5BX IS GREAT IN THE MORNING

On King's campus

Student"sacrificed" to appease war gods

BY HOWARD EPSTEIN

Gazette Staff In the finest tradition of protest by the academic community, King's students have sacrificed a companion to appease the war

Shortly after nine Friday evening a select group gathered on the steps of King's to witness the spectacle which was accompanied by the sounds of Barrie McGuire and his "Eve of Destruction.'

A procession of about a dozen mournfully-wailing, sheet-clad, samiffical priests entered the King's square carrying on their shoulders a large cardboard coffin. They placed the topless container upon an impressive snow altar which had been built in taken steps to alleviate the need the middle of the square and for cheap accommodation,

Grant new honoraria system

By LIZ SHANNON

A new system of granting honoraria for the 1966-67 term was passed at last night's Student Council meeting.

Council will rebate fees for both the President of the council and the editor of the Gazette. Other honoraria will be awarded to the Treasurer of the Students Council, the Photography

department, and the Recording Secretary. Council did away with a \$150 honorarium to the editor of

Pharos and rejected proposals giving honoraria to the president of D.G.D.S., the chairman of Winter carnival, the Vice-president of Students Council, and the Gazette staff. However, council did vote it-

self free passes to all campus functions. This applies to all council members and their dates. Honoraria are given to reward

the students in various positions for services rendered and time spent in fulfilling the obligations of an office. In past years honoraria of var-

en to the President of the council, the editor of the Gazette, the editor of Pharos, the photography department and the Secretary.

The amounts of these awards were set five years ago and the new award system was drawn up because the work loads of the various offices have changed considerably.

This week at Acadia University, which has traditional ties with reflected on the university as a whole, the Baptist Church, college officials impounded 700 copies of a The controversial photo, of an Acadia University, which has traditional ties with reflected on the university as a whole, student published calendar. Have several times.

The solution will take the form of a Law House, situated at 1255-57 Seymour Street, which will be operated by the students under an incorporated society known as the Domus Legis Society (Latin for 'The home of the law students').

After many months of research and preparation with operating costs, feasibility study and inquiry into available real estate in the vicinity of campus, the students settled on the Seymour Street property, which is a mere two minutes walk from the present Law School Building and about thirty seconds from the faculty's new building on University Avenue. The University will be the society's landlord charging rent in keeping with current return on the realestate market which the society plans to maintain for many years. While providing facilities at a low cost to the students, it is hoped that sufficient equity will be accumulated at this location to finance further projects of this kind as the faculty's enrolment

Issues in Dalhousie-King's, Council Debate

King's students must pay for benefits derived from Dal

There is no need to go into the history of Dalhousie-King's relationships, for the editorial in last week's Gazette adequately covers this area. I would recommend this editorial to anyone who is seriously interested in understanding the forces and circumstances that are influencing the present situation.

Let me say at the outset that the committee and the Dalhousie Students' Council consider this "dispute" to be a student matter, and as such, should be "arbitrated" solely by students. The monies involved, and the administrative changes proposed in alternative, are concerned solely with the respective councils, and in no way should the administrations be involved. We are very unhappy that President Smith of King's has seen fit to invoke a

a 1954 Article of Association, thus creating a committee composed for the most part of officials of the University Administration. The Dalhousie Administration, understandably, does not wish to become embroiled in what they deem to be a student affair, and at this stage in negotiations it remains to be seen what committee will meet with The intent of the Dalhousie

Council motion is not to "erase"

King's nor to destroy any of the

traditions, or pride in these tra-

ditions, so cherished by King's

ERIC HILLIS students. Dalhousie's position is this: for the past several years it has become increasingly obvious that there is an interming-

ling of students from both institutions in many aspects of extra-curricular activities. As a result of this inter-mingling, negotiations have been carried on at various times to set a fair price that Kings' students should pay to the Dalhousie Council for these privileges. At the present moment, this levy is set at \$1.75. This levy is ridiculously low: Kings' students receive for this amount almost exactly the same privileges for which Dalhousie students pay in excess of twenty

To correct this situation, the

Dalhousie Council sees three possible solutions:

(1) administrative amalgamation at the student council level (2) assumption by King's of responsibility to pay complete Dalhousie Council fees.

(3) complete removal of Kings' students from all aspects of Dal extra-curricular activity.

The first suggestions is, to my mind, the most efficient, Amalgamation would involve the creation of a Dalhousie-King's Council. King's would place representatives on this Council under the present representational provisions of the Constitution, which would give them two representatives on the Dalhousie Council. King's would forward an amount equal to the amount paid by Dalhousie students for common activities.

"Common activities" would have to be carefully discussed to discern what activities King's would like to and could reasonably retain, e.g. debating, CUS membership, etc. This would have the effect of creating one resentation from all students on campus. At the same time, King's would have their own council for internal regulation of such activities as they retained. In this

_Please turn to page 8

King's wants assurance of student activities, status

Despite Dalhousie's rather haughty "pay up or get out" attitude. King's student union looks forward to the upcoming negotiations for the renewal of the agreement with an open mind.

Although Mr. Hillis seems to

think otherwise, King's is anything but a "tradition ridden charity case" New initiatives have been taken by the Council and various clubs in all fields and traditions such as the Haliburton reasonable and practical answer. Literary Society have been successfully revived. The Council provides academic services including tutors in all freshmen subjects and special counselling by King's professors and dons social activities proliferate and are highlighted by a newly rennovated common room complete with piped-in music and weekly dances; a news bulletin and Gazette, President of King's Stu- by a richer and larger university, events schedule is published each dent Union, Secretary Treasurer and to participate in the smaller Monday; work on a handbook and of Association of Atlantic Stuproposed "anti-calendar" is in dents, Fourth year Honors Eng- a smaller college. progress; the dramatic society lish, resident in Chapel Bay, will have staged over half a King's Men's Residence, WUSC

From 1949 to 1952 he was a teaof Nebraska. He joined Dalhousie in 1953 and in 1962 was appointed professor of mathematics.

Married, and with two children, Dr. Tingley is a member of the Canadian Mathematical Society, The American Mathematical Society, the Mathematical Association of America and the Canadian Mathematical Congress.

Dr. Tingley has been active in the improvement of school math- of the time.

Barb Dexter

Busy Arts rep

This week's Council representative is Barbara Dexter. When not spending her long working day in the Arts library, she is doing what she terms "odds and ends" for Student Council.

Barb, a Halifax native, entered Dalhousie from Queen Elizabeth High School on a \$500 scholarship. In her high school years she managed to become an integral part of her school life. Not active work at the University of Minne- at this time in Student Government, Barb ably represented her school on the basketball team and in the school choir. She also spent time on her studies, as results have shown.

In this her third year at Dal, Barbara is an Honours History ching assistant at the University student, having managed to hold her \$500 prize in her sophomore year and gain \$400 for her junior year.

This is her first year on the Student Council at Dal. She says she finds the work "most interesting and informative", but "I do not feel I am politician enough for Council."

Part of the eight to ten hours spent weekly on Council business is involved in Pharos work and Student Health. Barb is also a liason between I.S.A. and the Students' Council.

In addition to her "required duties" Barbara finds time to work on the circulation staff of the Gazette, and belongs to Alpha Gamma Delta Fraternity. Being secretary last year and this year first vice-president of the fraternity keeps Barbara running a lot

ematics teaching and has been chairman of the Provincial high investigate what part Dal can play in the National Centennial Project for 1967. No wonder for Barbara life is "just one continuous Hi!"

Sunday Feb. 6th Take vacation "Down North"

Two-fifths of Canada in silent exciting northland

"Down North", life is very different; just how different is something few Canadians appre-

Two-fifths of Canada lies North of the sixtieth parallel. Yet, in this enormous area of some million or so square miles lives a mere one-fifth of one percent of Canada's population.

In the Northwest Territories this gives a population density of roughly 0.02 persons per square mile, while in the Yukon they are rubbing shoulders at 0.08 persons per square mile. The overall figure for Canada is 8.3 persons per square mile.

Most people imagine the North as a permanently frozen, colourless place and find it hardly believable that people can live here in comfort. It is true that the climate tends to be rather extreme, but it is predictable, which is more than one can say for the Maritime climate.

In the winter, temperatures may go as low as 50, 60, or even 70 degrees below zero - not to mention the "lazy winds" that go through you rather than round you. In the summer however, it is not too unusual to have the temperature go as high as the upper 80's - and of course we do have 24 hours of daylight per day for a couple of months in the summer, and we can swim in the shallower lakes which warm up very quickly. One lake at Yellowknife does service as a swimming area in the summer, and is used for stock-car racing on 5 feet of ice

Some sights are unique to the North. Have you ever seen the Aurora Borealis stretching clear across the sky, rustling and moving like gigantic coloured curtains, illuminating the countryside? In the right place at the right time one may watch upwards of 10,000 caribou amble past with the easygoing gait of Irishmen going to a funeral wake.

When travelling in the North one often has difficulty in grasping its immensity. One may fly all day, seeing nothing but the sheer silent, empty land stretching away to the distant horizon.

A line drawn from a point just North-West of Great Bear Lake, South-East to Churchill on Hudsons Bay approximates the Northern limit of the trees. North of the tree-line lies the Barren Grounds: a vast area of countless hills, grey lichen-covered rocks, portent of doom. and long eskers twisting across the landscape like huge veins. rolling in the spring snow like from the government.

Exkimo Exhibits

sparrows, with the occasional ra- The Eskimo makes a wonderful lakes and rivers, low rolling ven flapping across the sky like a companion and a true friend. They deserve a better deal than they On one occasion I saw 7 wolves are getting at the present time

Dalhousie graduate student Michael Hewitt has vacationed in the Canadian northland, and reports that life is "very different" there, though just how different, "is something few Canadians appreciate". He describes his companionship with the Canadian Eskimo and captures the feverish activity of geologists, sportsmen, bootleggers and the law at Great Slave Lake. The glow of chilblains and howling dogs have caught Mr. Hewitt's imagination in the North West Territories where he has a Yellowknife address. He plans to head "Down North" once more, this spring.

Summertime in the Great Slave Lake area is a period offeverish activity, with tourists (a strange race) fishing for 50 lb. trout, geologists searching for precious minerals, and the R. C. M. P. looking for bootleggers. The R. C. M. P. usually have the most suc-

cessful season. Visitors to the North always vow to return, for this is pioneering country in many ways, and one may still see unshaven and highly aromatic characters returning from the bush with a hopeful gleam in their eye. One such prospector once told me of a hard winter he had spent under canvass, and swore that he once had his coffee freeze so fast - the ice was still warm.

When weighing up the pro's and con's of living in the North, two big advantages emerge. First, there is no television, and second it is too far for my mother-in-law

Other things we go without in the North are traffic congestion, air pollution, Cassius Clay, and A GO-GO-GO-.

You may think that I am mad, (a view firmly held by my motherin-law) but next May I am going to hurry back "down North", and this time next year will be basking in the gentle glow of my chilblains, listening to the dogs howling outside.

In the event that this article has aroused your curiosity and you wish to know more, I suggest you purchase a book called, "The Unbelievable Land", edited by I. Smith and published by The Queens Printer at \$2.50. The book is beautifully illustrated, and deals with every aspect of the North, from Eskimo's to permafrost. I would suggest however that a visit "in the flesh" has no substitute. If American students can work there in summer, I see no reason why we shouldn't.

Garbage is Good

"YOUR TURN TO CURTSY MY TURN TO BOW" A study in Bathos.

By Fraser Sutherland One should frequently read a bad book. And incidentally "bad" is a critical, not a moral evaluation. Fortunately there is no shortage of badly written books;yet there is of those qualifying as genuine suitably smelling garbage. Such a book is "Your Turn to Curtsy My Turn to Bow" by William Goldman, publisher Bantam Books. People used to speak of penny dreadfuls, this is a 50

cent dreadful. Reading an impossibly bad book sharpens one's perception. Genuine garbage improves the reader's critical faculties. The paperback jacket for "Your Turn." has a girl clutching a pillow beneath her chin; she is staring wistfully into space. A boy lays beside her, one hand on her bare shoulder, the other fingering her beautiful hair. The bedspread is rumpled. A covering comment near their provocative postures says, "The frank and tender portrait of a seventeen year old boy and his initiation into physical love." The publisher's blurbist at

times is more impressive than the author. He calls the book a Of course, their lives have not "remarkable achievement to been just fun and good times. slash through the veils of for-Their suffering, deprivation, and getfulness and hypocracy which degradation is only too clear, and are drawn over the passionate when one considers the feeling years of youth, and to reveal with which they sing about their the truth with precision, clarity

> sationalism and of quality. One scene in "Your Turn" gives it the former but not the latter. Peter Bell is big, seventeen,

Had origins in jail

Freedom Singers in Halifax

Singing rarely eloquent,

but treats civil rights bluntly

By STEPHEN POTTIE

Who are the Freedom Singers? That 'question was probably written by Chico Neblitt, one of asked by the Dalstudents who the Freedom Singers, and the heard them in the canteen on Thursday or by anyone who acci- Land" dently saw one of the skimpy posformances in Halifax. Four hunon Friday night in the Queen Elizabeth High School auditorium.

For the uninitiated, the Freesom Singers consist of five negro singers and one white guitarist, who speaks of himselfasthe "integrator" of the group. They are all field secretaries of the Student Nonviolent Coordinating Committee, or as it is better known SNCC (snick). SNCC is dedicated to the achieving of full civil rights for, the negro. The Freedom Singers, who had a romantic beginning in jail, are on a Canadian tour, raising money for the organization.

Sadly , I must report that the QEH show was technically (apart from the actual performance). subject to a serious blunder. The emcee, Mr. Joe King, is a very good interviewer and reporter but his qualities as a master of ceremonies are somewhat limited. He reviewed the concert before it started and was incapable of talking to the Freedom Singers without being jokingly insulting and patronizing.

However, the actual per-formance was anything but amateurish. The Freedom Singers wove a spell around the audience that was hard to shake. Their songs dealt frankly and bluntly with the civil rights movement; the beatings, the dogs, the hatredon both sides -- the apathy, and the morale of the civil rights workers and negroes. The songs were rarely eloquent or polished. They reflected the hurried and impulsive desire for "Freedom Now". As with most freedom songs the lyrics rarely matched the thought. However, there were

The New Curriculum

The new curriculum is a vast improvement over the present system. Indeed there is every indication that its' adoption will be just the right measure to maintain Dalhousie in a top-ranking position among Canadian universities. If Nova Scotian students are now to be forced to endure one more year of high school purgatory, at least something better awaits them when they finally arrive on campus. The faculty and administration are to be congratulated.

The new curriculum will come into effect next September. All students now at Dalhousie will not qualify for the new curriculum, all new students entering the university will be required to have senior matriculation standing - Grade XII in Nova Scotia. This means that they should be able to obtain a pass degree in three years and an honours degree

Under the new system the subjects are divided into four groups. GROUP A contains French, German, Greek, Latin, Russian and Spanish, GROUP B, Classics, English, History and Philosophy. GROUP C, Economics, Political Science, Psychology and Sociology. GROUP D, Biology, Chemistry, Geology, Mathematics, and Physics. This is an obvious arrangement of disciplines.

In order to obtain a General B.A. the student must complete fifteen courses. In his first year he will be required to take one from each year he will

from each group plus one option. In addition he is required to take English (though students with a mark of 80% on their matrics who pass a special examination with 65% will be exempted from this regulation) in the first or second year. However, and this is an important change, any student who has passed (i.e. 50%) a science in Grade XII will not be required to take a subject in Group D. This is a very progressive step, though in our opinion there should not be any regulation requiring a science or a math for any student who qualifies to enter the university. There is little value for the unscientific Arts student in playing the scientist in first year laboratories. In the second and third years, ten more classes are to be taken, six beyond first year courses, in two subjects, one to be designated as a "major" the other as a "minor" plus four options in other fields.

There are similar radical changes in store for the embryonic science student. In the first year he must take two classes in Group D, one in Group A, one from B or C, and one option. In the second and third years the remaining ten courses are divided as six beyond the first year level in a science (Psychology is now to count as a science for this purpose) plus four others which should be non-science. In any event, he is required to take one class in Math, one in English, one in another language and at least two other non-science courses.

Commerce students will have a somewhat more restrictive program. In the first year they will be required to take two Commerce courses, English 100, Economics 100, and a Science course if they do not have a credit from high school. In second year they must take two more Commerce courses, Economics 200, a course in Political Science, and either Mathor Philosophy, though the head of the Commerce department may grant students an exemption from this last category. In aird year they must take four courses either in Economics or Commerce plus one option.

It is obvious however, that under the new system many students will be encouraged to take the more formally organized honours program and stay four years for their degree. First year is to be the same for all students and at the end of the year students may apply to take the honours program. If accepted they must then decide whether they wish to take a "major program" in one subject, or whether they wish to take "combined honours".

If they choose the former they must make up the remaining fifteen courses by taking nine classes beyond the freshman level in one subject, plus two classes in a related field,

plus four others, not in the major field. If they choose to take combined honours they must take eleven classes beyond first year in two allied subjects, though not more than seven in either subject, plus four others in different fields. All honours students are under the supervision of their department.

In order to obtain standing a student must have an overall average in his honours courses of 65% (80% for first class honours) plus, and this is a new addition, a general average at each set of examinations of 60%. In actual fact this latter requirement will not be any burden for the honours student since most of his marks should at least be in the 60's and since he will no longer be required to take a number of compulsory subjects which he might very well loathe; and hence do poorly in them.

As an example of the new honours program we may consider the English department where three combination honours programs are offered; English and French, English and History, and English and Philosophy. Or the Political Science department will offer combined honours in Political Science and Philosophy, Political Science and Economics, and Political Science and Sociol-

Other points of interest about the curriculum which comes up for final approval before the Arts and Science Faculty Council this Tuesday are the "point system" the summer school regulations and the suspending of the Bachelor of Fine Arts program for 1966-67. The Gazette is disappointed that the rule permitting a student to take only one summer school course is to remain in effect. Other universities allow two courses to be taken and for most students, there is sufficient time in the summer to do this successfully. Also, since the present dates of the summer school almost always preclude obtaining a decent summer job and after the session, the faculty council might well consider recommending to the Senate that the length of the summer session be lengthened. This would permit students to easily take the extra course.

The point system is aimed at preventing the borderline student from obtaining a degree. Points are awarded for classes of marks, so that a mark from 80 to 100 is worth 3 points from 65 to 79, 2 points from 56 to 64 1 point, and from 50 to 55 no points, In order to graduate a student must have a minimum of 10 points. Thus a student with a large number of low marks. many below 55, will not be granted a degree. This is an excellent system and will do much to raise the academic standards of

Generally the Gazette is very pleased with the proposed curriculum and we hope that the Faculty Council will make it official without any substantial changes. We realize that its faults are often unavoidable because of the conflicts of interest between the various departments and groups in the academic community.

However we are unhappy about the fact that students have not been consulted about the changes and that no effort was made to include student representation on the various committees drafting the scheme. Students are an integral part of the university and have a right to participate in this sort of debate. Indeed, we would much rather see our Council debate this kind of matter than some of the nonsense which presently occupies their time. We trust that there are members of the faculty and the administration who share this view,

Though the curriculum is now almost completely set, we feel that it would still be extremely valuable if faculty members would use their Monday classes to discuss it with their students. Though not many valuable ideas are likely to spring from this ad hoc session, nevertheless it would mean that at least token student participation would form part of the preparation for the adoption

of the curriculum. This could only be good for the university.

Letters to the editor

EXCHANGE STUDENT WRITES BACK FROM U. OF GUELPH

Dear Sir:

dent at the University of Guelph is by far the best of my three years of college life. I am one of fifty students across Canada enjoying the benefits of the Interregional Scholarship Exchange Plan (ISEP). It is a plan sponsored by CUS which allows students of second class standing to spend a year studying at a different university with tuition fees conpletely waived by the exchange university.

The University of Guelph is located in Guelph, Ontario, a quiet city of 42000. The university is composed of four colleges: Ontario Veterinary college, Ontario Agricultural College, Mac-Donald Institute (Home Economics) and Wellington College, a newly formed Arts college. This year student enrollment has reached a record high of 2200. Student identity is based on class (graduating year) and college. Such small units accounts for the friendly and spirited atmosphere of the campus.

The undergraduate curriculum is a tri-semester system of spring, summer and winter terms with three sets of final exams a year. Of course it is possible to study for only the winter and spring semesters. Like many universities today Guelph is in the midst of an ambitious expansion program with a predicted enrollment jump to 5000 by 1970. Many students feel that it will soon lose the intimacy and character of a small agricultural

irst vear students are in reoffers little entertainment of inal physical education building with two gyms and facilities for swimming, curling, shooting, squash, and other sports.

The biggest social event of the year is not Winter Carnival which lasts one weekend, but College Royal. It began as a livestock showmanship contest and today virtually every department and club on campus has set up its own type of showmanship and competition. The College Royal Ball and crowning of a queen begin the festivities and Curtain Call, a performance composed and produced entirely by students plays for several nights.

Most students know something about Dalhousie University but itimes in the same way I was a stranger to Ontario, its general geography and way of life. This is the whole purpose of ISEP. that students should become familiar with the rest of Canada in the best way, by actually spending a year in another province. Exchange students should be able to communicate with others, exchange ideas and sell their own province as well. I am the coordinator for ISEP at Guelph and student interest is keen once they become aware of this plan and its many benefits.

My year away at university is proving an invaluable experience, especially since I live in Halifax. One year in residence away from home should form a part of every student's university education. I am tasting and testing the thrills and spills of independence, and self assertion - all in a new and exciting environment. Above all am now convinced that university life can be the most wonderful adventure in a young

From the vestal's temple

. By NANCY WHITE .

It was one of those wind whistl- ringlets, then showered, tubbed, ing nights that steal security from the heart. The air was dry and the trees were almost rattling.

Suddenly the wind stopped. In its place was an eerie silence, broken only occasionally by the hum of locusts, the clink of glasses, the rumbling of a subway train, the rattle of a taxi and the pealing of a church bell.

A strange quiet hung around the ancient stone dormitory up the hill from The Elbow, the chilly inlet of the north Atlantic.

In her suite on the fourth floor, sophomore science student Jane Bomb poured herself another 'kiltlifter, noting urbanely to herself that in Ottawa this drink was known as a rusty nail.

"If only," she mused, "I were in Ottawa right now, I could note urbanely that in Nova Scotia this rusty nail would be known as a kiltlifter." She gazed pensively out the window.

Jane Bomb was looking rugged as usual in an ankle-length granny-gown she'd made herself out of her old Girl Guide rucksack. With it she wore gold bell-bottom sneakers, kid gloves and chin-

chilla earmuffs. She smoked a Turkish cigarette as she perused the latest edition of Lanfranc's Cirurgerie, her restless mind wondering all the while why a girl as

self-disciplined as she couldn't learn to like smoking. "Why can't somone as selfdisciplined as I not learn to like smoking?" she asked grimly as

she burst into a fit of coughing. She wandered over to the hi-fi set, put "Barbra Streisand Sings the William Tell Overture" on the turntable, and coolly flicked the off-on button. Silence. Jan's face clouded with anger. She delicately kicked the machine. Still silence.

Always the scientist, Bomb carefully took the set apart and someone had pulled the plug from

The level-headed girl deftly extricated a small radio set from the sole of her right sneaker and spoke tersely into the pin-sized microphone:

"If Hammy is anywhere in the building would he please go to room 487 right away. My record player seems to be unplugged." After difficulties were overcome, Jane returned once more to her kiltlifter and Lanfranc. Out-

side the silence still hung heavy. Suddenly, out of the calm, came tiny click and a choked voice sobbed through her intercom:

"Id there anyone in the hall

Jane's mind immediately sprang into action. "It is quite clear to me," she said, "that had happened was obvious to her Through gritted teeth one can steel-trap mind, Someone, some-

and sprayed Chant d'Aromes over her throaty laugh.

Bomb quickly checked her radio set, tape recorder and sunglasses. All were in good working

After a quick glance at her King's College End of the World Manual, she was ready for action. She opened her window and nimbly climed down her strategicallyplaced ladder.

As she soundlessly touched the ground she caught a subtle scent of Brut. Bomb whistled appreciatively. There stood a bronzed god of a man with a clean-shaven chest and massive face. He wore very brief bathing trunks and a smile.

'Hi," he said wittily. 'I'm Bomb,'' she replied in kind. Her trained eye gave him swift appraisal. "You certainly have a clean-shaven chest and massive face," she told him.
"Not at all," The man blush-

ed becomingly. 'Tell me, do yougo to school?' 'What do you take me for a

'The frost is on the pumpkin

on dit." "That's not all it's on. These January frolics are something less than a joy," the man concluded, and shivered discreetly.

"You're cold," Bomb deduced. The man laughed mockingly at her. "You're right," he said. Bomb made a mental note to look this one up after the ad-

venture was over, then, after a poignant parting, continued on her She crept along the ground until she reached the steps, then stood up and walked through the

door, having first carefully opened it, as was her wont. She found herself in a great hall which she recognized as being the reception room of the building in which she lived. At

the end of the room sat a young girl whose frail shoulders were 'Hey,'' said Bomb, "have you The girl looked up with obvious

relief. "No, are they?" "Yes that would be my judge-

Suddenly Jane Bomb had a flash of inspiration.

"Are you by any chance the owner of the choked voice that sobbed through the intercom a few moments ago?"' she inquired

The girl was obviously in the throes of an inward struggle. Her tormented state of mind showed in her pleading eves. 'I did make an announcement.

But that was at 7.15. It's current-ly quarter to twelve." Bomb asked if she wanted her

revolver shot off then and there. "Oh, you've come to help."
The girl swooned casually in ex-

"Yes," said Bomb, "I came directly I got your message. At your service, you might say.'

'I accept your assistance with thanks," said the girl, adding the mysterious directive: "Meet me at Shearwater Friday night at

And that is how lovely young JaneBomb won the coveted position of starter at the Dal-UNB. Mt. A swim meet.

Critics of "boob-tube"

Television lectures here to stay, predicts report to universities

REPRINTED FROM THE SILHOUETTE

Critics of the boob-tube beware-TV lectures are here to stay. This prediction is made in a 28-page report prepared for the are not too familiar with the Mar- heads of Ontario's provincially assisted universities and colleges, and published Dec. 10.

The reason? Television lectures offer advantages to the direct system both quantitatively and qualitatively. The quantitative advantages are obvious, says the report. More students can be taught by fewer instructors. The use of video-tape

greatly increases the scope of the TV classroom. Television offers a number of qualitative advantages, especially in the fields of science and medicine. Such delicate observations as the staining of a slide, certain dental techniques or the scanning of detailed graphs can be made easily visible to a large studio

By 1970 there will be a shortage of qualified professors in Canadian universities, says the report. About 8,300 full-time staff will be needed in all Ontario universities in 1970-71. From the present level of 3,700, the provincially assisted Ontario universities will need between 600 and 900 additional staff members each year. But only 190 Ph.D.'s were granted in Ontario in 1963-64.

The purpose of television will then be to "make optimum use of the talents of every staff member who will be available." HELP PROFESSIONAL Television will also solve some of the problems of increased

enrolment, by enabling the professor to give his lecture once and reach the whole class, leaving more time to conduct seminars, meet students individually and pursue his own research and super-Television, says the report, seems to be a practical way to have

the very best lecturers made available to all. It also supplies a helpful method to achieve uniformity of instruction, especially in introductory courses. The use of videotape gives the additional advantage of being able

to repeat lectures. The report predicts the establishment of tape

libraries, where students may have explanations and portions of lectures repeated. The principle of qualitiative improvement, the report states, "is generally accepted by the academic community, though its application to a widening spectrum of subjects is moving through a cycle of initial resistance, experimentation and evaluation."

"The most serious doubts are based on the fear that television may debase the whole process of higher education." The fear is that the "professional virtues of sincere and humble scholarship" may become overshadowed by "glibness and the arts of the showman."

SOME WEAKNESSES

The use of television may tend to "elevate the performing professor and reduce his class assistants to conforming drudges. The autonomy of universities themselves could be threatened if governments forced them to use the medium against their judgment." There is another fear, which has to do with the place of the

The report says: "The extensive use of television in universities might lead to too great a stress on the lecture as a teach.

But with the use of videotape libraries, the lecture will become "supplemental to, not the core of, teaching and learning." Thus the student's role will change from a passive one to one of active inquiry. "The core of the learning process might...be shifted back to. . .individual learning by the student. . .aided by books and videotapes used to supplement his tutorials and sem-

Television lectures, says the report, cause a general improvement teaching techniques. Experience has shown "that lectures prepared for delivery on television are. . . more compact, better organized, better illustrated and more 'cared about'."

THREE SYSTEMS The report identifies three types of television system.

The laboratory demonstration uses TV as an "image enlarger" to improve the efficiency of laboratory work and avoid duplication of expensive lab equipment. This is the cheapest system, costing from \$25,000 to \$100,000. It is used at the University of Waterloo in Dentistry and Zoology and at Waterloo University.

The informal lecture uses two or three cameras with associated switching and monitoring equipment. This system costs between \$50,000 and \$300,000. It requires a larger studio and more technicians than the laboratory demonstration, McMaster, McGill

and York Universities use this system. At present, no Ontario universities use the third type—the formal lectures. These are designed to be repeated over long periods of time, or distributed to other universities or broadcast stations. This system requires professional assistance in direction, production and set design, with extensive use of videotape. The range of price could be from \$250,000 to \$600,000. An example of this system, says the report, might be the lecture series by the CBC French Television network.

The report also notes a number of legal problems associated

with TV lectures and especially with videotape These problems revolve around the rights of lecturers concerning thier videotaped lectures.

Should the lecturer have the right to approve or disapprove any editing of the videotapes? Should the lecturer have joint control over the use of the tape,

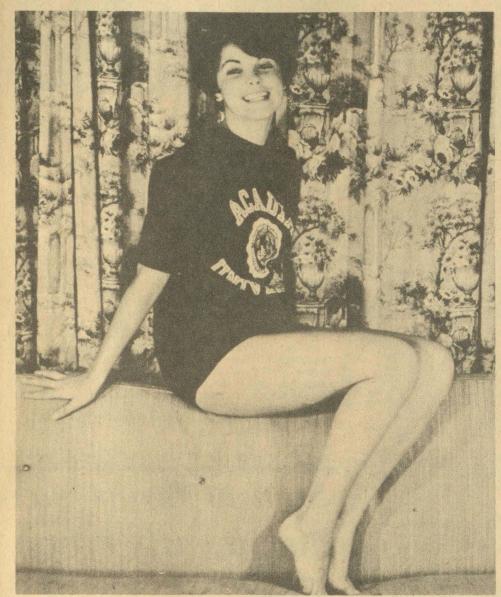

along with his department and the administration? When the videotaped lecture series is used for certain purposes-showing in other universities or broadcast-should the lecturer be paid an extra fee?

When the lecturer leaves the university, should the university be able to retain the series of lectures? W.J. McCallion, McMaster's Director of Educational Service

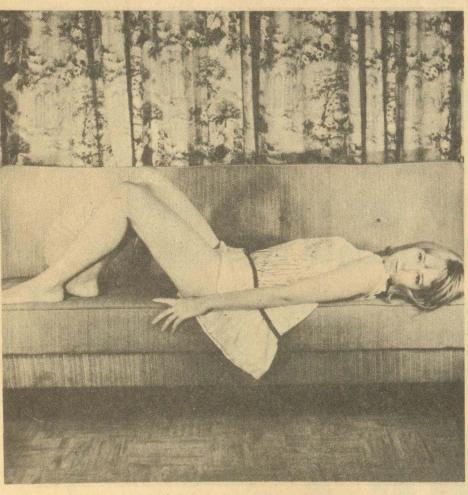

and Extension, has said: "No one has a formula worked out that is completely satisfactory. This issue is very cloudy and needs considerable clarification."

The Athenaeum calendar

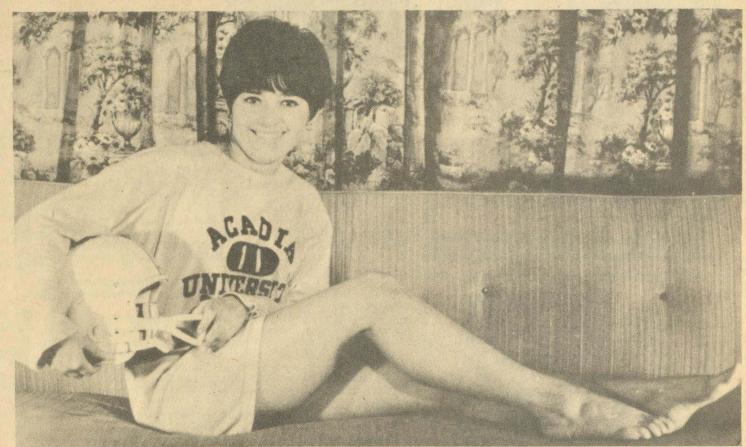

Acadia University officials impound calendar claim co-ed photo exhibits "in bad taste"

MAY-JUNE

MARCH-APRIL

SEPTEMBER-OCTOBER

GUARDIANS OF OUR VIRTUE

The next thing that will happen around this place is that the *Catcher in the Rye* will be burned in a ceremonial fire as English 350 students are beaten to obtain withheld copies.

It's really quite funny, you see.

The Athenaeum calendars, a joint publication venture by this newspaper and the student public relations office, have been whisked away by grim-lipped university police.

We were told they were "tasteless".

A direct slap in the face to every one of the six pretty coeds who posed for the photographs.

We were told that the creators made a deliberate attempt to be sensational.

Ho, hum.

We were told that they resembled tearouts from a girlie magazine.

Well, where are the bulging breasts, taut nipples, slightly spread thighs and creamy round buttocks?

We were told that the university's "image" had to be protected.

Can you imagine anyone trying to protect the image

this university presently has in the outside world?

We were told that the girls involved had to be con-

Certainly. And they've agreed that should one photo be slightly doctored, the calendars can be sold.

The offending photo shows, see, under a nightie, see, what looks like a nipple but which is actually a fold of cloth. Nipples, of course, are unspeakables which don't exist. And babies come from storks.

Next week, we might simply print photos from the calendar in *The Athenaeum*. Then there won't be any sense in impounding them, and we can perhaps realize some of the money and effort we put into their printing.

English literature is a great thing. Everyone should take a few English courses and study great books and things. It's a very on the basic concepts in planning rewarding experience. One sees great truths before one's eyes. One's perception of human nature and of life is brought into focus.

The twentieth-century novel is particularly concerned with perception. You see, class, in real life one understands things by just seeing things and people can often communicate without speaking aloud. This is one of the little theories behind Henry James' novels

The typical Jamesian conversation is full of implications which everyone but me, typical college student, a little stupid, perhaps,

Our hero is solving the Problem and his campanion of the moment is Helping. (Everyone in the novel is Confused, Confusing. Helping Immeasurably and Wonderful.) They meet at an obscure French cafe or for tea (never coffee) at one or the other's home. They have never spoken together before. Neither has ever been sor Gordon gave two lectures, spoken of to the other by a third party. But their mutual understand- one open to the public. The other, ing is perfect. Each knows of or has met or is a Very Close Friend for students and staff of the Deof the Problem character.

They gaze deeply into each other's eyes and Knowledge comes fiscal policy in the post-war galloping in to greet them. They speak...

(Imaginery Quote:) "Yes, you see, it's that. . ." she began slowly then ceased, her eyes expressing her meaning.

"Quite, I understand perfectly what you mean. It's because he's so, . . " His voice trailed off into the distance. There was no need

to enunciate what his hands were saying so well. "Ah, exactly. You have caught the precise meaning." Her toes wiggled expressively." (Unimaginery Unquote).

Great. So here I am, the hapless, clueless reader, trying to sort out this Very Significant Conversation, After three hundred pages one wonders at the condition of one's own mind, After all, the measure of sanity is very subjective. Maybe I really am losing my mind, Please, someone, clue me in.

King Rat: Top film of '65

Features Editor

King Rat" is probably one of Purpose of the discussion was Department of Psychiatry when the best films of 1965. It is always dangerous for a critic (of whatever standing) to praise a movie too highly, for his reputation may suffer. But in this case few critics could feel uneasy in their recommendation.

The story of "King Rat" is that of the survival in, rather than the escape from, a Japanese p.o.w.s. camp in the last year of the war. Hence the film deals mainly with the attempts by the allied prisoners to eke out an existence in their grotesque surroundings. The men have the look of death about them as they wander through the dustridden compound in their rags. scrabbling for cockroaches, and rumbly and 80 awaiting their daily rice rations.

sion on the problems of com-The opening shots of the "King munity psychiatric clinics. In Rat" show us the stark reality of he afternoon Dr. Foley talked the life as it must have been for about a training program in comthose allied p.o.w.s. in the Japanese campaign.

Against this background stands a man apart. He is the King; immaculately dressed he strolls through the compound, with a fresh shirt, manicured finger- existence, their world away from nails, and clean shaven. He is an American corporal (George Segal) who has seized his situation and has transcended the stratifications found in institutions and that his world is destroyed, for his own society, to achieve emminence. Under his autocratic rule he has established a new order. Based on theiving and bribery, he has corrupted the allied officers and placed them on his payroll. Consequently he eats hospital - rationed eggs, sleeps on clean sheets, and smokes, all the cigarettes he desires. He trades with the Japanese guards making handsome profits as a middleman. Opposed to him stands the

camp Provost Marshall (Tom Courtenay). Responsible for camp discipline and the morality of the prisoners, he devotes his time in attempting to track down the King of the destruction of the Yet he rebels against his superior's corruption attempting to

Tuck Talk

Mounties subdue Tiger six

The Dalhousie Tigers are expoor backchecking, or the lack of it was the essential reason for the loss, and along with many other observers, he concludes the Tigers lack some of that most intriguing commodity - luck. Bill Stanish was the sole scorer for the Tiger's but he also managed to miss out on several others. Ron Smyth, though playing regularly as a defenseman also had a difficult time when he approached the opposition's net.

Selder was strong in his praise of rearguard Ian Oulton, He also felt that his club should have lost but one game this entire season, the St. Dunstan's affair. From their home showing, one would tend to agree, in that the Tiger's seem to have all the talent required for a win, but rookie mistakes and ill-fortune - injury wise and otherwise have plagued the squad from the start. The Tiger's line of Barry Ling,

McMASTER UNIVERSITY

GRADUATE TEACHING FELLOWSHIPS

The University offers Graduate Teaching Fellowships to support graduate students working towards a Master's Degree in Biochemistry, Biophysics, Civil Engineering, Classics, Economics, German, Greek, Latin, Mechanical Engineering, Metallurgical Engineering, Philosophy, Politics, Romance Languages, Russian, Sociology and Social Anthropology; and for a Master's or Doctor of Philosophy Degree in Biology, Chemical Engineering, Chemical Physics, Chemistry, Electrical Engineering, English, Geochemistry, Geography, Geology, History, Mathematics, Metallurgy, Molecular Biology, Physics, Psychology and the Religious Sciences.

The Fellowships vary in value but in all cases the stipends provide adequate support for a full year's study. Most awards are renewable for subsequent years. Holders of Fellowships will devote approximately one-fifth of their time to instructional duties. Travel advances are available to assist students who are coming to the University

Further information and application forms may be obtained from: The Dean of Graduate Studies, McMaster University, Hamilton, Ontario, Canada.

ted that the company has re- lationship with it.

across Canada for volunteers. McWhinney, who was national

director of the Canadian University Service Overseas for four years, said the company plans to work closely with CUSO.

He said, however, that he does not regard his appointment to the

At the present time the CYC is planning projects only within Canada, while CUSO's activities are confined to overseas work.

Asked whether the company hopes to enter the field in Quebec where there has been much He said the company plans to opposition from youth and stu-undertake community develop- dents groups and where a proalready exists, McWhinney re-Stewart Goodings, formerly plied that the CYC hoped to bene-Acting Director of the CYC's fit from TEQ's experience and organizing committee, commen- to work out some kind of re-

Student lobby to start

da's House of Commons will soon tensed for battle. echo to the resounding tiptoe of the Canadian Union of Students' lobby for free education.

As yet the details are relatively top secret. But it appears certain that CUS types will soon be buttonholing M.P.'s, seducing them in the corridors, and taking them out to coffee - - all in the interest of the Canadian student pocketbook.

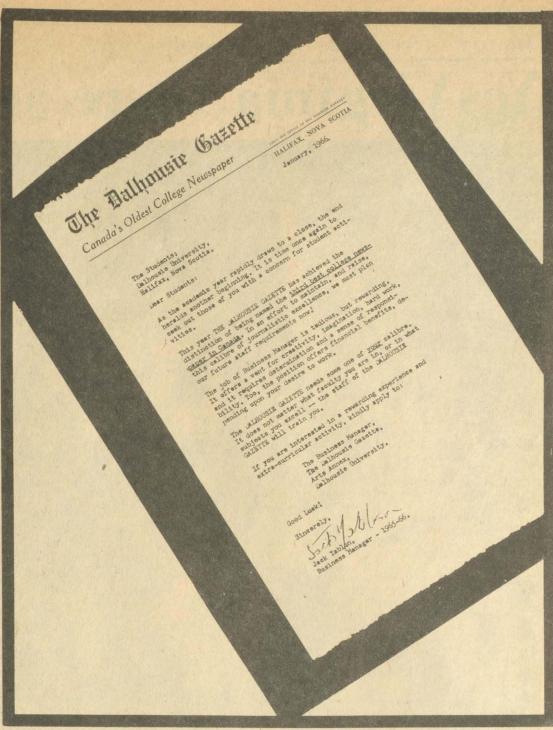

Not since the masses turned

OTTAWA - - The halls of Cana. the CUS bureaucracy been so

But unlike the placard fiascos of the past, this will be a war in gray flannel.

Confidential memoranda (well hidden from the student press) will be circulated to a select committee of influentials who will nod in praise of the union's program

Though the whole story will likely never be told, it is considered virtually certain that the CUS lobby will be instrumental
