and Professor J. W. Tupper's ('91) edition of D'Avenant's "Love and Honour" and "The Siege of Rhodes" in Heath's "Belles Lettres" series, an excellent piece of work.

DIFFERENT METHODS.—In the east, you often see the sign "No Admittance Except on Business," on factories, new buildings in course of erection and so on. This is decorous, and polite but not invariably effective. Out west, the people are more laconic and translate it thus,—

"KEEP OUT!
THIS MEANS YOU."

The Library Committee is thinking seriously of having this posted in letters two feet long of flaming red at every entrance to our little "stack." The present notices are apparently not read, or not understood.

Our Alumnae and Alumni.

Roy Leitch has been heard from. Oxford has not caused him to forget Dalhousie. He contemplates a thesis for the M. A.

Miss Webber and Miss Laurie Browne are teaching at Braintree, Mass.

"Jerry" Creighton, after a year at the University of Birmingham, has been getting up his German in the Vaterland, and will spend this winter in the Chemical Laboratory at Heidelberg.

A few weeks ago the *Royal Gazette* announced that the Lieutenant-Governor had been pleased to appoint Hugh McKenzie, Esq., K. C., of Truro, a member of the Board of Governors of Dalhousie College.

Mr. McKenzie is the nominee of the Alumni Association. The Alumni have now two representatives on the Board—Mr. R. M. McGregor, M. P. P., and Mr. McKenzie. The plan is to have three representatives of the Alumni on the Board. These gentlemen are nominated with the understanding that they will resign at the end of three years, when they will be eligible for re-election. The GAZETTE congratulates Mr. McKenzie on his appointment.

Dr. A. C. Johnson (Arts, '04,) has obtained a travelling scholarship in Greece.

Miss Winnifred G. Barnstead, B. A., (Arts, '06,) has been appointed Librarian of Toronto University.

Dr. Aubrey Lippincott, (Arts, '67,) of Boston, who is going abroad for a more or less extended trip, has enrolled himself as a life member of the Alumni. Dr. Lippincott is one of our distinguished graduates who never forgets Dalhousie.

C. H. Cahan, Esq., K. C., (Law, '90,) and family have moved to Montreal, Mr. Cahan having been elected President of the

new cement merger. It is indeed gratifying to see one of our graduates filling such an important and responsible position in the financial world. Mr. Cahan's many friends will miss him from Halifax.

ATTORNEY-GENERAL MCLEAN.

Within a few weeks another Dalhousian has been called to a position of importance in the Province. On October 28th Mr. Alexander K. McLean, LL. B., '92, was sworn in as Attorney-General of Nova Scotia. Mr. McLean was born at Upper North Sydney on October 18th, 1869. He was educated at Dalhousie University, graduating as Bachelor of Laws in 1892, was called to the Bar in the same year, and entered upon the practice of law in Lunenburg. Mr. McLean was elected to the House of Assembly in 1900, and served in that body for three years. Since that time he has represented his county at Ottawa.

The new Attorney-General ranks high among young Canadian public men, and has made a name for himself both at Halifax and Ottawa. The GAZETTE joins with his many friends in congratulating Mr. McLean on his appointment.

Football,

DALHOUSIE 14—WANDERERS 0.

In the presence of about 2,500 people, the largest attendance this year, Dalhousie defeated her old rivals by the above score. After playing such a close game with the Crescents on the previous Saturday, and a report that the Wanderers were superior to that club, the above score was quite a surprise to followers of the league. It is true when we say the Wanderers were out-classed from full-back to forwards. Dalhousie forwards were much lighter, but nevertheless controlled and heeled the ball as they wished. They are in this way responsible for the victory, as they did not give the Wanderers' halves a chance to show their ability to much extent. Their half line is the best the Wanderers have had for many seasons and as far as speed goes

they have the other teams outclassed. Team work the important factor is lacking, and if they improve in this Dalhousie will have to look out or tables may be reversed in the next game.

Dalhousie forwards were strengthened by Cameron and McDonald of last years squad. McLellan took Chipman's place in the front row and played a good game, he with Collie heeling in fine form. The forwards heeled well and followed up. Ralston played his usual heady and dashing game.

Bauld played the game for the Wanderers, his tackling being a strong factor in preventing many a score. Usher and Maclellan played well in the half-line.

Dalhousie kicked off and sent the ball to their opponents 25 yard line, where a series of scrimmages took place and the Dalhousie backs carried the ball to the Wanderers' 5 yard line. From a pass from the scrim, Malcolm bucked the line and scored the Collegians' first try, but Little failed to convert.

Wanderers kicked off and sent the ball well into Dalhousie's territory, but good dribbling by the forwards carried the ball to the Wanderers 20 yard line, where from a scrim, Kenney broke through on the blind end and scored. Wanderers again kicked out, but the ball was returned by Flemming. From a scrim on the Wanderers 25 yard line Russell passed out to Eaton, who carried the ball by a beautiful run to the collegians 20 yard line. Here from a scrim, Usher received the ball and on being tackled, passed to Maclellan, who went over the line but was thrown by Little into touch in goal. Wanderers were given a penalty kick on Dalhousie's 25 yard line, but failed to score.

In the second half, after ten minutes of play, Ross went over the line for the third try which was converted. From now on the Wanderers were kept busy defending their line, and the fine tackling of their backs prevented many a score. However about 5 minutes before time, Ralston crossed their line and scored the last try which was not converted. Time found the ball on the Wanderers 20 yard line.

Mr. Gilbert Stairs was a satisfactory referee.

The teams lined up as below :—

Wanderers.		Dalhousie.
Morrison	Back	Kent
Usher	} Halves	{ Malcolm Flemming Ross Little
Woods		
Eaton		
Maclellan		
Bauld (Capt.)	} Quarters	{ Kenny Ralston
Russell		
Turner	} Forwards	{ Archibald Burris, (Capt.) Cameron McDonald McKenzie Forbes Collie McLellan
Hart		
Dorsey		
Johnston		
Chipman		
Doyle		
Graham		
Drury		

The intermediate game was won by Dalhousie the scoring being done in the last fifteen minutes of play.—Score 6-0.

DALHOUSIE VS. WANDERERS.

Saturday November sixth, witnessed one of the hardest games of the year, and the Wanderers changed a score of 14-0 against them in the previous game to an even break of 3-3.

The Wanderers always play a good game, even when it is a losing one, and the yellow and blacks were not in good form. Norm was missing and it is impossible to fill his place. Burris was nursing a broken collar bone, and the Wanderers' halves, strong as usual, pressed hard into Dalhousie's territory.

In the first half Dalhousie's "forwards" showed up strong and generally had control of the ball in the scrim, but the Wanderers were more aggressive in the last half and within the last seven minutes the ball was always in Dalhousie's territory. Some strenuous work was done and some hard runs were only stopped on Dalhousie's line by Kent's splendid tackle. Back and forth the ball went without any score on either side, until little "Bung" tucked the pigskin under his arm and went over the line for a touch. A minute later and the first half was over. Dalhousie 3, Wanderers 0.

Right at the start of the second half the Wanderers carried the ball to the college end, but not to touch. — The Wanderers were given a free kick but it was soon returned, and the play was in the Wanderers' territory, till Eaton by a drop kick sent it down the field, McLellan dribbled it to the 10 yard line and in the scrim that followed, Woods carried the oval over, amid cheers from the South bleacher.

No further *tries* were made though the game was strenuous and the whistle blew with the score standing 3-3.

Louis Buckley had a most difficult game to referee but handled it in admirable manner.

DALHOUSIE 13—CRESCENTS 3.

By defeating the Crescents by the above score the collegians again have won the trophy for the tenth successive year. The college did not expect to win by such a large margin after being so hard pressed by the Crescents at the first of the season. Also the college played without two of her regular men, namely Collie and Ralston.

Dalhousie's forwards are really responsible for the victory. Although weighing less by fully fifteen pounds than the Crescent forwards, they managed to heel the ball oftener and control the ball more effectively.

The first half found the Crescents on the defensive, their backs tackling hard. It was in the second half and during the first fifteen minutes that "Dal" found an opening and broke through for three scores. Flemming who took Ralston's place played his best game, and not only was he responsible for the first try, but also aided strongly in the others.

The Crescents' backs played a strong defensive game and the punting and tackling of Philips well earned him the reputation of being one of the very best of backs.

From the kick off, Dalhousie carried the ball to the Crescent's line, but Philips receiving the ball from the scrim, relieved by one of his long punts to mid-field. From here Walker broke through and dribbled and carried the ball to "Dal's" 25 yard line. From here the Crescents carried the ball over, but both teams fell on it and the ball was brought out

and scrimmaged at the 25 yard line. Little relieved by a punt sending the ball into touch. From a scrimmage the ball was carried by good passing by the college backs to the Crescents 5 yard line. Here the Crescents were forced to touch for safety.

In the second half and the first fifteen minutes, Dalhousie rolled up about as many points.

Crescents kicked off and Little returned to their 25 yard line. Here from a scrim, Thomas passed to Flemming, who broke through the Crescent's defence and scored. Try was converted by Little. Crescents dropped out and Malcolm returned to their 25 yard line. From a pass from the scrim, Malcolm went over for the second try, Little failed to convert.

Crescents dropped out and ball was returned by Ross to centre field. From here Dalhousie's forwards dribbled to Crescents 15 yard line. From a pass from the scrim, Flemming again connected and Little converted. From now on the ball travelled from one end of the field to the other. About five minutes from the end of play, the Crescents by good passing among their backs placed the ball squarely between the posts. Phillip's failed to convert.

D. S. Bauld refereed satisfactorily.

Following is the line up:—

Dalhousie.		Crescents.
Kent	Backs	Smith
Malcolm	} Halves	(Hunter
Flemming		(Bowser
Ross		(Phillips
Little		(Eckersley
Thomas	} Quarters	(Brown
Kenney		(Bourne
Archibald	} Forwards	(McQuillan
Burris (Capt.)		(Walker (Capt.)
Cameron		(Robinson
McDonald		(DeBon
McKenzie		(MacDonnell
Forbes		(Montgomery
Lawrence		(Mullins
McLellan	(McLeod	

The intermediate game between Dalhousie and Crescents was an easy victory for the former, score being 8-0.

DALHOUSIE VS. HORTON ACADEMY.

On November 1, Dalhousie's Junior team played Horton Academy on the Wanderers' grounds. The result was the same as last year, namely, a victory for Horton, with a score of 5-3. Dalhousie was the first to score, McKay converting a difficult penalty kick. From this stage of the game Dalhousie seemed to rest, feeling quite confident of the result. On the other hand, Horton was rushing hard and playing to a finish. About ten minutes from time she succeeded, by pretty passing along her half line, to score, and the try was converted. Horton played four of Acadia's men, but nevertheless the game was close. Hard following up and playing strong until the end always tells, as it did in this game. The next time Dalhousie plays that kind of a game no doubt the result will be different. Louis Buckley was a satisfactory referee.

Field Day.

Dalhousie's annual field day was held on the Wanderers' grounds on October 7th. The weather on account of the cold was unpleasant to the spectators, but ideal for the competitors.

The events were closely contested and the record in the shot-put was lowered by D. A. Cameron, who in an exhibition throw put the sphere 35 feet, thus beating the old distance by 5½ inches.

Cameron also won the all-round championship, obtaining three firsts and one second. He was closely followed by Seymour McKenzie with three firsts, by winning the dashes.

The walking race as usual had many competitors. "Little Bung" crossed the line first, but the judges decided he had used a mixed gait. The race was won by Chapman.

The Inter-Faculty Championship was won by Arts '10 and '12.

The following is a summary of the results.

FIELD DAY.

EVENT.	FIRST PLACE	SECOND PLACE.	THIRD PLACE.	TIME OR DISTANCE	RECORDS.
100 yards Dash.....	McKenzie.	Fulton.	James.	11 sec.	10 2-5 s., H. W. Flemming, '08.
220 yards Dash.....	McKenzie.	Fulton.	26 sec.	23 3-5 s., J. H. Hearn, '05.
440 yards Run.....	McKenzie	Nicholson.	McKay.	58 4-5 sec.	54 2-5 s., M. J. Carney, '01.
880 yards Run.....	Patterson.	James.	Fraser.	2 m. 17 2-5 sec.	2 m. 8 s., W. C. Ross, '08.
1 Mile Run.....	Leslie.	McKinnon.	5 m. 28 2-5 sec.	5 m. 4 3-4 s., T. Murphy, '86.
Running High Jump.....	Cameron.	Dickey.	Stewart.	5 ft. 4 in.	5 ft. 5 in., D. A. Cameron, '08.
Hop, Step and Jump.....	Cameron.	Nicholson.	Fulton.	37 ft. 11 in.	41 ft. 10 in., D. A. Cameron, '07.

Inter-Faculty Relay Race.	Arts '10 & '12	Arts '11 & '13	3 m. 58 1-2 sec.	

Senior Theatre Party.

The title, "The Social Leader of Dalhousie," which was given to the class of 1910, in its junior year, still holds good. The series of social triumphs, which marked its career last year, are still remembered with delight by the members of the class, and with envy tempered with admiration, by the under classes. This year promises to be even more brilliant and successful, if that be possible.

The first social meeting of the class of 1910, was on Tuesday evening, November second, taking the form of theatre-party at the Academy of Music. The play was "The Manx man" by Hall Caine, and was one presented by the Harkins Company. After the play, between forty and fifty "stately seniors" gathered at Patrick's for supper. After supper the glasses were filled, and Mr. E. Forbes, the president rose to announce the toasts. "The King" was drunk first, then followed a toast to the University, proposed by Mr. Davis, and replied to in a very witty and clever speech by Mr. J. C. MacLennan. Mr. J. P. MacIntosh next proposed the class of 1910. "1910" echoed down the long white table, and every one drank heartily and enthusiastically.

If the '10 girls, for the next few days appeared to walk on air and be exalted far above ordinary mortals, it was due entirely to the speeches made about "The Ladies," by Messrs. Harvey, W. C. Ross and Milligan, that evening. Mr. Harvey proposed the toast, while Mr. Ross and Mr. Milligan replied to it, in speeches which made the girls wonder if they were ordinary, college girls or really answered to the description of the superior, wonderful being akin to the angels, which seemed to be the product of the theological mind. Last, but decidedly not least, was "Our Chaperon", proposed by Mr. T. M. Creighton, and replied to by Mr. F. M. Dawson. Mrs. Sexton expressed her thanks and appreciation of 1910 most charmingly, and after "Auld Lang Syne", and the class yells, a very delightful evening was brought to an end.

Delta Gamma Debate.

The annual "Freshy-Soph." debate, brought a goodly number of girls together at the Delta Gamma meeting, held Saturday evening, November sixth, at Mrs. Armitage's, 90 Spring Garden Road. The subject of debate was,—“Resolved that travelling gives a better general education than a college course.” Miss Boak and Miss Bligh of the class of '12 supported the resolution, while Miss Allen and Miss Unlah of '13 opposed it. Miss Dennis '10, Miss Clay '10, Miss Grant '11, were appointed judges, and Miss Zillah MacDonald kindly acted as critic. At the close of the debate, Miss MacDonald gave a very just and thorough criticism. The judges then gave the decision in favour of the Freshettes. It is only fair to say, that while the debate was carefully prepared, and well presented by all four, the '13 girls,—Miss Allen particularly—surprised every one by fluency, accuracy and point of their speeches. There seems to be a very welcome revival of interest in debating in Delta Gamma as well as in Sodales.

After a vote of thanks to our hostess, the girls sang college songs, discussed the debate or football, and enjoyed the dainties for which all Delta Gamma hostesses are famed. The subject of a college residence for Dalhousie girls was also talked over, and it was found that almost every one eagerly desired such an innovation to take the place of various and scattered boarding houses, both for the added comfort, it would bring to many and for the increase of college spirit and comradeship among the girls.

College Notes.

Y. M. C. A.—The first of the Saturday evening Union meetings of the Y. W. and Y. M. C. A. was held on October 30th, with Mr. W. C. Ross in the chair.

The large crowd of students that assembled in the Munro Room testified to the popularity of the speaker, Mr. W. P. Grant, M. A., one of Pine Hill's most brilliant students. His subject was "The Prophetic Element in Modern Life."

Miss Munnis sang a beautiful solo, which was highly appreciated by all.

The first of the Sunday afternoon lectures, given under the auspices of the College Y. M. C. A., was delivered on November 7th, in the Munro Room, to a very large and attentive audience of students. The speaker secured for the occasion was Rev. H. F. Waring, M. A., and President Forrest acted as chairman.

The subject upon which Mr. Waring spoke was "Christian Sociology," one with which he is well acquainted. That he knew his subject well he conclusively demonstrated by the admirable way in which he dealt with it Sunday afternoon. After the address, a beautiful solo was sung by Mrs. Keely.

The chairman, in the name of the students, thanked Mrs. Keely and Mr. Waring, and the hearty applause which followed showed that both the solo and the address had received the high appreciation which they deserved.

ARTS AND SCIENCE.—October 29th. The subject for debate at this meeting was: "*Resolved*, That the study of German and French is more beneficial to the college man than the study of Latin and Greek."

The resolution was upheld by Messrs. H. P. Bell and H. M. Blois, and opposed by Messrs. A. D. Fraser and W. C. Ross. The speakers in the general discussion were Messrs. A. T. McDonald, Parker, Brownell, Davis, Livingstone and Murchison.

On a vote of the meeting, the resolution was lost. Mr. H. S. Davis acted as critic.

November 5. The subject for discussion was: "*Resolved*, That municipal ownership of public utilities is to the best interest of the Canadian city."

The resolution was upheld by Messrs. J. K. Murchison and J. K. Swanson, and opposed by Messrs. George E. Herman and J. H. Logan. Those who took part in the general discussion were Messrs. Milne, Creighton, E. J. Fraser and Read.

By a vote of the meeting, the resolution was sustained. Mr. C. L. Gass gave an interesting critique.

SODALES.—October 21st. The debate this evening was between Law and Arts, '10 and '12. The subject for discussion was: "*Resolved*, That it would be better for Canada to contribute to the support of the British navy than to support a separate fleet of her own."

Messrs. A. B. McKinnon and B. W. Russell supported the resolution for Law, and Messrs. J. P. MacIntosh and W. J. McLeod opposed it for Arts.

Messrs. McLellan, Sutherland, Blanchard and Milligan spoke in the general discussion.

The judges—Messrs. Thomas, Hall and McDaniels—decided in favor of Arts. W. A. McDonald was critic.

At this meeting a committee, consisting of Messrs. Coffin, Calder and Mavor, was empowered to select a suitable medal for inter-collegiate debaters.

October 28th was "open night" in Sodales. "Open nights" are certain nights set apart by the executive of Sodales this year for the discussion of probable inter-collegiate subjects by students who may become eligible for inter-collegiate honors.

The subject for debate was: "*Resolved*, That International Trades Unions are in the best interests of Canada."

Messrs. F. M. Dawson, A. D. McDonald and J. C. McDonald supported the resolution, while it was opposed by Messrs. A. Sutherland, A. T. McKay and L. M. Fulton.

It being open night, no decision nor critique were given.

November 4th. The subject for debate was: "*Resolved*, That the House of Lords should be abolished." The resolution

was upheld by Messrs. Earle and Parker for Arts '11 and '13, and opposed by Messrs. J. C. McLennan and Duffy for Arts '10 and '12.

Those who took part in the general discussion were Messrs. J. C. McDonald, MacIntosh, Milne and Livingstone.

The judges decided in favor of Arts '10 and '12. Mr. Farquhar acted as critic.

On motion, it was decided that a levy of twenty-five cents should be imposed on every student, and that the levy should be collected by the class secretaries.

November 11th. The subject for discussion this evening was: "*Resolved*, That disarmament by the great nations would be in their best interests."

The speakers for the affirmative were Messrs. Johnson, E. J. O. Fraser and Archibald, and for the negative Messrs. D. A. Cameron, Vair and Milligan.

As it was open night, there was no general discussion, decision nor critique.

Mr. A. T. McDonald was appointed to succeed Mr. Calder on the committee for the selection of medals for inter-collegiate debaters.

U. S. C.—The regular semi-annual meeting of this Society was held on October 19th. After the minutes of the previous meeting had been read and adopted, Mr. A. Sutherland, business manager of the GAZETTE for the year 1908-9, presented a very satisfactory report.

On motion, the Dalhousie Alumnae were granted the privilege of appointing an editor for the GAZETTE. The nights of Thursday and Friday, January 6th and 7th, were granted to Medicine and the Delta Gamma respectively for their "At Homes."

At this meeting it was announced that the Senate wished all applications for the College building for the purpose of holding "At Homes" to be sent in and dealt with by the University Students' Council, and on motion the executive were empowered to deal with all such applications. It was also

agreed that the usual annual levy should be imposed on the students.

November 11th. A special meeting of the U. S. C. was held on the above date, with the President, W. C. Ross, in the chair. The chief business before the meeting was to arrange for choruses from the students in the audience on Theatre Night. A committee, consisting of Messrs. Thomas, Bell, Deblois, A. T. McDonald and Major, was appointed for this purpose as well as for providing the students with tickets.

On motion of Mr. Forbes, seconded by Mr. Hall, it was resolved that the expenses of last Convocation be paid by U. S. C.

Y. W. C. A.—On October 21st the Y. W. C. A. met as usual, with the President in the chair. After the opening exercises, Miss Maude Stevens read a very interesting study of the character and work of the Apostle Paul. The number of students present was small, so a committee was appointed, one from each year, to give personal invitations to the girls.

The next was the Thanksgiving meeting. A large number were present and heard a helpful paper from Miss Frances Grant. Thanksgiving began with the creation, and is the only duty that will still be a duty in the next world.

On November 4th Mr. Waring spoke to us on "The Necessity of Decision." He urged us to remember, in this age of doubt, that some certainties are necessary for the doing of any good work in the world, and that the most important is certainly regarding our relation to Jesus Christ.

At the next meeting, owing to the absence of the President, Miss Outhit took the chair. Miss Gladys Marsters read a paper on Missions, with special reference to those in India. She brought before us some of the hindrances and hardships of missionary work, and made us ashamed of our indifference—the greatest hindrance of all.

Specially designed Christmas greeting cards for Dalhousie University students have been prepared by Connolly, the Stationer. The ground work is yellow, and stamped in black

is the crest of the College, together with the words, "Dalhousie, Christmas, 1909." On the inside the season's greetings are printed. Altogether the cards are a good combination of the University colors. Price 10 cents.

The Alumnae Association.

The semi-annual meeting of the Alumnae Association of Dalhousie University was held in the Arts Library of the College on Tuesday evening, November 9th, the President, Miss Jean Forrest, in the chair.

The reports of the Treasurer on the finances and of the Corresponding Secretary on the boarding houses were read and adopted.

A Membership Committee, with Dr. Eliza Ritchie as Convener, was appointed by the President.

It was moved, seconded, and carried that the Alumnae Society be affiliated with the Local Council of Women.

The President, in a brief address, spoke of the need of a residence for the women students of Dalhousie, and suggested this scheme as a worthy object for which the Association might work. After general discussion, it was agreed that the Society devote its energies to the establishment of a residence for the women students.

The President announced that a course of ten lectures on Art would be given by Dr. Ritchie and Professor James Falconer during the winter months. The proceeds of the course are in aid of the funds of the Alumnae Association.

On motion, the meeting adjourned.

Exchanges.

Good language should be found, if anywhere, in the life of a university. Too often, however, the ruder forms of expression prevail. Slovenly speech and careless diction creep frequently into the college cloisters. Canadian academic utterance is in little danger of assuming the pedantic. Our life is too strenuous for puristic niceties of articulation. Let us beware lest inattention to language lead to egregious blunders in intellectual workmanship. "Most fundamental falsehoods are errors in language as well as in philosophy," writes a well-known English publicist.

—*McMaster's Monthly.*

NIGHT.

The purple sunset hills are charred with red,
And twilight trembles with the gentle lay
Of song birds' vespers for the fading day,
A thousand fire flies glow above the bed
Of yonder willow shrouded stream. O'er head
Night spreads the meshes of the milky way.
The moon has paled the east. Her searching ray
Is rolling back the hovering shadows dread.
The dew is drenching every leaf and flower,
Dim mists arise beneath the gloomy trees,
Whose spectral branches all are wreathed in white
The darkness now is at its deepest hour,
But all the land has sensed the downing breeze,
And stirring nature wakes from out the night.

—*The Dial.*

Medical Professor—"What is the result, young gentlemen, when a patient's temperature goes down as far as it can?"
Student—"Why-er-he gets cold feet!"—*Ex.*

"It is a wise son that owes his own father," parodied the genial junior as he drew a ten-spot from a paternal epistle.

—*McMaster's Monthly.*

HE LIVED THERE ALL RIGHT.

An *anxious* father got wind of the rumour that his son was leading rather a convivial life at college. But the son strenuously denied the charge in letters to his father. Still unsatisfied, the father made an unexpected visit to his son's lodging place, and giving the bell a manly pull, was met by a grimfaced landlady.

"Does Mr. James Smith live here?" asked the father.

"He does," replied the landlady. "Bring him right in."

—*Ex.*

"As Charles was going out one eve,
His father questioned "Whither?"
And Charles not wishing to deceive,
With blushes, answered "Withher."—*Ex.*

PRIVATE GREETING CARDS

to send to your friends at Christmas and New Years.

Each card has the College Seal embossed on the yellow cover and Dalhousie University and date printed in black. On the inside the season’s greetings are printed with space to sign your name. These cards are new in Halifax and can be had from

**Connolly, the Stationer,
127 Barrington Street.**

Prof. in Physiology—“I presume you understand me, Mr. Tait?”

Mr. Tait—“I do, by Gum!”

B. J. McD. to Eben, pointing to a young lady—“Is dat one fit to eat with?”

Dedicated to Freshman Mack-s-y :

He is only a freshman in medicine,
Yet he knows more than Doctors old,
He is only a small little fellow,
Yet he’s in for distinction we’re told.

It has been reported that H. B. Atlee, Esq., the Caruso of the Medical College, has condescended to accept a part in the chorus of the College Opera.

* * * * *

Iv-n R-lst-n to leading lady, who has asked him if he could keep a secret—“I’m not a woman; I’m a lawyer.”

Prof. Magill, looking for chalk in class—“I bring chalk here every day, but I think my colleague who precedes me must swallow it.”

1st Freshette—“Did you have a topic with the Sophomore President?”

2nd Freshette—“No; did you?”

1st Freshette—“Yes, and oh! he’s just lovely.”
