Editorial

WITH the publication of Vol. I, No. II, the experimental issue of the *Dalhousie Medical Journal* is completed. As was hoped for at the start, the *Journal* has justified its existence, and has shown the feasibility of its continuance as a definite activity of the Medical Student Body. The interest shown by all the students and many of the Alumni has been keen and the support they afforded the staff has made possible any little success which our periodical may have achieved.

Our position as staff in charge of Dalhousie's first medical publication has been fraught with many difficulties, and we sincerely trust that we have done our work efficiently. Regardless of all else, the editors have performed as capably as they knew how and have enjoyed in helping to make Dalhousie's youngest member in the literary field an important asset to student activities at our College by the Sea.

MEDICAL ACHIEVEMENTS IN A TROUBLED WORLD

REGARDLESS of all that one may hear to the contrary the medical profession has for many centuries past and still is, composed of men and women who have chosen it as their life's work because of the finer qualities which it must of necessity cultivate in them. Nor has the student of today an attitude that is in any way changed. In him there awakens that same desire to seek, to find, to learn, so that when his

Seasonable Suggestions of Ethical Pharmaceutical Products
